MONTREAL LIVE STOCK.

Montreal, July 20.—There were about 450 head of butchers' cattle and 225 caives and 450 sheep and lambs offered for sale at the East End Abattoir to-day. Despite the rain, the butchers came out in considerable numbers, and the prices of cattle were about the same as on Thursday, while lambs and calves brought rather better prices than on that day. The best butchers' cattle sold at from 2½c to 3½c do: by while the ordinary and inferoor beasts sold at from 2c to 2½c per lb. Mr. Bourassa bought five calves, paying from \$5 to \$6 for them; other calves were sold at from \$1.50 to \$5 each. Shippers were paying 3c per lb. here to-day for good large sheep, but they paid 3½c per lb. for some good lots at the yards. Lambs sold from \$1.50 to \$5.50 each. A lot of 12 lambs were sold at for \$22. There were very few fat hogs on the market to-day, and they sold at from 3½c to 4c per lb.

BOWLS

McIntyre & Wardwe'l (John J. Dixon) received the following despatch from their branch office in Chicago:

Statistics on wheat to-day were in fayor of the buils, but a pancky and demoralized stock market and further engagements of gold to the extent of nearly \$3,000,000 had more influence than anything else, and the market lost half a cent, with steady feeling at the c.osc. World's shipments, 5,520,000 bush, a decrease in the amount affoat of nearly 1,500,000 bushels, and an increase in English visible of 135,000 bush, while visible in this country decreased 477,000 bu, against about 700,000 bush last year. Most encouraging feature was strength of primary winter wheat market, Toledo and St. Louis being very firm, and winter wheat in this market showing no decline. Stock wheat in store in Chicago is now 13,591,000 bush, being an increase of 129,000 over last week. There was some cash inquiry here, but a small business resulted. Outside trade does not increase, and we must evidently depend on export demand. Primary recepts wheat 709,700 bush, against 378,000 same day last year. We still believe in wheat, and think the situation in this country will warrant higher prices.

Corn and Oats—The market for the former opened quiet and weak at %c decline, and sold off an additional ¼c, with country free sellers. At the decline thege was good cash trade. The out market opened easy, in sympathy with corn, but railled %c. News from country still of discourag-

\*\*\*\*\*\*\*\*\*\*\*\* CALIFORNIA" MINERAL

TRAIL CREEK GOLD MINING DISTRICT OF

COLUMBIA

.. OFFICERS ...

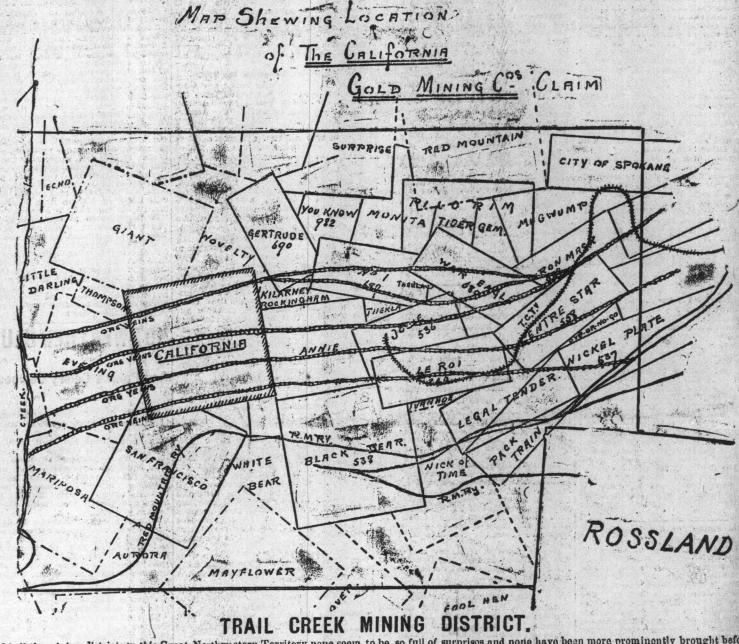

President Vice-President Secretary and Treasurer

- TRUSTEES

JAY P. GRAVES W. A. McDONALD, Spokane, Wash,

The management of the delevopment work is conservative and under an able and experienced Mining Engineer. This company has been formed for the purpose of opening up and developing the California Claim.

The owners, after doing considerable work, and demonstrating to their own satisfaction that they had a very valuable property, and that with further development they could make a shipping mine, incorporated the California Gold Mining Company, and now offer a limited number of their shares for sale for development purposes, purchasing machinery, etc.

Of all the mining districts in this Great Northwestern Territory none seem to be so full of surprises and none have been more prominently brought before the country as a whole than TRAIL CREEK.

Less than two years ago a mere tract of prospects. To-day the acknowledged richest gold camp in the world. The substantial basis upon which the present producing mines are working and their output after so comparatively a small amount of development, is an evidence of the permanency of the great ORE BODIES

in the camp.

The district has been one of mineral surprises. The character of ore changes with depth and in every case INCREASES in value. In some instances ledge of silver and lead have been uncovered, while free milling quartz is not a rarety. Iron and copper predominate on the surface. A conservative estimate of the ore will probably run from \$30.00 to \$50.00 per ton (although much will excess \$100.00) an average of \$10.00 per ton can be relied upon, which will amount to \$16,000.00 per day.

## Producing and Dividend Paying Mines.

LE ROI.

The most interesting, as well as the most wonderful, of the many valuable properties in the Trail Creek district is the Le Roi. The claim runs easterly and westerly across what is known as the famous Red Mountain. This property was originally an unchased for \$35,000, and has since been sold to a London syndicate for \$5,000,000. The company was incorporated under the laws of the State of Washington, U.S.A., by American citizens, and stock was floated on a basis of ton cents per share, capital stock being 500,000 shares, par value being \$5 per share. A portion of the stock was sold at ten cents per share, and during the depression of 1803-94 stock dropped to six cents per share. Later divelopments proved to be very rich, and in March, 1845, the stock was floated at \$1 cents, and in July, 1895, sales were made at \$1 per share; this stock is now held at \$10 a share. This property has paid dividends since January, 1896, of \$175,000, being five cents a share per mouth; one month paying \$50,000.

The latest improved machinery has been placed upon this property at a total expense of \$49,000, and it is the sincere belief of the management that they will be able to pay \$100,000 per month in dividends when in full operation.

The War Eagle lies almost correring on the Le Roi and running in a south-easterly and north-westerly direction. This property was purchased by American citizens in October, 1894, for \$38,500, and was incorporated for 500,000 shores par value of \$1 per share. No stock was sold at that time.

In February, 1895, the property paid a dividend of \$35,000, and offerings of \$1 a share were made, but none could be obtained. In May, 1895, a further dividend of \$50,000 was paid; since then a total dividend of \$178,500 has been paid, and in addition they have placed the latest improved mining machinery at a cost exceeding \$50,000.

This property was purchased by a London syndicate for \$1,000,000, and one-fifth of the shares of the new company to be organized, with a capital of £500,000, in London Syndicate for \$1,000,000, and one-fifth of the shares of the new company to be organized, with a capital of £500,000, in London Syndicate for \$1,000,000, and one-fifth of the shares of the new company to be organized.

The Josie lies in a north-easterly and south-westerly direction, between Le Roi and War Eagle mines. This property has a capital of 700,000 shares at par value of \$1 per share. This stock was sold in November, 1805, at fifteen cents per share; in Fobruary, 1896, it had reached thirty cents per share, and is now quoted on the market at sixty cents per share, and the management has refused \$1 a shere for the centrolling stock.

They have recently placed the latest improved machinery upon this property, and the same has been operated for the last fifteen days. It is confidently expected by the management that they will be able to pay dividends in September, 1896, of at least five cents per share, and that amount or more thereafter per month. IRON MASK.

The Iron Mask lies on the same lead as the Josie and in a south-westerly and north-easterly direction, and immediately sast of and adjoining the War Ragle.

This property has been recently sold to a London syndicate for \$500,000 in cash and one-fifth of the shares in the new company to be organized in London, Eng., capital 2500,000 in cash and one-fifth of the shares in the new company to be organized in London, Eng., capital 2500,000 in cash and one-fifth of the shares in the new company to be organized in London, Eng., capital 2500,000 in cash and one-fifth of the shares in the new company to be organized in London, Eng., capital 2500,000 in cash and one-fifth of the shares in the new company to be organized in London, Eng., capital 2500,000 in cash and one-fifth of the shares in the new company to be organized in London, Eng., capital 2500,000 in cash and one-fifth of the shares in the new company to be organized in London, Eng., capital 2500,000 in cash and one-fifth of the shares in the new company to be organized in London, Eng., capital 2500,000 in cash and one-fifth of the shares in the new company to be organized in London, Eng., capital 2500,000 in cash and one-fifth of the shares in the new company to be organized in London, Eng., capital 2500,000 in cash and one-fifth of the shares in the new company to be organized in London, Eng., capital 2500,000 in cash and one-fifth of the shares in the new company to be organized in London, Eng., capital 2500,000 in cash and one-fifth of the shares in the new company to be organized in London, Eng., capital 2500,000 in cash and one-fifth of the shares in the new company to be organized in London, and the new company to be organized in London in the new cash and the new cash and the new company to be organized in London in the new cash and the CENTRE STAR.

The Centre Star lies almost parallel to the Iron Mask and adjoining the Le Roi on the east and War Ergle on the south-east. The company has recently placed a large amount of machinery upon this property and has sufficient ore in the dump to enable them to pay a divident in August next. It may be said they have recently refused \$1,500,000 for this

THE CALIFORNIA CLAIM.

THE PROPERTY OF THE CALIFORNIA GOLD MINING COMPANY.

This claim is 1,500 feet square, being the first location under the new law upon the Red Mountain, having a total area of about 52 acres; the old law, under which the locations of Le Roi, Josie, Iron Mask and War Eagle were made, being 600 by 1,500, or an area of about 1,260 feet distant. It has been demonstrated beyond question that the veins passing through the Le Roi, Centre Star. Josie, Iron Mask and War Eagle also pass through the California claim. The California being about the width of the Le Roi, Josie and War Eagle combined takes in the parallel veins from these different mines. (See map herewith accompanying.)

The veins running across these properties are distinct, and English Mining Engineers reporting on the country state that the veins run the same as those passing through these developed mines. Any single one of these veins would make a very rich mine, and equal to any of the above-mentioned mines, and it is reasonable to presume that at a very great depth these veins may become one.

The veins running across these properties are distinct, and sheets reporting on the country state and it is reasonable to presume that at a very great developed mines. Any single one of these veins would make a very rich mine, and equal to any of the above mentioned mines, and it is reasonable to presume that at a very great development may become one.

It is admitted by all mining men that the showing of the California is one of the best upon the Red Mountain. The property has been surveyed and the crown grant has issued, so the title is perfect.

The development work consists of numerous open cuts and prospect holes upon the numerous veins passing through the property, and one of a tunnel of some 25 feet running spontine in the main lead. This will be the point where the main workings will be done.

The assays of this property have been very good for surface findings, which have been from \$2 to \$40 in gold and it may safely be sail will average \$20 per ten.

The ore from the surface of all these mines has been low grade and increases as depth is reached, and a selected car was shipped from the Le Roi Mine which averaged \$70 per ton at a depth of 500 feet. It is reasonable to suppose that the ore on the California veins will inbrease in value as depth is reached, equal to or greater than the mines are mentioned. The claim will be developed by tunnel at a depth of 200 feet, after that it will be worked by shaft

TRANSPORTATION. The matter of cheap transportation is solved here easily. The Red Mountain Railway under process of construction is surveyed across this property, and this road will be completed by September 1st. The narrow gauge railway running from Trail smelter to the Josie mine is now in operation and is but 1,200 feet from the California claim and will be attended to this property as soon as required.

It is the intention of the management to push development on the claim as rapidly as possible, and it is expected that machinery will be placed upon the property not later than September 1st; prior to that development will be by band drill.

The Company is organized under the laws of the State of Washington, and is registered under the Foreign Corporation Act of British Columbia, thereby entitling it to do business or Canada.
