

DE LAVAL

CREAM SEPARATORS

**Less Work and More Money in the Dairy
for both the Farmer and his Good Wife**

The De Laval machines were the first of which the cream and butterfat were separated by the centrifugal force, which is especially applicable to the separation of cream from milk. For more than thirty years they have been successful in every part of every country of the world, where dairymen are located.

300,000 now in use

**They save work
Increase the product
Improve the quality**

They are made of the highest quality material and are especially adapted to the requirements of the dairy.

They are simple in construction and easy to operate, and they are made of the highest quality material.
