THE GROWTH OF TRADE OF CANADA

A STEADY INCREASE DURING RECENT YEARS

Figures From the Statistical Year Book Which Show the Prosperity of the Dominion.

Special Correspondence of the Times.) Ottawa, Sept. 1.-In a former letter the growth of Canada's population and s effect in bringing into immediate or arly cultivation large areas of land, was onsidered, and in this article it is proloced to consider, in a superficial degree only, the growth of the volume of trade. No figures show the great and growing prosperity of Canada so clearly as do hase recording the increase of her trade, specially those of more recent years. WEALTH.

Robust Health More Valuable Than a Gold Mine.

Everyone desires to be wealthy. What is wealth? A hoard of gold or bank stocks? No, not by any means. A Croesus, facing death, would freely give all for health. A healthy, strong man or woman is wealthy. Analyse this and see. To be healthy, all the functions of the body must work well. The bowels must move daily, the kidneys must accompany to the strong must move daily. must move daily, the kidneys must act regularly and the skin must do its work. Constipation brings headaches, back-aches, sallow or grey complexion, because the kidneys and skin have to do the work the kidneys and skin have to do the work of the bowels, which they cannot do, and the body is poisoned. Fruit acts on the bowels, kidneys and skin—it cures constipation, biliousness, liver and kidney disease—purifies the blood—and makes the complexion clear. To get the full benefit of ordinary fruit, you must take a lot of it. A physician in Ottawa has discovered a method of combining the juices of oranges, apples, prunes and figs and forcing into the united juices one more atom of bitter from the orange peels. This makes a stronger and more condensed fruit. This condensed, stronger fruit, with tonics stronger and more condensed fruit. This condensed, stronger fruit, with tonics added, is put up into tablets under the name of "Fruit-a-tives" or "Fruit Liver Tablets." For those travelling, "Fruit-a-tives" are invaluable, protecting the system against changes of climate, diet and water. The sale of these tablets all over Canada is simply enormous. Use them and become healthy which means wealthy. At druggists, soe, a how or

There is no possible doubt in the minds of the legal gentlemen who discuss the case that this imprisonment is entirely

Mr. Honore Gervais, K. C., M. P. professor of international law at Laval possible that the continued detention is due to the ignorance of the men themselves that they have to ask for their relense. The rule of all nations is that prisoners of war must be kept in com-

\$1,395,989.755, being an excess of imports over exports of \$464,099,874; whilst in the eight years 1897 to 1904, the imports were \$1,482,584,411, settlers effects being again deducted, and the exports over imports over imports over imports over imports over imports over states over imports \$1,500,303,441, being an excess of effects being again deducted, and the exports over imports of \$17,800,303.

Thus it will be seen that whilst the total trade for the period of sixteen years, less settlers effects, was \$3,202, 89,384, so great has been the prosperity of the country in the last eight years that the trade amounts to \$2,982,977,802 or within one-tenth of an equal amount. It is worthy of special notice that the trade and the set of the content of the visiting committee for August was received and adopted, and Mrs. Thorney and adopted, and Mrs. Thorney and adopted two orphans from the hond of the trade amounts to \$2,982,977,802 or within one-tenth of an equal amount. tion of these men, however, is that it is not justified under the code of international law which prevails in Russia. Even the Japanese on board the sealing vessel were not subject to arrest, while their ship might be subject to capture. The British view of the international law differs, at least in theory, from the continental view. Under the British inter-national code every citizen of a country with which England is at war is belli-gerent, whether he bears arms or not and, as an enemy, is subject to car and even to death. This theory, ever, as is remarked by Prof. Holland, of Harvard, lately, has grown obsolete. other hand, is based on the saving of

Jean Jacques Rousseau 'that stafes go to war but citizens do not.' Thus according to this code, and especially according to the interpretation published by that eminent Russian author, Fredhe was actually engaged in some way in furthering the war, either as a member of the army or in carrying contraband, or in some other capacity. Now under that doctrine, the Japanese sealers could not be held as prisoners and much

less could British subjects.
"I am therefore convinced that so soon as this case is brought to the attenun or the Russian authorities these men will be liberated and allowed to return to Canada."

That two sea faring Canadians have een languishing in a far off Russian mison is not a matter of surprise either from the point of view of their having come victims of Russian vindictive ness or turning up in such remote parts. A Pictonian who resides in Mon stated to-day that natives of that Nova Scotian county are known to be sailing the waters of practically every part of the globe It is considered prob

fable that in this instance the two men joined a vessel of the sealing fleet which annually sails from British Columbia for Behring Sea, and finally drifted into the employ of Japanese sealers who also prosecute that industry with considerable vigor in the northern waters.

Pictou county was once a great ship-building centre and the name Pictou became famous on account of the vessels which were constructed there and afterwards spread over the waters of the It was very natural that the young

nen of a maritime people should take kindly to the sea, and although steel steamer has almost driven out the old wooden ship, Picton men still take to the sea although probably not in as great numbers as of old.
