

SHEEP INDUSTRY TO HAVE A BOOM

By the Passing of Reciprocity Agreement With U. S.

SHORTAGE IN CANADA

Conservative and Large Breeder Explain Importation of Mutton.

Guelph, Aug. 8.—"There is nothing mysterious about the importation of United States sheep into Canada at the present time," said Mr. Henry Arkell, one of the largest breeders of sheep in Canada, and for years a prominent Conservative, to your correspondent today.

"The tariff against Canadian sheep imposed by the United States is responsible for it. If the tariff was removed the Canadian sheep producers would be encouraged to go into the production of sheep more extensively."

"The reason there are United States sheep coming in here at present is that there is a shortage of the Canadian article. There has been a large increase in the population from the old land in the past few years, and they are all consumers of mutton. The tariff restrictions and the limited market that has resulted since the introduction of the Dingley tariff by our United States neighbors are responsible for the shortage. This tariff has discouraged the raising of sheep for mutton purposes in Canada, and where a man had a large flock of sheep previous to the passing of that legislation he has not more than 5 per cent. now of his former flock. If the trade agreement is passed and tariff restrictions removed we can look for a remarkable boom in the sheep industry in Canada."

"It is the veriest nonsense to say that the throwing open of the sheep market between the two countries will kill the industry in Canada. It is really no industry of that kind here to kill. Remove the tariff and watch the Canadian sheep industry grow. I am voted Conservative for years, but I am for the trade agreement."

THE LONDON CAR MEN HAVE JOINED STRIKE

Seventy Thousand Are Now Affected by the Dock Walk-Out.

[Canadian Press.]

London, Aug. 8.—The car men joined the other strikers on the London docks today, and union officials claim that 70,000 men are now affected. Work on the south side of the Thames River is at a standstill. Ships have arrived in large numbers during the last few days, with full cargoes with consignments of food for London houses, but there is no one to unload the vessels. The cargoes of meat in refrigerating chambers are still unspoiled, but the supplies of coal to operate the freezing plants are rapidly disappearing, and the strikers will not permit the replenishing of the fuel supply.

FIRE ALARM SYSTEM USELESS BY STORM

Calls for Toronto Brigade Had to Be Delivered by Policemen.

[Canadian Press.]

Toronto, Aug. 8.—The night's electrical storm put the fire alarm system out of commission in the business portion of the city. Fire broke out in the Anchor Manufacturing Company's factory, and did \$20,000 damage to the building and contents. P. C. O'Meara tried to ring an alarm, but the box did not work. The police had to get their patrol system working, and get policemen from their beats to run to the nearest fire halls. This caused the fire to get such a great start that there was heavy damage done before the fire department arrived. The Toronto electric light system was also put out of business.

GRANT FOR FIREMEN

Government Donates \$150 to the Hamilton Brigade.

[Canadian Press.]

Hamilton, Aug. 8.—The Ontario Government made an additional grant of \$150 today to the Hamilton fire department benefit fund in recognition of the services rendered by the brigade at the asylum fire. This brings the amount of the grants up to two hundred dollars. The department few minutes before the asylum fire extinguished a small blaze in a stable in the rear of Mr. Robinson's residence. The aldermen still think the Government grant small.

SENATOR FRYE DEAD

Levinson, Me., Aug. 8.—Wm. Pierce Frye, senior United States senator from Maine, died today at the home of his daughter, Mrs. Helen White, in this city.

COOL COOKING IN THE HOT WEATHER

Paper Bags Reduce Heat and Abolish Odors.

NO WATCHING NEEDED

Put the Food in Eramaline Bags, and Oven Does the Rest—Some Recipes Coming.

In England paper bag cooking is being looked on as especially hot weather cooking. The London Express, in a recent issue, says:

"The claim that paper bag cookery is the ideal system for the hot weather has not been subjected to a severe test, and has not, moreover, been more triumphantly vindicated than during yesterday's demonstrations at the Bon Marche. The result was another thousand women converts to paper bag cookery."

To begin with, although cooking was proceeding in two gas ovens (supplied by the South Metropolitan Gas Company), and the demonstration room was packed with people, the temperature in the room during the afternoon demonstration was several degrees lower than it was outside.

At 3:15 p.m. a representative of the Bon Marche, out of curiosity, placed a thermometer a few feet away from the gas ovens, while a commissionaire stationed outside the establishment demonstrated another thermometer in the street. The temperatures recorded were as follows:

In the street 84 deg.

In the demonstration room. 79 deg.

Second, although fish, liver, sausages, kippers and delicate pastry were in the ovens at the same time, there was no smell whatever when the oven doors were opened, and no dish bore the slightest trace of having been cooked with any other dish.

No Kitchen Odors.

Eramaline paper bag cookery is the ideal system for the hot weather, inasmuch as it numbers among its many special features the following striking advantages:

There is no smell whatever during the cooking. The disagreeable odors caused by the old-fashioned culinary system, which hot weather renders greatly to accentuate, are completely banished by the adoption of the Eramaline system.

No tainting is required for joints, and there is no leaning over hot stoves, which ruins complexion and temper alike.

No watching of any sort is necessary. Every course placed in an Eramaline bag cooks itself.

The tiresome work of washing up is dispensed with completely.

Less heat and less time are required in the oven when Eramaline paper bags are employed. The decrease in heat, which frequently amounts to as much as 100 degrees Fahr., not only spells increased comfort for the cook, but economy in gas.

In tomorrow's edition some recipes for paper bag cooking will be published. The bags may be procured at The Advertiser Office, by presenting the following coupon:

LONDON ADVERTISER PAPER-BAG COOKERY COUPON

This Coupon cut from The Advertiser entitles the holder to purchase The London Advertiser Eramaline Paper Bags at advertised prices when presented at The Advertiser Office.

BLACK RUST RUMORS FROM WHEAT FIELD

Experimental Farm Expert Says There Is Very Little.

[Canadian Press.]

Winnipeg, Aug. 8.—It is hot and wet and throughout Manitoba today, much rain falling during the night. Black rust rumors continue, but are persistently denied.

[Canadian Press.]

Brandon, Aug. 8.—In discussing the black rust rumors, Superintendent McKillop, of the Experimental Farm, expressed the opinion that the growth of the wheat in this territory was too far advanced to be seriously injured by any rust that may appear now.

He said that he thought that it would be safe to take a middle course between opinions of those who are attempting to create a black rust scare, and those who claim there is nothing whatever in the matter with the crop. The experimental farm is situated low, and is particularly well suited for producing rust in such a year as this.

Black rust was cut by the Government, and there was no appearance whatever of rust on it. There is rust on some of the later varieties, but nothing harmful, is calculated to do very much harm.

WINGHAM'S FINE SHOWING.

Wingham, Ont., Aug. 8.—Wingham High School is again to the front. Out of 18 recommended candidates who were sent up to write on the normal entrance, 15 were successful, 7 obtained honors. The following obtained honors: Florence Alchison (honors), William Bridges, Annie Geddes, William Geddes (honors), Ada Haines (honors), Roland Henderson, Green (honors), Ernest Linklater (honors), Peter McEwen, Hector Mutt (honors), Florence Price (honors), Mary Ritchie, Lillian Ross, Emma Stewart, Roy Turvey.

TRADE AGREEMENT FINE FOR FARMERS

Mr. Fisher Makes That Clear to Harristown Audience.

THE ANNEXATION BOGEY

Good Representation of Conservative Farmers Here Minister of Agriculture.

Harristown, Aug. 8.—Following the enthusiastic meeting at Drayton this afternoon, Hon. Sydney Fisher, minister of agriculture, came here this evening and gave a splendid reception at the town hall. His address on reciprocity was a clear exposition of the trade agreement from the standpoint of the farmer, and the manner in which he presented the facts made a marked impression on the audience. The hall was filled, between 600 and 700 people being present, including many from Mount Forest, Cliford, Fordwich and other places, and the audience was well divided as to politics, there being an encouraging representation of Conservative farmers eager to hear the head of the department of agriculture discuss the subject of reciprocity.

Mr. R. M. Hazelwood, of Cliford, president of the North Wellington Reform Association, occupied the chair. Mr. M. Martineau, M. P., was the first speaker, and he was received with applause. He made a brief but effective address on the issue of reciprocity. He was followed by Mr. James McEwen, M. P. P., who also spoke of reciprocity. He showed how on this year's crop the farmers would be benefited by reciprocity to the extent of \$450, and he cited similar cases in regard to his neighbors. He related how he had first received intimation of the agreement. He was eating his breakfast at a hotel in Toronto with five Conservative members of the Assembly when he read the report in the press. Every one of the five said that what Canada wanted, but Sir James Whitlock had since given them their medicine and they opposed the agreement now.

Applause for Mr. Fisher.

Hon. Mr. Fisher was loudly applauded when he was called upon. He dealt with the question in his convincing way and gave figures showing the growth of Canada's trade with Great Britain and the United States, he went into detail to show just how the farmers would be benefited by this agreement. He also showed how the manufacturers were viewing the matter in a different light now. Referring to the cry of the "thin end of the wedge," he showed how past revisions of the tariff had not been detrimental. Dealing with the large amount of capital that had come into Canada from Europe and other parts of the world in the past five months, Mr. Fisher related many personal interviews to prove that capitalists were not opposed to the future of Canada would be great.

As to the annexation cry, he pointed out that while Canada was getting all the benefits of free trade, the United States was not necessary for the United States to relinquish any rights or privileges enjoyed under the British flag. He said that the British Empire was now a stronger British country. Reciprocity would make Canada more prosperous.

From the time the evening came, but one interruption during the evening, when someone asked if Canada was not prospering enough now, and if it should not leave the Empire alone.

Mr. Fisher made a direct reply, in which he pointed out that the Canadian farmers were equal to any in the world and did not desire to be a subject of any foreign power. He said that the Empire was now a stronger British country. Reciprocity would make Canada more prosperous.

He said that the British Empire was now a stronger British country. Reciprocity would make Canada more prosperous.

HENRI AND LEMIEUX TO CLASH ON STUMP

Verbal Duel Arranged Between Bourassa and Postmaster-General.

[Canadian Press.]

Montreal, Aug. 8.—Mr. Henri Bourassa will meet Hon. Rodolphe Lemieux on the hustings at St. Hyacinthe on Sunday afternoon. If the postmaster-general turns up as he is advertised to do, and the result is expected to produce one of the liveliest political meetings that have been held in the province for years past.

During the platform campaign that has been waged for the past two months a great deal of cross-firing has taken place from different points of view between Mr. Lemieux and Mr. Bourassa. The former has publicly charged that the latter applied for public positions on three different occasions—for the deputy speakership of the House, for the postmaster-generalship of Montreal, and for the position as Canadian commissioner in France.

Bourassa declined to answer these charges except face to face with Mr. Lemieux, and therefore the Postmaster-General was invited to attend the Nationalist meetings at Papineauville and St. Hyacinthe. Mr. Bourassa has convened a meeting of the electors of his county at St. Hyacinthe today, when it was announced that the Hon. Mr. Lemieux would be one of the speakers at Mr. Bourassa's meeting.

Le Devoir accordingly this afternoon announced that Mr. Bourassa will be pleased to meet Mr. Lemieux at St. Hyacinthe.

Mr. Bourassa stated today that he was waiting to ascertain if Mr. Lemieux would be actually present at the meeting.

DONALD SUTHERLAND CONSENTS TO RUN

Will Attempt To Wrest South Oxford from the Liberals.

[Canadian Press.]

Ingersoll, Aug. 8.—Donald Sutherland, member of the Conservative Party of South Oxford as their standard-bearer in the present election campaign at the nomination held at Mount Elgin today. The meeting was well attended, and after a few remarks by Sutherland, Mr. S. M. Fleet, of Ingersoll, Donald Sutherland was unanimously selected, on motion of the Coleridge, Ingersoll, seconded by S. R. Lee.

THE EAST HURON CONS SELECT CANDIDATE

Mr. James Bowman Nominated to Oppose Mr. Hislop.

[Canadian Press.]

Brussels, Aug. 8.—East Huron is all ready for the fight, each party having its respective candidate. The Conservative nominating convention was held here this afternoon, when Mr. James Bowman, of Ingersoll, was made the unanimous choice of the convention on motion of Mayor Spotton, of East Wawanosh, Mr. Peter Scott, of East Wawanosh, president of the association, presided, and spoke of the nomination of Mr. Bowman, M. P. P. for North Huron; Mr. Spotton and the candidate. There were about one hundred and twenty delegates in attendance. Mr. Thomas Chisholm, who has been the member for the past two terms, was not present, he being on a trip.

Hislop's opponent will be Mr. Arch. Hislop, ex-M. P. P. for East Huron. Mr. Hislop was defeated in 1905. Mr. Hislop's majority being 142, and the candidates both being farmers and living in adjoining townships, a close contest is looked for.

MANY HORSES BURNED IN HAMILTON BLAZE

Twenty-Two Animals Destroyed by Big Livery Stable Fire.

[Canadian Press.]

Hamilton, Aug. 8.—Fire early this morning destroyed Hull & Evans' livery stables on Charles street, a large brick structure, filled with inflammable material, which burned like tinder. So rapidly did the flames spread, the firemen found it impossible to break through the fierce heat to rescue the horses. Twenty-two animals were burned to death. William Henry, a journeyman, was seriously injured, and hundreds of horses were rushed out of the stables to places of safety.

The blaze, fanned by a strong breeze, became a conflagration, and the firemen found it impossible to break through the fierce heat to rescue the horses. Twenty-two animals were burned to death. William Henry, a journeyman, was seriously injured, and hundreds of horses were rushed out of the stables to places of safety.
