LONDON, Aug. 14-The bad character of a child only 21-2 years of age way discussed by the Wycombe (Bucks) Board of Guardians yester-

The boy, although so young, was said to be constantly using "awful" anguage, and was removed from the Poor Law schools to the workhouse in order to avoid contaminating the other children, A relative, in whose cars ne was afterward placed, returned him to the union, as she could do nothing with the child.

Yesterday a guardian gravely objected to the infant being kept in the workhouse for fear he should contaminate the old reople with his "fearful" language. An opinion was expressed that the case would be met with a little wholesome parental discipline. One guardian, said the terrible infant was a sturdy, merry little chap who would be cured by judicious treat-ment. The child has, been left to the Small Fill, Small Dosn, Small Price, care of the master and matron.

down a special vote for aerial war mittee of supply. It was passed h the House without a division-without even a dissentient voice. The burder of the criticism, such as there was en a dissentient voice. The burden pressed the government to do mor The war minister announced the fo lowing:

"A rigid dirigible balloon of the ver latest type, to carry twenty persons, being built at Bacrow for the admir alty.

"Reorganization of the aeronautica work at Aldershot. where a large air ship shed is being built, as well as a large gasbag balloon.

"Acceptance soon of two aeroplane for experiment, and possibly for pur chase.

"Several experiments in progress the special advisory committee recent ly appointed by the government." The secretary of war, Mr. Haldar had a cold douche for those who thin much has been accomplished in the way of a practicable airship of war, but fa cetiously remarked: "We may contem plate pleasant aeroplane parties a week-ends."

"I am bound to admit," he said, "that there has been very little actual pro gress in any part of the world.

"It is not enough to make machine to fly: they must be machines which can be made available for the purposes of war."

Mr. Haldane announced that the ad visory committee which had been in vestigating the question had reported that for naval purposes rigid dirigible were probably the only instruments of real value under present conditions. They had also reported that for th army the non-rigid dirigibles, although they had certain disadvantages, were

best "The aeroplane may become valuable for army purposes," added Mr. 'Hal-dane, "but it will have to rise much higher before it will be safe for recon-

"The fight of the channel and the experiments in the United States and elsewhere point to the fact that some time hereafter the aeroplane will be come an instrument capable of effecting in all probability great results. "I doubt whether any airship eve constructed could remain a secret for more than a limited period, and therefore I cannot say that I feel much con-cern over the fact that this country has not made the amount of init'al progress in aeronautics made in German and France, and perhaps the United

"The War Office." announced Mr Haldane, "has decided to purchase a site from the London County Counci at Wormwood Scrubs. The parliament ary committee has also contracted fo the bringing over of a dirigible: so the ult will be that two will come over and if they are satisfactory, they will come to stap. One, I understand, wi be presented; the other the War Office Durposes to purchase.

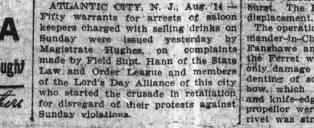

"Regarding aeroplanes, the War Of hopes before long to possess two with which it can experiment.'
