

Barbadoes at 7½ to 7¾. for Porto Rico. Granulated is held at 9c. but the movement small. Canadian yellow sold at 7½c. to 8½c. for dark and bright respectively. Syrups fairly active at steady prices. Fruits unchanged at 7½c. for Valencias and 6½ to 6¾ for currants in quantities. Fish quiet, but a good season looked for at higher prices. Teas are moving slowly; a few sales of Japan reported at 14 to 16c. for inferior and 27c. for common. Medium Congos sold at 30 to 36c. and fine at 50c. Coffee steady, with sales of common Rio at 8½c. and finer held at 11c. Liguors very quiet and Tobacco unchanged.

HARDWARE.—The movement is small, but merchants are looking forward to an active spring trade. There are no changes in prices; they are steady, and firmness rather than ease is expected.

HIDES AND SKINS.—Lower prices for hides are now ruling. The supply is fair and dealers are

Leading Maritime Manufacturers.

NEW BRUNSWICK COTTON MILLS,
ST. JOHN, N.B.

WM. PARKS & SON,
Cotton Spinners, Bleachers and Dyers,
Have been awarded Prize Medals for

— 1882 —

At the Toronto Industrial Exhibition,
Four Silver Medals and Three Bronze.

At the Montreal Exhibiton,
Silver Medal for "Best Exhibit."

At the Kingston Provincial Exhibition,
Silver Medal for "Best Exhibit."

And First Prize for their celebrated

BEAM WARPS,
COTTON YARNS,
CARPET WARPS,

BALL KNITTING COTTONS,

Manufacturers' Knitting Cottons and Apron Checks.
The smoothness and even finish of the Goods.

Brilliance of Colour, resulting from the use of the
'Saint John Waters' cannot be excelled.

Inventor and Sole Publisher.

BURGLARS

LUCAN; JAN. 12, 1883.

Messrs. J. & J. TAYLOR,
TORONTO SAFE WORKS.

GENTS.—It affords me unbounded pleasure
in testifying to the highly satisfactory manner
in which the Fire and Burglar Proof Safe I
purchased from you about one year ago, stood
the severe test to which it was exposed on Sat-
urday night last, 6th inst., when my banking
office was entered by burglars. The outer door,
which of course is only fire-proof, gave way in
time to the severe use of sledge hammers and
drills, but the door of Burglar Proof Vault
stood the test most satisfactorily, notwithstand-
ing the fact that the burglars operated on it with
the sledge hammer, five punches, and several
drills, the punches being used till they became
completely useless.

The burglars were evidently no novices at
their business, as they first broke off the dial
knob, and with the assistance of a heavy sledge
hammer attempted to drive in the spindle of
lock, but this being a tapered spindle did not
give way, but only became wedged in the tighter
the more they hammered it.

They then attempted to drill the door, but
only got through the outer plate of iron when
they came in contact with the hardened steel,
when they were again frustrated, the steel being
so hard that their drills were completely useless
for operating on it.

They next broke off the handle in the hope of
gaining an entrance in that way, but this also
proving of no effect to them, they gave it up in
disgust and left, leaving their tools behind them.

From the above you will see the safe has fully
vindicated its claim to be Burglar Proof in every
sense, and I am more than pleased to be able to
report its being even better than you represented.

To those requiring such securities, I have every
confidence in recommending your safes, both
Fire and Burglar Proof, as being, without doubt,
the best safes made on this continent.

The safe, as you are doubtless aware, is one of
your new patent, with non-conducting steel flange
door.

Yours truly,

R. H. O'NEIL,
Banker, Lucan, Ont.

Referring to the foregoing letter of Mr.
O'Neil's, we beg to say, that after placing his
safe under one of our most powerful drilling
machines, with drills made of the best known
qualities and varieties of steel, hardened with
chemicals till they would cut glass, together with
the application of a Blow-pipe for about four
hours, we failed to pierce the hardened steel. As
a last resort, by applying an exceedingly high
rate of speed to the drilling machine, constantly
keeping heavy pressure on the revolving tool, and
occasionally using punches and sledges on the
spot, we succeeded in wearing, by friction, a hole
through the door. But this operation, combined
with the advantage of our experience in such
work, occupied over fifteen hours incessant labor
with steam power. Such force we believe to be
practically impossible for burglars to bring to
bear on any safe with the appliances at their
command. We wish to add further that we have
never yet had one of our Burglar Proof Safes
forced open by burglars, and in every instance
where any of our safes have been burglarized
they were simply Fire Proof Safes.

J. & J. TAYLOR,
TORONTO SAFE WORKS.
