These penny-wise and pound-foolish aldermen are said to be ing its business that it was already listening to the pleas of some poorly too busy would be regarded as unproto put out a dollar to save five, but would not be an unheard of innova-

membered that he wrote to the war office in England and received a most cordial reply to his proposal to train five or ten men a month for service with the Royal Flying Corps. Such aid would be of material assistance was the view of the war office.

The letter which we print elsewhere from the military secretary of his excellency states that H. R. H. the Governor-General "endorses the war of-

fice letter to the effect that if you train five to ten candidates per month for the Royal Flying Corps, who are under thirty years of age, medically qualified, of proved British birth, and obtain a flying pilot's certificate, they will be accepted for enlistment in the Royal Flying Corps during the war."

This is capital as far as it goes. It is true that his excellency limits his endorsement to the proposal made, and leaves it to be understood that the Canadian Government does not contemplate doing anything in this line. The government, however, is susceptible to the opinions of the people, and it may be that a little discussion and a proper presentation of the facts would lead even the government to change its views. It is generally understood that it is Sir Sam Hughes

who is the blocker in the matter of acroplaning. The present acting-minister must have some views of his own, and it would be a good idea if those who are interested in aviation would get together and ascertain what the acting-minister of militia thinks on the question. He may refuse to consider the matter, but it would do no

harm to have the ventilation which such action would secure. As to the pressing need for aviators

there is no question at all. The mystery is that the Canadian Government, having all the evidence before it as Today's council meeting will mark to this need, and of the efficacy of the back from this progressive step, simply shown that Canadian aviators, trained

However, there can be satisfaction de-rived in knowing when one is afflicted with "selfitis;" because it gives a per-son a chance to conceal the sad fact. The reason why few people discover their delinquency is explained by the big risk that exists as a rule, in enlightening them.

I hadn't imagined that I was in possession of an overgrown ego until the cigaret incident, when I found it to be true thru the clumsy, but well-meant, meanderings of the analyst. The details
