OUR FRIENDSHIPS.

Do We Choose Them More Carefully Than Formerly?

I wonder whether a recent contributo to "The Point of View" can be altogether right in saying that in this age of the open eye and the trained critical faculty a radical change has taken place in our friendships, and that we now not only choose our friends more care fully than in the easy-going days of old, but regard them critically and try to improve them after we have taken them hall we say-to our hearts. The wellbalanced and reasonable affection with which, as it seems, we regard them, scarcely involves such a quickening of the pulses as that expression would de-

Even in the old times we were not absolutely and without exception un-discriminating, just as in the present age of criticism one finds here and there age of criticism one finds here and there an impulsive person who enters rashly into an intimacy. Undoubtedly he who takes time to choose, who exercises "the great modern virtue—selectiveness," is wise; yet there may be a happy intui-tion which transcends his slow wisdom. There really is such a thing as friend-ship at first sight—friendship in the highest sense, and it is not unreasonable to think that the more "psychologi cally awake" we are, the more immediate may be our recognition of our friend in the stranger who comes to meet us. Under favorable auspices it may not take ten minutes to find that we sneak the same language, that we are tuned to the same pitch; and that is the allimportant thing. For although we have faults innumerable and glaring, although we even, at times, get on each other's nerves—if the note struck by one wibrates in the soul of the other, all these things count for nothing; unless, indeed, they count for everything. Friends or enemies we must bestrangers never. I have experienced experienced one such instantaneous friendship which has withstood the chances and changes of twenty years and has survived the inevitable discovery of faults on both In this matter of selection I doubt whether we have changed very much.—From "The Point of View," in much.—From "The P the October Scribaer.

Little Maidens.

How should little maidens grow When they're ten or over? In the sunshine and the air, Wholesome, simple, fresh and fair, As the bonney daises blow, And the happy clover,

How shall little maidens speak When they're ten or over? As the birds do, and the bees, Singing through the flowers and ill each mortal fain would seek The merry-hearted rover.

Prices Used to Soar in the Cafe Anglais in Paris.

In the palmy days of its existence the Cafe Anglais in Paris was greatly affeeted by wealthy Americans . In this resort the charges soared sky high, and it was considered bad form to ask the price of anything on the menu. You simply ordered what struck your fancy and were expected to pay smilingly when the bill was presented. mJulius Chambers was invited by

friend to dine there once, and in the Brooklyn Eagle he tells of his experi-

"Being asked to order the dinner fo my friend I made it as simple as pos-sible. A bisque soup, salmon with young potatoes, one small capon with finherbs, asparagus, tarts, Camembers cheese and coffee. Mr friend did not cheese and coffee. Mr friend did not drink wine, and I ordered for myself a bottle of 'the red wine of the house.

"Everything was excellent, and I fully expected the bill to be 80 to 100 france (\$20). Imagine my horror, therefore when the bill was 300 francs. Sixty dol lars! I was indignant, although my host merely laughed. I sent for the maitre d'hotel and demanded an itemized bill He was very indiginant; said such a request was unheard of. After much de-lay the 'addition' appeared. I only re member that it added up all right, and that the charge for the chicken was \$20, and \$1 for the wine (worth about 60 cents). My host only smiled and gave the waited a Napoleon tip.

When he got his bill he was charged for the whole salmon-sixty francs (\$12.) He was assured it was the rule of the house that a second heiping indicated he wantthe entire fish, and a charge of that kind was made.

Right-Handed Plants. That there are right-handed plants an left-handed plants has been reported to the Cambridge (England). Philosophical Society by R. H. Compton. In an examination of eight varieties of two-row ed barley the first left was found to twist to the left in 58 per cent, of more than 12,000 seedlings, and an excess of left-handed growth was found also in millet and in oats. In corn there seem ed to be no marked tendency either way. No evidence of hereditary pecu-liarity appears to have been obtained

For the Baby's Bath.

There's no sweeter sight in the world than a dear, tiny baby splashing about in the bath and giving of that bath' gives joy to any mother. It is a task that he cannot always accomplish conveniently, however, for the ordinary wash basin is too small, and "much wash basin is too small, and "much splashing maketh the rug wet." The bathtub is as much too big, and it's a back breaking business to bend down over it. Now there has been invented the dearest little tub for a baby that ever was It's of rubber and is fastened ever was. It's of rubber and is fastened

to a metal frame, which, joy of joys, can be hooked right to the sides of the big tub and there it swings like a lit-tle hammock within the larger tub. It is at a convenient height, and the splashings drop where they can do no damage. The tub is easily emptied, for it is only necessary to pull one of the side rods out of its rubber casing and the little tub immediately empties its contents in the big bathtub. The whole thing comes apart and can be folded up put away until it is needed again

Isn't this a convenient thing?
