Line for  
...  
...  
...  
...  
...

Draw a square & Tagon from its centre  
 and the centre of the square by drawing lines from  
 each angle - the point where they cut being the  
 centre -  
 Draw a circle within the square so on this centre -  
 the vertex of the top & bottom lines touch  
 the circle -  
 The extremities of the lines drawn as above  
 being they touch the circle
