TO EXPLORE IN THE FAR NORTH

Professor McMillan To Sail From Sydney

START NEXT JULY

Object is to Hunt For Land Which Peary Said He Saw in 1906 And Called Crocker Land-Return in 1915

(Sydney Post.)
Professor McMillan, who became famous in connection with Peary's expedition to

Professor McMillan, who became famous m connection with Peary's expedition to the North Pole, is expected to arrive in the city soon to complete arrangements for the Crockerland, expedition which is to leave here in July of this year.

As at first planned, this expedition to the far north was to have left Sydney on July 20, 1912, under joint command of Professor Borup and Professor McMillan, but owing to the former's tragic death by drowning it was necessary to postpone the trip for a year. Up to last fall, when Professor McMillan was in this city returning from an exploration trip to northern Labrador, he had been unable to find anyone to take the place of his deceased partner, bnut it is understood, a prominent explorer scientist will accompany him whose name is not yet learned.

While here last summer Professor McMillan, gave a very interesting interview to the Post on this expedition, explaining its purpose, etc. "The expedition," escientists in all, and leaving here in 1913, in the Diana," a sealer chartered from Job Bros, of St. John's, Nfid.

"Our party will include a geologist, a zoologist, and a hydrographer; about five scientists in all, and leaving here in 1913, will remain in the north till 1915 when second back again to the south and civil ization. The Diana' which is a very little amaller than Peary's 'Roosevelt,' will come south and return for us in two years time.

"The object of the expedition," contained to the city of the city of the project of the expedition, contained the board of colucation was disposed to do something along this line, but the present facilities at the normal school were not such as would permit of the granting of the request.

The secretary's report for February and March showed 634 applications. Of these scientists in all, and leaving here in 1913, will remain in the Party's Roosevelt, will come south and return for us in two years and eighteen maids. Twenty-nine were from out of town. There were 41 applications are from the civic authorities and the Board of Trade to se

A Cause of Much Loss in Cattle Raising
Unfortunately for Canadian cattle raisers many calves are lost each year through the accident of premature birth. While no doubt many of these losses are due to injuries, a much greater number are caused by contagious abortion. When this disease obtains a foot hold in a herd the consequences are apt to be serious as it is readily transferred from animal to animal, making it almost impossible under usual farm conditions to raise calves for perhaps a series of years.

For the information of cattle raisers the Veterinary Director General has issued a reprint of a leaflet of the British Board of Agriculture and Fisheries on this disease, which is being made the subject of very careful study and experiment in the Old Country.

This reprint which constitutes a brief pamphlet of less than four pages, deals with the subject under the following heads:—Animals affected, The Microbe, Virulent Material and Method of Infection, Symptoms and Prevention.

It is written in plain language and contains information of great value to all cattle raisers and persons who are studying the disease. It is printed for free distribution to those who apply for it, but it is not sent out to the regular mailing list of the Publications Branch of the Depart A Cause of Much Loss in Cattle Raising

L. O. B. A. TEA AND SALE. L. O. B. A. TEA AND SALE.

A successful tea and sale was held last night in Orange Hal lin Simonds street. It was liberally patronized and the ladies in charge feel highly gratified with the success attained. The affair was conducted by the members of Dominion L. O. B. A., No. 18. The sale will be continued this evening. Supper was served from six to eight o'clock, after which the various booths were thrown open under the charge of the ladies of the committee. The hall was nicely decorated and the booths looked very attractive.

MORE DANGEROUS HAT DECORATIONS UNDER BAN

Berlin, April 10—Following the prohibi-tion of the long hatpins formerly worn by the women in their bonents, the police are about to open a campaign against project-ing feathers and trimmings when they are stiffened with wire or otherwise. Men have made complaints against these propecting ornaments, and recently the eye of a strap-hanger in a car was seriously injured by a wired feather. The prohibition has not yet been introduced, but it is understood that it is impending.

The women are indignant over the matter, and talk of resisting the proposed

together with five or six Eakimo dog drivers and their charges, in Crockerland, will will be come south and return for us in two years time.

"The object of the expedition," continued the explorer, "is to endeavor, it is to endeavor, to rediscover so to speak a land in the polar sea, which Peary claimed to have seen in 1906, on two different occasions, and to which he gave the name that it now holds. Crocker Land, It is to verify this discovery that we intend going north, for of course you know that no new body of land is accepted by scientists until its of course you know that no new body of land is accepted by scientists until its of course you know that no new body of land is accepted by scientists until the course of the mask-ox, caribou, for and large time of the mask-ox, caribou, for and Arctic hare.

"The solution of the rapid trainet service problem has been made possible by the mask and you can fortelly half a million square miles of the growth has there are fully half a million square miles of the growth has the expendition will be consumed in penetrating to the center of Greenland. No man has really experience of this, "The second year of the expedition will be consumed in penetrating to the center of Greenland. No man has really account of Greenland, and man has really accounted by the consumed in penetrating to the center of Greenland, and have seen only and pears the north, but the other positions of that continent in itself, are still unknown, In the spring of 1915 we will apply the consumed in penetrating to the center of Greenland, and endeavor to reach several of the high points, some of which are said to extend 12,000 feet skywards. Peary himself reached and in the point of reached provided the consumed of the penetrating to the center of Greenland, and endeavor to reach several of the high points, some of which are said to extend 12,000 feet skywards. Peary himself reached and the provided a

Corns Ended Forever

Then forget the corn. In two days take off the plaster and lift out the corn.

This is the only scientific way to terminate a corn.

It is so efficient that folks now use it on a million corns a month.

It is gentle and easy and comfortable. And Blue-jay does what nothing else will do. Try it on one corn.

A in the picture is the soft B & B wax. It loosens the corn.
B stops the pain and keeps the wax from spreading.
C wraps around the toe. It is narrowed to be comfortable.
D is rubber adhesive to fasten the plaster on.

Blue-jay Corn Plasters

Sold by Druggists — 15c and 25c per package Sample Mailed Free. Also Blue-jay Bunion Plasters. (285) Bauer & Black, Chicago & New York, Makers of Surgical Dressings, etc

KING GEORGE NAVY PLUG CHEWING TOBACCO

IS IN A CLASS BY ITSELF! It surpasses all others in quality and flavour because the process by which it is made differs from others.—It is deliciously sweet and non-irritating.
