MAJOR AXOLINE.

My stallion, Major Axoline, will stand at owners' stables, Greenwood, every other week commencing May 1st.

F. L. ROBINSON,
Greenwood, April 22nd.

ANYONE CAN DYE THEIR CLOTHES WITH DYOLA

The Dye that colors ANY KIND of Cloth Perfectly, with the SAME DYE.

The Colors of Mink, Seal and Sheep, Ask your Druggist or Dealer. Send for Sample The Johnson-Edwards Co. Limited, Montreal

HIM HER

A lady stopping at a hotel on the Pacific Coast rang the bell the first morning of her arrival, and was very much surprised when a Japanese boy opened the door and came in.

"I pushed the button three times for a maid," she said sternly, as she dived under the bed covers.

"Yes," the little fellow replied, "me she."

KILL FLIES AND SAVE LIVES

(Cut This Out)

Kill at once every fly you can find and burn its body.

Observers say that there are many reasons to believe there will be more flies of the season than for a number of years.

The killing of just one fly now means there will be billions and trillions less next season.

Clean up your own premises; see and insist that your neighbors do likewise.

Especially clean "out-of-the-way places," and every nook and cranny.

Flies will not go where there is nothing to eat and their principal diet is too filthy to mention.

The fly has no equal as a germ "carrier" as many as five hundred million germs have been found in and on the body of a single fly.

It is definitely known that the fly is the "carrier" of the germs of typhoid fever; it is widely believed that it is also the "carrier" of other diseases, including possibly infantile paralysis.

The very presence of a fly is a signal that the housekeeper is unclean and inefficient.

Don't wait until the insects begin to pester; anticipate the annoyance.

April, May and June are the best months to conduct an anti-fly campaign.

The farming and suburban districts provide ideal breeding places, and the few born flies do not remain at their places but migrate, using railroads and other means of transportation, to towns and cities.

Kill the flies and save lives.

Recipes for Killing Flies

The United States government makes the following suggestion for the destruction of house flies: Formaldehyde and sodium salicylate are the two best fly poisons. Both are superior to arsenic. They have their advantages for household use. They are not a poison to children; they are convenient to handle, their dilutions are simple and they attract the flies.

Preparation of Solutions.

A formaldehyde solution of approximately the correct strength may be made by adding 3 teaspoonfuls of the concentrated formaldehyde solution commercially known as formalin, to a pint of water. Similarly, the proper concentration of sodium salicylate may be obtained by dissolving 3 teaspoonfuls of the pure chemical (a powder) to a pint of water.

Containers for Solutions

A container that has been found convenient for automatically keeping the solution always available for the flies to drink: An ordinary, thin-walled drinking glass is filled or partially filled with the solution. A saucer, or small plate, in which is placed a piece of white blotting paper cut the size of the dish is put bottom up over the glass. Whole is then quickly inverted, a match placed under the edge of the glass, and the container is ready for use. As the solution dries out of the saucer the liquid seal at the edge of the glass is broken and more liquid flows into the lower receptacle. Thus the paper is always kept moist.

Other Simple Preventives.

Any odor pleasing to man is offensive to the fly and vice versa, and will drive them away.

Take five cents' worth of oil of lavender, mix it with the same quantity of water, put it in a common glass atomizer and spray it around the rooms where flies are. In the dining room spray it lavishly even on the table linen. The odor is very disagreeable to flies but refreshing to most people.

Geranium, mignonette, heliotrope and white clover are offensive to flies. They especially dislike the odor of honeysuckle and hop blossoms.

According to a French scientist flies have intense hatred for the color blue. Rooms decorated in blue will help to keep out the flies.

Mix together one tablespoonful of cream, one of ground black pepper and one of sugar. This mixture is poisonous to flies. Put in a saucer, darken the room except one window and in that set the saucer!

To clear the house of flies, burn pyrethrum powder. This stupefies the flies, but they must be SWEEPED UP and BURNED.

Recipes for Stables, Barns and Out-Doors.

Borax is especially valuable around barns and out of doors. One pound of borax to twelve bushels of manure will be found desirable as a poison without injuring its manurial qualities or farm stock. Scatter the borax over the manure and sprinkle with water.

Lye, chloride of lime, or copperas (sulphate of iron) dissolved in water, crude carbolic acid, or any kind of disinfectant may be used in vaults.

THE COST OF GROWING POTATOES

(Experimental Farm Notes)

In potato growing provinces like New Brunswick there is always more or less discussion as to what it should cost to grow a good crop of potatoes and statements vary from as low as \$40.00 per acre to as high as \$125.00. Naturally there will be much variation in cost according to local conditions and especially to the ability of the land to produce without expensive fertilizing. It should be borne in mind that it will usually cost the potato specialist more to grow his crop than it will the farmer who follows mixed farming and makes his potatoes crop merely one of his many activities.

With a view to getting actual figures under average conditions in New Brunswick, a careful record has been made at the Dominion Experimental Station, Fredericton. For the past two seasons with an acre of land set apart for this particular purpose.

Neither rent of land nor depreciation of machinery was included in the calculation, for these two are items that are larger in the hands of the individual grower. As a general rule, however, it would be fair to charge as rent, 10 per cent of the land, and special potato machinery will depreciate from 25 p.c. to 50 p.c. per year if used steadily for 10 days each season. In 1915 the depreciation of the potato digger alone, used at the Experimental Station was \$8.00 per acre.

In 1915, the acre was planted with Green Mountain, Irish Cobbler and the Empire State, Seed, cultural operations and harvesting cost in all \$67.93. Eighty barrels of 165 pounds each of marketable potatoes were obtained and sold at \$1.75 per barrel making a profit over cost of production of 90c per barrel. Seven barrels of culls were sold for \$3.50, so that the total profit for the acre amounted to \$75.50.

This land was rather wet naturally and during the very rainy weather of June and July was several times flooded, causing missed hills and inferior plants generally. This land was originally cleared many years ago and after cutting hay for thirty years it was allowed to grow up to spruce, birch and alder. It was again cleared in 1913 and grew buckwheat in 1914.

In 1916, an acre was planted with Green Mountain seed.

The total cost amounted to \$82.33, the increase over 1915 being due to high priced seed, higher priced fertilizer ingredients and very dear copper sulphate.

One hundred and twenty barrels of marketable potatoes were harvested and could have been sold at \$2.25 per barrel, making a profit per barrel over cost of production of \$1.56 1-2, plus six barrels of culls at 50c, \$3.00, making a total profit of \$190.30.

Market price when potatoes were dug was \$2.25 per barrel. Later they could have been sold at \$3.25, but are held for seed.

This land grew hay for many years and was broken up and grew potatoes with 750 pounds fertilizer in 1913, corn with 18 tons barnyard manure in 1914, oats without manure in 1915. This land is on a slope, fairly well drained and except for washing out slightly between the rows felt no bad effects from the June deluge.

THE LATE MRS. J. C. CROWE

Died April 19th, at Port Williams

(Truro News). On April 10th there died at the home of her son, Capt. Percy Crowe, Port Williams, N. S., Mrs. Lucy Jane Crowe, relict of the late J. C. Crowe, Esq., of Debert, N. S., in the eighty-ninth year of her age. Mrs. Crowe had been an invalid for more than thirty years and her husband, who had been an elder of the Presbyterian church, predeceased her, fourteen years.

For many years their house was a home for ministers, and many a servant of the Lord, who enjoyed their hospitality, shall rise up and call them blessed.

On Thursday the 12th inst, the remains were brought to Debert for interment by the side of those of her husband.

The funeral service was conducted in the Presbyterian Church there by the Rev. J. A. MacLean.

Two sons survive Eldridge of Belmont and Capt. Percy of Port Williams; and also a brother and a sister, Luther Spencer and Mrs. Caroline Spencer, both of Great Village to all of whom the sympathy of many friends is extended.

CHARACTER

Back of the Series 18 Studebaker FOUR and SIX there is character. The character developed through sixty-four years of business success has won for Studebaker a name which is favorably known all over the world. Wherever there is civilization the name of Studebaker is held in good repute. This good will is a priceless business asset. To protect this reputation Studebaker makes sure.

Every piece of steel that goes into the construction of a Studebaker is true and tried. Experts in the art of making steel have "checked it up." Innumerable tests in the Studebaker engineering laboratories "make sure" that it is many times stronger than necessary to carry the car and its load.

See these cars now—ride in them—know what they can do on the road.

Prince Edward Island

MILLVILLE AND VICINITY

April 16.

On Friday last Prof. John Rowland and wife were summoned from Halifax on account of the serious illness of the former's father, Mr. A. E. Rowland.

Mr. Dakin of Waterville and Mr. Raymond of Aylesford exchanged pulpits on Sunday last. Dr. Dakin filling Mr. Raymond's appointment here in the evening.

We are glad to hear that Mrs. A. B. Harvey is improving.

Mr. Lamert Nichols of Nicholsville had the misfortune to lose a fine horse last week.

Red Cross met at Mrs. VanBuskirk's this week.

We are sorry to report Mrs. Lenora Orpin on the sick list.

We are sorry to lose Mr. and Mrs. Roy Steeves who intend moving to Moncton.

Mr. Outhit McNeill has purchased a pure bred Scotch Clyde, "Scotty Baldwin."

We are sorry to report Mr. Fred Whitman sick with a cold.

Mr. Allen Parker is suffering from La Grippe.

Miss Hazel Burbridge has returned to Wolfville where she is attending Acadia Seminary, having spent Easter with her parents, Mr. and Mrs. Melzer Burbridge.

Mr. Howe gave a very interesting lecture on the war in the hall on Easter Sunday afternoon. He was assisted by his son, Lieut. Emory Howe, who rendered some very appropriate selections on his guitar. Both lecture and music were very much enjoyed by the audience.

Miss Mamie Creamer of Nicholsville who spent Easter with her parents has returned to Truro where she is attending Normal School.

School is progressing nicely under the efficient teaching of Miss Harris.

LIEUT. A. S. CHURCHILL
KILLED IN ACTION

Universal sorrow is expressed over the death on Monday of last week of Alfred S. (Buz) Churchill, eldest son of Mr. and Mrs. Ezra Churchill, Windsor. The telegram bearing the crushing news was received Saturday afternoon, and for the parents of this brave and noble son is felt the deepest sympathy.

Minard's Liniment Relieves Neuralgia.

NOTICE

The subscribers offers for sale the lot of land and building thereon, on the north side of Webster Street in Kentville at present occupied by The Telephone Co. and Ernest Dodge with tenant house in rear—Tenders for same will be received up to April 15th, 1917, at noon. The highest, lowest or any tender not necessarily accepted.

BARCLAY WEBSTER, Agent

For ale

Part of the Real Estate of the late
HOWARD BLIGH

namely: Forty-five acres of orchard and woodland (known as the Coleman Property) situated on Brooklyn Street, Kings Co., about two miles from Cambridge Station, one mile from Woodville Station, also fifty acres of orchard, meadow and woodland (known as the Eagles Farm) situated on Brooklyn St., Kings Co., about 1/2 mile east of the above named property. This property will be sold cheap in order to settle up the estate. For further particulars apply to Howard Bligh & Sons, Limited, Halifax.

Old False Teeth

Bought in any condition. \$1.00 per set or seven cents per tooth sent by returnmail. R.A. Copeman, Cash Eplannade avenue, Montreal 2579a sw. Apl. 13X.

DISMANTLE WIRELESS STATIONS.

WASHINGTON, April 16—All wireless telegraph stations not operated by the Government were ordered dismantled during the war today by direction of the Secretary of the Navy. Failure of the owners to comply will result in confiscation of equipment.
