Gives Readers Advice-Also Tells of a Different Views of Naval Experts, as Simple Prescription to Liake a Home Made Mixture.

Now is the time when the doctor gets busy, and the patent medicine manufacturers reap the harvest, unless great care is taken to dress warmly and keep the feet dry. This is the advice of an old emineat authority, who says that Rheumatism and Kidney trouble weather is here, and also tells what to do in case of an attack.

Get from any good prescription pharmacy ene-half ounce Fluid Extract Dandetien, one cunce Compound Kargen, three cunces Compound Kargen, three cunces Compound Kargen, three cunces Compound Syrup Sarsaparlita. Mix by shaking in a bottle and take a teaspoonful after meats and at bedtime. Also drink plenty of water. You can't drink too much of it. Just try this simple home made mixture, and don't forget the water, at the first sign of Rheumatism, or if your back aches or you feel that the kidneys are not acting just right. This is said to be a splendid kidney tegulator, and almost certain remetly for all forms of Rheumatism, which is caused by uric acid in the blood, which the kidneys fall to filter out. Any one can easily prepare this at home and at small cost.

Almost any druggist in the smaller towas can supply the ingredients hamed, as they are commonly used in the prescription department.

#### PERIL AHEAD FOR ENGLAND.

Will Have .Trouble in Colonies and Egypt, Astrologers Predict.

It astrologers, especially those who foretell the happenings of a year before its birth, really believe their own predictions, they must have none but the gloomiest of cuttooks for the year 1908, and must, indeed, be miserable men.

Decrease in trade, increase in the price

of money, wars and rumors of wars, sedition and revolt, political ups and downs, earthquakes, international troubles, disease, and other troubles, are all predicted for the coming year. The price of wheat will be high, says an astrologer, and there will be a failure

of root crops.
"Sepherial," editor of the "Forecast. and a new weekly, "Futures," was ask-ed recently in London to calculate a

ed recently in London to calculate a special horoscope for the year, and some of the more interesting of the predictions are given below.

"The year 1908 is likely to prove one of the most fateful in the history of England. Three major planets, Neptune, Uranus, and Saturn, will hold cardinal signs and he accounting the cardinal signs, and be responsible for the development of great political crises. On the 3rd of January there will be a total eclipse of the sun in the sign of Capricorn. This falls close to the post and as Capricorn rules India, we may look for an outbreak of sedition and revolt in the peninsula.

"Uranus continues in the sign of Capricorn and in opposition to Neptune in Cancer during the next two years, the result being that New Zealand and British South Africa, India and Egypt will perhaps be the scenes of sedition

"The position of the Government wit be tremendously assailed and effectually undermined in the Spring of 1908. Joseph Chamberlain will effect some signal successes in July, and given a continuance of the present improvement in his health. I judge that he will be a most prominent figure in the adminis-tration of affairs. Saturn will then be stationary in the horoscope of the pre-

EARLY ANNOUNCEMENT OF BRITISH PROGRAMME

Expressed Through the Papers.

NAVAL EXPENDITURE.

MAVAL EXPENDITURE.

Moreover, Mr. W. T. Stead, in the Review of Reviews, and elsewhere, has already begun to prepare the peace party which he represents for a demand for a large increase of naval strength. His formula, two British battleships for every one laid down in Germany, is genrally believed to be a reflection of the views of Admiral Sir John Fisher.

While the Morning Post maintains that there should be ne relaxation of effort in the building of capital ships, the Standard condemns Dreadnoughts and asks for ten armored ships of smaller dimensions. The former paper represents the views of a small group of students of naval strategy, of which Vice-Admiral Sir Reginald Custance is the principal exponent. They have now apparently accepted the Dreadnought as the type for battleships of the future and are agitating for cruisers of about 4,000 tons displacement as a reply to the German ships of the Koenigsberg type.

FEWER GUNS IN SHIPS The Standard is also believed to be insuffed by an officer serving in the Chan-nel fleet, but the school of thought he represents contends that a greater hit-ting figure of merit per gun can be obtained by placing no greater number than four in one ship, and, arguing therefrom, he holds that instead of building six Dreadnough is it would be better to build ten smaller ships for the same money, leaving the balance of £2,000,000 to expend on improvements in war study and experiments tending to improve the terpedo and gunnery services of the fleet as well as to provide medium cruises. well as to provide medium cruisers and destroyers. He would arm his battleships with four 12-inch guns for fleet fighting and twelve 6-inch guns for defence against destroyers.

ADMIRALTY'S PROGRAMME.

Some further signs of the intention of the Admiralty have since appeared, and from these, in conjunction with the estimates of what the foreign powers are likely to turn out from their yards in an effective condition, it is possible to forecast the probable character of the British programmes which will be announced.

Dreadnought class of battleship, one of the Invincible class of cruising battle-ship, six Edgars, first-class armored ship, six Edgars, first-class armored cruisers; three Boadiceas, protected, speedy scouts, to work with destroyers; twelve destroyers of the Tribe class, six torpede boats of the Insect class and six submarines of the No. 6 type.

The programme for 1909-10 is six Dreadnoughts, two Boadiceas, three Swifts, twelve destroyers of the Tribe class, six submarines of the D type, Improved.

SECRETS OF THE UPPER AIR.

callooning Leads to Discoveries

Physical Conditions and Bird File Physical Conditions and Bird Flight.

The growth of ballooning has led to many curious investigations touching the atmosphere and its inhabitants. By the use of anchored ballons with self-registering instruments some of the experiments of deep sea sounding have been repeated aloft. At Strassburg sounding balloons have been sent to a height of nearly 26,000 yards, and 19,000 to 20,000 yards is not an uncommon height. One of the astonishing things said to have resulted is the discovery at a height of 14,000 yards of an isothermal zone in which, contrary to experience up to that height, temperature does not diminish with recession from the earth.

does not diminish with recession from the earth.

One of the most interesting studies is that of the flight of birds. The observation of aeronauts appears completely to dispel the old time notions that some birds soared to stupenduous heights, Humboldt having credited the condor with ever 7,000 yards, and others being that birds of bassage flew at he shis of 3,000 to 5,000 yards and in exceptional cases 10,000 to 12,000 yards. Balloon voyaging, however, establishes the fact that birds never rise to anything like these distances above the earth. Prof. J. Poeschel of Frankfort records as altogether unusual the passage of a balloon in which he was through a flock of birds at night at a height of 2,200 yards. The birds dashed against the basket of the balloon and generally acted as if they had lost their bearings.

ost their bearings.

Bird flight at the great elevations for Bird flight at the great elevations for-merly assumed is now regarded as phy-sically impossible. The rarefaction of the air is too great to permit of flight without terrible exhaustion, especially as breathing would be difficult. Be-sides, the cold is too extreme at a height of 10,000 yards, for instance, the thermometer or opping to 60 degrees below.

The observations of balloonists show that the vast majority of birds keep within 1,000 yards of the earth, and the vast majority of these indeed within a couple of hundred yards, even in long flights. Crows, however, were frequently observed at a height of 1,000 yards, a lark was anon greenly to 400 yards, a lark was once encountered at 1,900 yards, and an eagle is on record at 3,000 yards.

#### RINGWORM.

Stubborn Case Heated by Zam-Buk.

Stubborn Case Realed by Zam-Buk.

The most troublesome and obstinate of all scalp trouble is Ringworm.

Mrs. H. Girdlestone of 106 Rewdon St.,
Brantford, Ont., says: "My daughter had ringworm very bad, so bad that I was compelled to have her hair cut off. I obtained a preparation from the druggist to paint the sores, but instead of ouring, the Ringworm developed into gist to paint the sores, but instead of ouring, the Ringworm developed into nasty sores matterating and smelling badly. I saw Zam-Buk advertised in the newspaper and immediately sent for a box. After several applications I could see a great improvement, and as I kept up the Zam-Buk treatment daily the disease was soon checked. The masty sores were thoroughly cleaned and healed and all trace of Ringworm banished from the child's scalp in a few weeks after communication with

banished from the child's scalp in a few weeks after commencing with Zam-Buk. I cannot recommend Zam-Buk too highly."

Zam-Buk cures outs, burns, chapped hands, cold sores, itch, ulcers, eczema, running sores, catarrh, piles, bad legs, rheumatism, neuralgia, sciatica, abscesses and all diseases of the skin. Of all druggists and stores, 50c., or post paid upon receipt of price, from Zam-Buk Co., Toronto. 6 bexes \$2.50.

## SILENT MAXIM GUN.

The Clever Invention of an Indian

A remarkable apparatus has been invented by an Indian effectal, which seems likely to revolutionize machine gun fire. The ebject of the invention is to stience the tell-tale neise of the machine gun, thus increasing its value in the field.

The inventor is Mr. Alfred Thempson, who is serving on the Indian establishment as chief examiner of machine

The insistent crack of the Maxim is reduced by the invention to a slight de-tonation, which is indistinguishable betonation, water is indistinguishable beyond a range of 500 yards. At present machine gun fire can be heard thousands of yards off, and, no matter how good or rapid it may be, the field hatteries discover the guns and reut them before they can become a danger

before they can become a danger.

The role of the machine gun is, therefore, one of secret opportunity to strike a body of troops by surprise with 600 a body of troops by surprise with 600 shots per minute, as with the Maxim, and then lie low. But if the gun can operate in silence its possibilities are sensibly widened, not only by reason of its demoralizing effect, but because a steady, non-overheating discharge of 100 a minute can be maintained from

time to time throughout an action.

Mr. Thompson's apparatus can be at tached to a Maxim in a couple of min-utes. It weighs 16 pounds, and is less than a foot in length. The Maxim au-thorities have submitted it to the home Government.

She-'Did you ever stop to figure out how many hats in a year you could buy with the money you throw away on organs?" He—"I have, dear. I could buy about fifty for myself, but only about three for cou!"

# MISERIES

Indigertion Can be Cured by the Tonic Treatment of Dr. Williams' Pink Pills.

There is only one way to cure indigestion and that is to give your system so much good, red blood that the stomach will have strength enough to do its natural work in a healthy, vigorous way. Many dyspeptics dose the stomach with tablets, syrups and other things alleged to assist in digesting food, but these things merely give temporary relief—they never oure indigestion—and the trouble grows worse and worse, until the poor dyspeptic is gradually starving. In a case of indigestion, a half dozen boxes of Dr. Williams Pink Pills are worth all the mixtures and se-called pre-digested foods in the country. These pills cure indigestion because they strengthen and tone the stomach, thus enabling it to do the work nature intends it should do.

Mr. Paul Charbonneau, St. Jerome, Que., says: "For months I suffered traditional and the statement of the statement of the statement."

work nature intends it should do.

Mr. Paul Charbonneau, St. Jerome,
Que., says: "For months I suffered
tortures from indigestion. After every
meal the misery was intense, so that
I finally ate most sparingly. I tried
several so-called indigestion cures, but
they did me ne good. My general
health began to rum down. I suffered
from headaches and dizzinees and pains
about the heart. Often after the lightest meal I would be afflicted with a
smothering sensation. Finally my mether induced me to try Dr. Williams'
Pink Pills. Under the use of this medicine the trouble began to disappear,
and in less than a couple of months I
had completely recovered my health
and can now enjoy a hearty meal as
well as any one."

It is because they make new, rich

During December the weight of meat delivered at the London Central markets was 37,214 tons. At Billingsgate 11,593 tons of fish arrived.

John Williamson, a South Wales miner, known far and wide for his heroic behavior at the great mine disaster at Farndale years age, is dead.

"At present," says the London Graphic, 'though a man is too old for many things at forty, it is not generally held that he is too old to marry.

"Far from that being the case, the increasing standard of cemfort of the white races and the increased cost of living are steadily putting forward the marrying age.

"A paper read by Dr. Louise Robinsvitch at the Congress of Psychiatry at Amsterdam suggests another reason for comparatively late marriages.

"From a study of seventy-four bisgraphies of eminent men, writers, painters, musicians and soldiers, she found that more than 80 per cent, of them were born of middle-aged parents, Napoleon, Benjamin Franklin, Coteridge, Baizac, Rembrandt, Rubens, Sir Joshua Reynelds, Wagner, Schumann and Schubert were all the youngest chitdren of large families, and their parents were at least middle-aged when the genius of the family was born.

"This may not be a precise argument in favor of late marriages, but it may encourage the hope in bachelors who have reached middle age without deling anything famous themselves that matrimony may recompense them for their own fat'ure."

matrimony may recompense them their own fatture."

### BABY'S OWN TABLETS. A SMILE IN EVERY DOSE.

Sitting in Queen's Presence.

A ceremony characteristic of the court of Spain took place at the Royal Palace recently for the first time in the reign of the present King and Queen.

As is well knewn, the grandees of Spain have the privilege of keeping their hats on in the presence of the menarchs. Grandee ladies of Spain have the privilege of remaining seated before the menarchs, and the ceremony of obtaining this privilege is catled "temar la almehada" or taking the coushion, as ft consists in sitting on a cushion of red damask before the Queen.

The ceremony took place at 6 clock in the evening. The Queen was surresulated by ladies who have already "taken the cushion." As customary, the Queen en entering the salen erdor, of them to be seated. The ladie swhe are about to receive the highest honor in the court of Spain are led by a sponsor. The lady presented courtestes three times, and the Queen court lesies in return and says, "Sit down, please." The lady then sits down on a cushion before the Queen and speaks to her.

A SMILE IN EVERY DOSE.
