ON) OR BEFORE

MAY 10TH

Have you bought any SILVER BIRD? If not you had better buy it now. You must buy SILVER BIRD now if you want it at the bottom price. was 15 cents per share last week. It is now 25 cents per share. It will be 50 cents per share shortly, and before long everybody will be buying from One Dollar to One Dollar and Fifty Cents per share. Take our advice and buy now.

SILVER BIRD has advanced to 25 cents per share. Didn't we tell you it would do so? We tell you now it will be selling at 50 cents per share within the next few weeks. Watch SILVER BIRD. It has started and will not stop till it gets above par. Buy it now at 25 cents per share before it advances again. It is sure to do so. Buy it and keep it and you will be able to get One Dollar per share for it within the present year—possibly

That is our advice. We are in a position to judge. This advance to 25 cents per share is a legitimate, meritorious advance, brought about by That is our advice. We are in a position to judge. This advance to 25 cents per share is a legitimate, mentorious advance, brought about by recent developments highly favorable to the SILVER BIRD MINE. We believe that SILVER BIRD is a better and safer purchase at 25 cents per share to day than it has been in the past at 15 cents. If you have any SILVER BIRD shares hold on to them. Don't be induced to part from them. Buy more if you can. Hold them and reap the great profits that are coming to all holders of SILVER BIRD shares.

Remember what we tell you. Everybody will want SILVER BIRD before long, and will be glad to get it anywhere at from One Dollar to One Dollar and Fifty Cents per share. Buy SILVER BIRD. Hold SILVERBIRD. Watch SILVER BIRD

Considering the inside location of the property, development done, results obtained, low capitalization and the large amount of shares in the treasury, this is unquestionably one of the best bargains (if not the greatest bargain) that have been offered in Cobalt mining shares.

Capital, \$2,000,000. Treasury Stock, \$1,000,000. No personal liability. Fully paid up and non-assessable. A limited number of shares is now offered in the above Company at 50 cents. par value \$1.00.

The property of the Company is located on Minnehaha and White Water akes, in the Rainy River District, New Ontario, in what is known as the New Klondike and Manitou Belt, and consists of Locations S. V. 434 and S. V. 435, containing 67 acres of Mineralized Land. The Property is about 12 miles from Wabigoon, on the C. P. R., and is easily accessible, being reached by steamers that stop at the Company's Landing. We have an abundant supply of fresh water and wood for fuel, mills, etc. Title indisputable. Crown Patent, The Climatic Condition is such as to render it practical to operate the property at all times of the year.

### CHARACTER OF VEINS.

The Main Vein, which runs diagonally (4000 feet), across the Entire Property, is about 7 feet in width, and consists of Gold-Bearing Quartz and Porphyry. As depth is attained the vein widens, and opens to a greater volume and richer deposits. There are numerous Stringers of Quartz with this for mation which are very Heavily Mineralized.

Our Property is in the Immediate Vicinity of the Werld-Renowned Laurentian Mine, in which \$100 invested two years ago is estimated to be worth as many thousands.

Work on our Property has been done at eight different places, and each has shown remarkable richness. The Main Shaft, 6 feet by 8 feet, has been sunk to the depth of 100 feet, and averages \$506.21 in Gold per ton for every foot attained. A Second Shaft, or Test Pit, has been sunk 800 feet east of the Main Shaft No. 1, and on the Main Vein. Samples from this, showing no visible gold, assayed \$772.20 in Gold and \$2.72 in Silver to the ton of 2000 lbs. assays made, at the Provincial Assay Office, Belleville, Ont., Can. Assays completed by Dr. J. S. Island, 399 Parliament-street, Toronto, of samples of ore, from the 87-feet level to the 100 feet level, the bottom of the shaft, "assayed for Gold only," are as follows: Ore No. 1, \$6091.21; Ore No. 2, \$4120.12; Ore No. 3, \$527 to the ton of 2000 lbs. Quoting him, he states four check assays were made of the above samples, and the results, as shown above, are there fore absolutely correct. Dated Toronto, Feb. 13th, 1907.

With this showing, it is very reasonable to average the ore at \$200 per ton, less than half the above average. Then, without doing any more sinks 2nd of May, the anniversary of the en- ing, but confining our efforts to the taking out of the ore in sight, note the results:

	Length of vein 4000 feet.
	Width of vein 6 feet
	Depth of shaft 100 feet
	Giving total ore in sight
	Allowing 12 cu. feet of ore to the ton, 200,000 tons, on a basis of story
