

By Way of Further Suggestion—

IN THE LAST ISSUE, we were talking of garage and greenhouse combinations, and some of the things worth considering from their utilitarian side.

Now a word about postponed work. Recently we have received several orders from

architects (one for \$60,000), the contracting for which has been accomplished by the architect bringing, in detail, to his client's attention, the money-saving advantages of building now.

Based on the fact that "figures talk"—we mention this by way of suggestion.
