article are most manifest.**

WHY DOCTORS PREFER IT.

MITCHELL, June 30th, 1891.—I take an especial interest in the "D. & L." Emulsion because it is unquestionably the best Emulsion that has ever come under my observation ; in fact it does not seem possible that an Emulsion could be made more perfect in every respect, it being particularly pleasant to take, will not get rancid, and is especially adapted to cure or greatly relieve many lung troubles and wasting diseases, the result of neglected colds or coughs. Further, may say I think it is excellent as a food tonic to build up and strengthen the body which may have become emaciated through a lengthened illness.

J. WALKER CULL, M.D.

**A PERFECT EMULSION, SWEET AND PALATABLE
AS CREAM.**
