

- (a) Medical certification;
- (b) Joint cause problem;
- (c) Structure of the detailed list of International List of Diseases, Injuries and Causes of Death;
- (d) Structure and uses of intermediate and abridged lists;
- (e) Definitions of stillbirth, abortion and immaturity;
- (f) Size of age groups by which data should be tabulated;
- (g) Methods of standardizing rates;
- (h) Residence allocation;
- (i) Technical machinery for future revision of the International Classification.

It is thought that as a result of the forthcoming Conference in Paris, no further international conferences on a large scale will be necessary. Revision of the lists, as modification becomes necessary, will likely be henceforth one of the continuing responsibilities of the World Health Organization of the United Nations which is to meet in assembly for the first time in Geneva in June of this year.
