Wade of Royalton, who formerly and after marriage returned to British Columbia, where they resided, and would have continued had not death visited their peaceful home. After an illness of four weeks, with good nursing by loving friends, his wife passed away the triumph of faith. As soon as preparations could be made, the husband, with his dear wife and two children, aged three and one year, started on his sad mission to the land of their birth, where they arrived on the 26th inst., unaccompanied by any friend or relative, the father having the sole care of the two children on his long and sad journey. DORCHESTER, N. B., July 30.—The federal government is building an immense barn on the prison grounds to accommodate the stock and crops raised on the government farm. This work is being done entirely by convict labor, under careful supervision. The structure is 100 feet long and 40 feet wide, and consists of two stories. The basement will contain all the cattle, numbering on an average 140 head. The floors have been entirely concreted, with a perfect drainage. All the windows have been heavily grated, so that one officer in charge of the gang of convicts would find it necessary to simply guard the door. It is estimated that the great hay-mow has a capacity of about two hundred tons. One feature of particular interest in connection with the building is the immense silo, being constructed after the plan of a new up-to-date model. An immense amount of corn is being raised on the farm, and will be stored in the new silo. On the whole, the convicts are doing very well, and has no equal in the maritime provinces.

The officers and guards of the Maritime Penitentiary have been supplied with a new uniform. It is of a light material and is of the celebrated khaki color.

A. A. Steeves and Rev. S. H. Thomas of this town will go to St. Stephen's to act as representatives of the O. F. to the High Court, which meets in that city.

Farmers are now in full swing in their hay-making. The crop is without doubt an average one. Old meadows are thin, and in a number of cases the crop on the marshes is light owing to the damage occasioned by the high tide in the spring.

New potatoes are in the market, but the demand is light owing to an abundance of old potatoes.

Work in the pits of the Intercolonial Copper Mines has been suspended. The reduction works are using the ore from the yards. The works are being operated night and day, and seven days in four weeks.
