HEAVY BUSINESS ON NEW YORK STOCK MARKET

Advances of One to Five Points Registered During the Forenoon, Chiefly Among Steels and Affiliated Equipments.

New York, May 15.—The most distinctive feature of today's stock market was the perceptible diminution of business and the variety of issues dealt in. Transactions again ran well over one million shares, but failed, by a liberal margin, to approach yesterday's total which marked the year's high record.

Advances of one to five points were registered during the forenoon, chiefly among steels and affiliated equipments, but the tone became hesitant later, gains in one quarter being neutralized by declines elsewhere, especially among oils and motors.

Several significant developments combined to restrain bullish ardor, through the money situation and further demoralization in the foreign exchange market. Particular instances recording another sharp decline.

United States made a further moderate gain at its best, but this was reversed later, the stock losing one point. Other steels and equipments, notably Lackawanna and Gulf State steels, Virginia Iron, Pullman, General Electric, Air Brake and Baldwin Locomotive showed extreme advances of 6 to 8 points, but there were material shadows at the end.

Local utilities mainly tractions, denoted the final transactions. Brooklyn Transit and Interborough Consolidated, also gas shares gaining 2 to 6 1/2 points, with tobacco and sundry specialties, sales amounted to 1,500,000 shares.

TRACTION STOCKS TOOK A BOOM

Rubber and Tire Stocks Sagged, Their Decline Varying from Two to Three Points.

(McDougall and Cowans.)
New York, May 15.—Baldwin and the local traction stocks were the chief performers in the early afternoon while the larger part of the list took a rest. Rubber and tire stocks sagged, their declines varying from reactions to three or four points.

The movement in the railroads came to a pause. The volume of trading was much less than yesterday, perhaps because the possibility of some hardening in money rates in case such a degree of activity were to continue. The shifting of speculative commitments continued and the result was a spread disposition in the street to await a reaction in a state of mind which sometimes takes the place of a reaction itself.
