Weekly Crop Summary. Weekly Crop Summary.

Washington, June 28.—While the general condition is somewhat less promising than previously indicated, the out look continues encouraging in spring wheat region east of the Rockies. The least favorable reports being received from Iowa. In portions of the Dakotas the crop is weedy, but in these states and in Minnesota it has made good growth and the early sown is beginning to head. On the North Pacific Coast the prospects for spring wheat have been materially lessened by dry, cool weather and recent frosts.

terially lessened by dry, cool weather and recent frosts.

The progress of the wheat harvest in Kansas and Missouri has been interrupted by tens, but this work has proceeded without interference eastward of the Mississipil River, and is now in progress as far north as the southern part of Illinois and Indiana and in Virginia and Maryland. Some lodging and rust reported from Nebraska and Missouri, and dry weather has hastened materially in Michigan, but elsewhere the crop has advanced favorably, well filled heads being generally reported. In California harvesting continues with light yields in most sections. In Oregon and Washington heads are filling nicely.
