**ROTHERHAM HOUSE,**

54, 56 and 58 Isabella St., Toronto.

## Dr. Holford Walker's Private Hospital,

For the treatment of Surgical and Nervous Diseases of Women.

**D**R. HOLFORD WALKER desires to announce to the medical profession that, having found it necessary to procure more room, he has purchased the adjoining house; the three, united, making the most complete private hospital on the continent. Situated as it is on the height of land, with sand subsoil, it is in the most healthy locality in the city; and is surrounded in all directions by street car service, which connect with the various railway stations.

In Surgical Diseases of Women, electricity, after Apostoli's method, is used in all suitable cases before resorting to surgical interference. In the treatment of neurasthenic and hysterical cases, only thoroughly trained masseuses are employed. Most satisfactory results have been obtained in numerous cases of subacute and chronic rheumatism, even after contractions have existed for months. Ladies addicted to the use of Alcohol, Morphine, Chloral, or the Bromides, are more quickly cured by the treatment adopted than by any other in vogue at the present time.

For particulars as to Terms, etc., Address

**DR. HOLFORD WALKER, - Isabella St., TORONTO.**
