

I H C Spreaders Are Equally Good All Over

A MANURE SPREADER is like a chain—as strong as its weakest part. Don't let one or two "exclusive features" influence you—don't be influenced by frills or fancies. Be sure that the spreader you buy is substantially built all over—without a weakness anywhere.

If you want to be sure of such a spreader—see that the I H C trade-mark is on the one you buy; then you will know that the material, the principle, and the construction are right. This trade-mark is backed by a company that can not afford to risk its reputation by offering inferior or inefficient machines.

I H C manure spreaders are of proved value—proved money-makers. Thousands of users testify to I H C superiority. Investigation brings to light the noticeable absence of troublesome gear wheels, the few levers, the perfect working apron, the wide range of feed, the light draft and the other advantages which have made I H C spreaders the choice of all who investigate thoroughly.

You will also note that there is an I H C spreader of a style and size to meet your particular requirements. **Corn King** spreaders are of the return apron type. **Cloverleaf** spreaders have endless apron. Each style is made in sizes from 30 to 70 bushels capacity. Lime hoods for spreading lime, etc.—and drilling attachments for distributing manure in rows, are furnished on special order.

Let the I H C local dealer tell you all about I H C spreaders. Let him tell you why it is best for you to invest in an I H C for greatest returns. Get catalogues from him, or, write nearest branch house.

I H C Service Bureau

The Bureau is a center where the best ways of doing things on the farm, and data relating to its development, are collected and distributed free to every one interested in agriculture. Every available source of information will be used in answering questions on all farm subjects. If the questions are sent to the I H C Service Bureau, they will receive prompt attention.
