Asked if the Boer was really as fine a shot as represented, Mr. Nugent said it was wonderful what the old Boer could do with his Westley Richard and Martini-Henry rife up to 100 yards. On his marksmanship had depended his dinner, and there was no target like one of deer or leopard or llon. The big game was, however, being shot out in the Transvall, and the younger Boer was away behind his father.

Put Through the Electrical Power Bylaw

Hamilton, Nov. 2.—(Special.)—The Board of Works to-night, under Chairman Doran, put through the revised bylaw of the Hamilton Electrical Power Company. The charter runs until 1918. The company is aiready at work on McNar-street, with some 28 motors, and is supplying scores of lights around the market.

A committee will report at the next meeting of the board whether it is possible to place the Vine-street sneiter with the hackmen on King-street east.

Barrister Martin Malone made another onslaught upon City Solicitor Mackeican at the Court of Revision this afternoon by asking that the Solicitor's taxation peralsed to the amount of his new salary. The court refused. All the big cases, where some million of dollars is at stake, have been laid over until next week.

City Engineer Barrow will be asked for a written report re the claims or the Kramer-Irwin Company for extras. The company insists on \$5000, while a city committee thinks \$1500 enough. Some aldermen to-day wanted the matter to be referred to an arbitrator, and there was immediately a hue and cry arter a job of at least \$10 a day.

Archibald Stewart was acquitted by Judge Snider with a lecture to-day on the charge of stealing half a chest of tea from a T., H. & B. car on Oct. 19. County Crown Attorney Crerar prosecuted, Stuart Livingston, for the defence, argued that Stewart was carrying the tea to No. 3 Police Station when arrested. The case has caused a good deal of interest in town.

The will of the late Alan Macdougan, civil engineer, of Toronto, who died at Morton Crescent, South Devon, England, has been filed for probate. The widow, Emily Augusta Macdougall, is appointed sole executrix of the estate, of which the sum total is not mentioned in the inventiory. There is \$9400 in bank stock, besides life insurance, amount not stated. The whole estate goes to the widow, to be afterwards divided among the children—Alan Donald Kenneth, Alan Coursolles and Edith Muriel. A clause directs the widow to sell the books and instruments, the deceased not wishing either or his sons to follow his profession.

Burglars still at Work.

Early yesterday morning burglars entered the residence of Geo. Kennedy, LL.D., 147 Bloor-street west, and went Trough the rooms in which the occupants were sleeping. They ransacked the house very thoroughly and stole \$2.50 in cash and some car tickets from Mr. Kennedy's clothes. They also took a gold medal that Mr. Kennedy won at Varsity in 1857, a gold-bar pin belonging to Mrs. Kennedy and a suit of underwear. The burglars secured admittance by prying open a back window with a jimmy.

Before completing an enumeration of the facts bearing on the question at Issue, it might, for comparative purposes, be well to recorrect the details concerning the Burnsach Hospital, which virtually occupies the position of a public maternity house. In this institution there have been 550 commements since Nov. 11, 1893, and all without the death of a mother. Since Jan. 1, 1897, until Sept. 30 last, 130 women were received, of whom only 38 were married. It thus appears proportion of llegitinate endidren born during that period equals 71.5 per cent. A large number of these children find their way into inestitutions or homes in the city. I feel confident it would be next to useless to incur any expense in the carrying out of the act. unless the mothers have come to the city to conceal their shame and to get rid, of their offspring, and, as far as I can see, there is nothing in the act to prevent their for a lengthened period would simply result in the transference of the offspring so.

Here and there a child finds a legitimate and respectable home of adoption, but the greater number of those not taken by institutions are sent to bany farms, or places infinitely worse, where they remain until death or the Children's Aid Society take possession of them.

"The first question to be definitely settled before passing the proposed bylaw is that relating to the arrangements which the legal firm of Brace, Burton and Bruce, accompanied by his wife, leaves to spend the coming winter and early spring mouths, h.s medical attendant having advised a change of air. It is understood that Mr. Lovering's intention is, during his absence, to combine the pursuit of health with attention to the interests of Canadians who have large investments in the Silver State.

Mistake to Pass a Bylaw.

"I feel confident it would be a mistake to pass a bylaw declaring the act to be in force in the municipality of the City of Toronto, until such time as these matters are definitely settled. It will, I think, be evident to you that the question is one which requires immediate action, and in the event of such arrangements being made as I have suggested, provision would be necessary for the inspection of these houses bi-weekly by the department. An inspector qualified for this work would require to have some medical knowledge, and also be able to understand and estimate the conditions and circumstances bearing upon the whole question."

"A legislative attempt to force sucn parents to maintain and rear their children for a lengthened period would simply result in the transference of the offspring to some place outside of the municipality or to someone who in a short time would permit it to find its way into one of our charitable institutions or into houses within in the city, which sooner or later would be reported to the officers of the Children. The care of such children would thus ultimately fall upon the society. From the facts above stated, it is apparent that the principal profit from these houses of accouchement is in the adoption of the children, and it is fair to assume that this mode of disposal is carried out at the lowest possible cost, a circumstance which would militate against the future care and welfare of such children, and doubtless greatly tend to increase the mortality of the class.

"Probably upwards of 500 children per annum are in some way arranged for, and, as far as I can judge, one-third of them find their way into certain public institutions in the neighborhood of Ottawa and Montreal, which, I believe, afford accommodation for the children of unidentitied parents. Referring to the result of the use of these pills, Mr. Sarchet says, "I can tell you that the pains in my back while sitting at work, made it almost impossible for me to keep on. I took a great many remedies, but they did me little or no good.

"When I started taking Doan's Kidney Pills I had but little faith in them. Now I have the greatest faith in them, because I believe them to be the greatest specific in existence for all kidney and back troubles.
