

Electric Telegraph.

SPECIAL TO THE DAILY BRITISH COLONIST.

Eastern States.
New York, June 12.—Joseph Dion beat Rodolph two out of three French carom games of 100 points each, last night.**Washington, June 13.**—It is stated that the President is about to inaugurate a commercial policy which will bring to the United States the large trade of the Spanish American States that is now going to Europe. It looks to a new treaty and intimate relations, and was suggested in his first annual message. Secretary Cox stated, in an interview with Lawrence, that he did not believe it was good policy for the Government to sell public lands in large tracts by treaty, and that he believed there was no constitutional authority, by treaty with Indian tribes to sell lands which they hold to railroad companies or other parties and that he would not favor such a treaty, but when such treaty did have been made the department could not declare it valid but leave it to the Courts to decide.**Washington, June 13.**—The British Minister has received an official letter from Lord Clarendon, in which the thanks of the British Cabinet are conveyed to this Government for the prompt measures taken in suppressing the Fenian invasion of Canada, and an earnest wish expressed that O'Neil and other leading Fenians may be held responsible for their violation of the neutrality laws and punished according to statute for what is regarded as a gross crime committed upon a Government with which they are at peace and an outrage on an undefending people. The tenor of this dispatch has been communicated to the President. The Government will leave O'Neil and the rest to be dealt with according to law.**Washington, June 13.**—A meeting of the citizens of this city was held on Saturday and a memorial adopted addressed to the President at his residence at Indian affairs in Wyoming Territory, and generally opposed to the views set forth at the late interview between the Secretary of the Interior and the Red Cloud party.**Heavy storm east of Orleans prevent the transmission of dispatches.****Oregon.****Portland, June 13.**—A cowardly attempt at assassination was made this morning about 3:30 o'clock at the N.P.C.'s office by some unknown person. The would-be assassin discharged a pistol-shot through a window which opened into one of the sleeping apartments in the rear of the office. The room at the time was occupied by Dr. Fowler, Mr. Holladay's private secretary. The assassin raised the window and placing the muzzle of the pistol against the headboard so that the ball would strike where he supposed the sleeper's head would be, discharged the weapon. Fortunately for Dr. Fowler his head lay on the pillow farthest from the window. The ball tore through the walnut headboard shattering it badly, and then buried itself in the pillow. No noise was heard by the occupant as the ball struck where he supposed the sleeper's head would be, discharged the weapon. Fortunately for Dr. Fowler his head lay on the pillow farthest from the window. The ball tore through the walnut headboard shattering it badly, and then buried itself in the pillow. No noise was heard by the occupant as the ball struck where he supposed the sleeper's head would be, discharged the weapon.

Ayer's Sarsaparilla,

FOR PURIFYING THE BLOOD.

The reputation of this excellent medicine, is derived from its cures, many of which are truly marvellous. It is the best remedy for Scrofulous diseases, where the system seemed saturated with corruption, have been purified and cured by it.

Scrofulous taints, which were aggravated by the scrofulous contamination until they were painfully afflicting, have been radically cured in such cases, and in almost every section of the country, that the public scarcely need to be informed of its virtues or uses.

Scrofulous taints are one of the most destructive enemies of our race. Often, this disease and taints tend to enfeeble or fatal diseases, without exciting a suspicion of its presence. Again, it seems to breed infection throughout the body, and then, on some favorable occasion, rapidly develops into one or other of its hideous forms, either on the surface or among the vitals. In the latter, tubercles may be suddenly deposited in the lungs or heart, or tumors formed in the liver, or it shows its presence by eruptions on the skin, or foul discharges on some part of the body. Hence the occasional use of this Sarsaparilla is highly advisable, even when no active disease is manifest. Persons afflicted with the following complaints generally find immediate relief, and are cured by its use. It is the best remedy for Scrofulous taints, and all the various Uterine affections of the muscular and nervous systems.
