

Summer Complaint

Listerine is extensively employed in the treatment of various forms of DIARRHŒA occurring in children and adults. It is administered in doses of TEN DROPS TO A TEASPOONFUL, as an antidote and corrective to the fermentative and putrefactive changes taking place in the contents of the alimentary canal.

In combating serious illness, it is doubly important to be assured that the patient is supplied with genuine **Listerine**, as the substitutes sometimes offered by the trade are generally of undetermined antiseptic strength and too often worthless for the purpose for which they are required.

A PAMPHLET ENTITLED:

“**Summer Complaints of Infants and Children,**”

MAILED UPON REQUEST.

LAMBERT PHARMACAL CO., St. Louis, U. S. A.

Scott's Emulsion offers in a perfect combination the very principles of proper bone and flesh nourishment most needed by a young child. The action of the Emulsion is so mild that the most delicate stomach will accept and retain it. This makes Scott's Emulsion of particular value to weak children and very young babies who are in absolute need of a mild, yet effective food-medicine.

Samples Free.
