THE LABOR WORLD. The cigarmakers appear to be the most consistent of all trades unionists. They demand the label on every obtainable article. The baseball nine recently ordered suits, with the proviso, "They must have the union label on."

Some educationists and many interested in education view with apparent alarm the resignation tendered by James L. Hughes, Public School Inspector. Mr. Hughes is unquestionably a very capable man for the position and this in itself should suggest the idea that the system of which he was in charge for a quarter of a century must have associated with it some other man equally competent—or that the inspector is a Moses of educational Messiah.

From 800 to 1,000 Chinese are engaged in the laundry business in British Columbia, and they have practically entire control of this class of work. Victoria is the only city in British Columbia in which Chinese are engaged in cigarmaking, and the cigars manufactured there are said to be chiefly for consumption by Chinese.

Every twelve months sees 2,500 new boot and shoe retail firms in this big nation of ours. There are at present about 55,000 retail shoe dealers. The shoe manufacturers of Canada are feeling the effects of American competition and have petitioned the Government for an increase of 25 to 35 per cent. tariff.

There are six shoe factories in Indiana giving employment to 610 factory hands, with an average yearly wage of only \$248. It takes something besides low wages to make a shoe factory successful.

The labor commissioners of Ohio have appointed sister Mollie Weitzer, a shoe worker of Cincinnati, as a special deputy to investigate child labor in that state. She is said to be a terror to the anarchists violating the child labor law.

One-fourth of the leather manufactured in this nation is made from imported hides, upon which the Dingley tariff imposes a tax of 15 per cent. Five years ago we imported this year—\$250,000. Labor Government says:

Advertisement for 'The Reform Candidate' featuring a portrait of Mr. L. V. McBRADY and text: 'INSIST UPON BEING SUPPLIED WITH BEAVER STANDARD BRAND CHARCOAL. Made by Canadian workmen in Canada from Canadian Hardwood and sacked in Canadian made paper sacks. Unequaled for lighting fires. Summer fires. Boiling, Frying and Toasting. Manufactured only by THE STANDARD CHEMICAL CO OF TORONTO, LIMITED. U. C. HAMILTON, Supt. Every Grocer will keep BEAVER BRAND if you insist.'

SHOE NOTES. (From Boot and Shoe Workers' Official Journal.) A new shoe factory is to be built at Mount Holly, N. J. This country imported nearly 100,000,000 goat skins last year. The Chinese are wearing a few rubber shoes. This nation exported 1,634 pairs last year. One large department store in Brooklyn sells \$100,000 worth of Union Stamped shoes annually. The British Government has just ordered 300,000 pairs of shoes from Switzerland for her army. A considerable demand for American shoes is reported from the fashionable trade districts of Paris. A new pulling-machine is now being introduced into the factories. It is said to do the work of five men.

The duty on shoes imported into France is 3 francs (60 cents) per pair regardless of quality or the value of the shoes. Holland has established a school for shoemaking. The school will be located at Waalwijk, the shoe centre of Holland. Westward the course of empire takes to manufacturing shoes. The latest is a \$300,000 shoe factory at Yankton, S. D. This country imports each year 140,000,000 pounds of foreign hides valued at \$17,000,000. The tariff on these goods is 15 per cent. The last-makers of Brockton and Haverhill are now organized, and it is proposed to organize other towns and then form a national union.

Manchester, N. H., is becoming a shoe centre. A new factory 400 by 100, and five stories high, is already built, and machinery is now being put in. The factory will start with 200 hands. It is used to be said that a factory could not exist in a mill town, Manchester has proved this to be false. The state of Wisconsin has eight more shoe factories than she had in 1890, but the capital invested is \$147,980 less. The shoe workers increased from 2,039 in 1890 to 2,507 in 1900. The total wages paid in 1900 was \$821,408, or an average of \$326.84 per year. Pretty low, eh? Better organize.

The recent census reported 1,153 shoe workers in the State of Virginia, with annual wages of \$206,119, an average of 59 cents per day! This low wage is accounted for from the fact that most of these hands are convicts in the State Prison at Richmond, where the State receives 41 cents per day for their labor. The writer has seen the workers in a New Hampshire shoe town walking the streets for weeks from the fact that this Richmond prison factory was able to undersell the product of free labor. The Union Stamp is the little joker that will solve this problem for us.

WHY UNEMPLOYED. If the artificial barriers to the use of land were removed the unemployed difficulty would dissolve like the fabric of a vision. Henry George puts a striking suppositious case in this connection. He says: "Let us suppose an imaginary world and its inhabitants so constructed that men could support themselves in air, and could from the material of the air produce by their labor what they needed for nourishment and use. We will suppose labor to be as necessary as with us, human desires to be, as boundless as with us, the cumulative power of labor to give capital as much advantage as with us, and the division of labor to have gone as far as with us—the only difference being (the idea of claiming the air as private property not having been thought of) that no human creature would be compelled to make terms with another in order to get a resting-place, and to obtain access to the material and forces without which labor cannot produce. In such a state of things, no matter how intricate had become the division of labor, no matter how great had become the accumulation of capital, or how far labor-saving inventions had been carried, there could never be anything that seemed like an excess of the supply of labor over the demand for labor; there could never be any difficulty in finding employment; and the spectacle of willing men, having in their own brains and muscles the power of supplying the needs of themselves and their families, yet compelled to beg for work or for alms could never be witnessed. It being in the power of everyone to labor to apply his labor directly to the satisfaction of his needs without asking leave of anyone else, that cut-throat competition, in which men who must find employment or starve are forced to bid against each other, could never arise. Under such conditions capital could not repress labor. At present, in any dispute between capital and labor, capital enjoys the enormous advantage of being better able to wait. Capital wastes when not employed; but labor starves! Where, however, labor could always employ itself the disadvantage in any conflict would be on the side of capital, while the surplus of unemployed labor, which now enables capital to make such advantageous bargains with labor, would not exist."—The Herald, Adelaide, S. Australia.

After the creation of the world we are told that "God said 'let there be light' and there was light," but the gas and electric light companies insist on getting 15 per cent. on their wasted stock first and then furnish "light" that is often semi or total darkness.

France is increasing quite rapidly in her export shoe trade, while Portugal is losing her export trade. Seven years ago the latter country exported nearly half a million pairs of shoes to South America. Last year she exported only a few thousand pairs. The United States consumes one hundred million pounds of rubber, annually, and has \$120,000,000 invested in the industry, and the product is valued at \$100,000,000 yearly. This country produces 200,000 pairs of rubber boots and shoes daily. Congress has under consideration an eight-hour bill which requires all government contracts to employ their help only eight hours per day. Just how this will effect the shoes factories is an interesting question. Maybe Uncle Sam will have to start a shoe factory of his own.

Manchester, N. H., is becoming a shoe centre. A new factory 400 by 100, and five stories high, is already built, and machinery is now being put in. The factory will start with 200 hands. It is used to be said that a factory could not exist in a mill town, Manchester has proved this to be false. The state of Wisconsin has eight more shoe factories than she had in 1890, but the capital invested is \$147,980 less. The shoe workers increased from 2,039 in 1890 to 2,507 in 1900. The total wages paid in 1900 was \$821,408, or an average of \$326.84 per year. Pretty low, eh? Better organize.
