IOHN RORKE, Captain

TESTING OF CLOTH.

How to Distinguish Between Wool and Cotton.

Shopping is a trial to many women because they do not know how to test wool and are obliged to take the salesman's word that there is no cotton in the cloth that is to be made into a coat or cape that must last for several country.

ton in the cloth that is to be made into a coat or cape that must last for several seasons. Frequently they are dissatisfied with their purchase because they fear the materials contain some cotton and will wear bare and look shoddy when given hard use, says the New York Telegram.

All this anxiety would be done away with if women knew how to test woolens, and there would be no question about whether the materials are part cotton, for the purchaser would be able to decide this for herself. Testing cloth is such a simple process that every woman and girl should know how it is done. According to an expert woolen buyer the tests never fall, so that once applied any doubt as to the quality of the material would be settled at once.

"The easiest test I know of," she said, "and one that can always be tried with a sample, is to burn the threads running both ways. If they are pure wool they will not burn quickly, but will smolder and throw off an oder like burned. A light then seemed to dawn upon the prisoner. Gee! he said, that's one on me. I never thought of that. OF HEART DISEASE. How frequently does a head line similar to the above greet us in the newspapers. The rush, push and strenuousness of the American people has a strong tendency to lead up to valvular and other affections of the heart, attended by irregular action, palpitation, dizzines, smothered sensations and other distressing symptoms.

regular action, psipitation, dizzness, smothered sensations and other distressing symptoms.

Three of the prominent ingredients of which Dr. Pierce's Golden Medical Discovery is made are recommended by some of the leading writers on Materia Medical for the cure of just such cases. Golden Seal root, for instance, is said by the UNITED STATES DISPENSATORY, a standard authority, "to impart tone and increased power to the heart's action." Numerous other leading authorities represent Golden Seal as an unsurpassed tonic for the muscular system in general, and as the heart is almost wholly composed of muscular issue, it naturally follows that it must be greatly strengthened by this superb, general tonic. But probably the most important ingredient of "Golden Medical Discovery," so far as its maryelous cures of valvular and other affections of the heart she concerned, is Stone root, or Collinsonia Can., Prof. Win. Paine, author of Paine's Epitomy of Medicine, says of it:

Some of the samples and says and the samples and says and other of the warp, inravening a small piece so I can test the threads running both ways. If they are pure wool they will not burn quickly, but will smolder and throw off an odor like burned bones and leave a little charred trail where they drop. If the cloth is of cotton and wool the former will burn rapiely and fall away, while the other is still smoking and burning. If both threads are cotton the test will be over in a moment and will leave nothing but a thin light ash.

"Nitric acid applied to materials is another sure test. If a piece of woolen cloth is dipped in this acid it will shortly become yellow, while in a piece that centains both cotton and wool the former does not change color, but the heavier thread takes on a yellowish stain.

"As to worsted, there is no mistaking its harsh surface, and it is known by the mare atouch When it is complete the sure to the content of the tord."

This lesson is the account of the triumphal entry of our Lord Jesus Christ into the Holy City as its King. The four evangelists give us four narrations, each differing somewhat and yet supplementary to each one, and while one reads let the others supply the omissions and variations. Mark the sharp contrasts.

First Contrast—the Lord of all things, King of Kings and Lord of Lords, borrowing a donkey to ride into His own city; not as emperor on warlike steed or in triumphal chariot; only a Jewish carpenter, on a slow slipping ass's colt, yet

ing its harsh surface, and it is known on a slow, slipping ass's colt, yet by the mere touch. When it is combined with soft wool threads the machine of David and the Son of David and Sone root is also recommended by Drs.

"Stone root is also recommended by Drs.
Hale and Ellingwood, of Chicago, for
valvular and other diseases of the heart.
The latter says: "It is a heart tonic of
direct and permanent influence."

"Golden Medical Discovery," not only
cures serious heart affections, but is a
most efficient general tonic and invigorator, strengthening the stomach, invigorating the liver, regulating the boweis
and curing catarrhal affections in all
parts of the system.

Too many people who are well bred in nearly every other respect are guilty

How to Set the Color.

It is impossible to tell whether a color is fast before washing, says the Boston Traveler, but by far the safest plan is to "set" the color before it goes to the tub for the first time. One of the best methods of setting delicate colors consists in simply making a strong brine of cold water and salt and scaking the garment from twelve to twelft four hours. Of course this should be done just before going to the laundry, and the salt should not be allowed to dry in it. This is especially done by the wholesale or quite in the businesslike fashion practiced by strong brine of cold water and salt and salting the garment from twelve to twelve four hours. Of course this should be done just before going to the laundry, and the salt should not be allowed to dry in it. This is especially good for all shades of pink and green, and colors once set this way will be bright as long as it would be possible to expect it. A strong solution of alum and water is good, particularly with blues and the more delicate shades of brown, but its effect is not so lasting as that of salt, and it is sometimes necessary to renew the bath after the first three or four washings. some. Grasping a knife in one hand and a fork in the other, they slash away at the inoffensive green stuff with a vigor and a noise of a miniature leaves are converted into shreds of their former selves. There is common sense in the convention that prohibits such a course. Nearly all green salads are broken into pieces of convenient size before sending to the table. Even when these are too large the leaf Famous Boys.

A boy used to crush the flowers to

A poy used to crush the nowers to get their color and painted the white side of his father's cottage in Tyrol with all sorts of pictures, which the mountaineer gazed at as wonderful. He was the great artist Titlan.

An old painter watched a little fellow who amused himself making drawing. There should be a large demand on the part of stamp collectors for copies of the special stamps which were issued by the Japanese Government some time ago to commemorate the return of the treops from the seat of war. Two of the treops from the seat of war. Two
of such stamps of the face value of
one-half sen and 3 sen respectively
were issued, and they were available
for postage of letters only on the day
of the great review. Not more than
one copy of each kind was sold to
every applicant for the stamps at the general posteffices. The design consists of a Maxim gun and other weapons of modern warfare, with the Japanese flag.

An Errand of Mercy.

Deeply impressed recently by an address given at Brighton on the evils of smoking, a young minister rose and said that that morning he had had a present of 100 cigars, one of them he had smoked, but he now determined to go home and throw the rest into the fire. Thereupon a Baptist minister arose and said that he meant to accompany his reverend brother.

"My intention," he added, "is to rescue the minety and nine."—London Tribune.

Rev. Robt. McCosh, rector, will conduct the services and occupy the pulpit on both occasions to-morrow. The Brotherhood of St. Andrew. meets every Tuesday night at 7.30 in S. S. Hall.

Teachers' meeting every Monday night at 7.30. Sunday School will be held to-morrow afternoon at 3 o'clock.

Holy Communion will be administered the first Sunday of each month at 11 o'clock a. m., and on the third Sunday at 8 o'clock.

St. Andrew's.

Fly as Disease Carrier. "The house-fly is largely responsible for the high death rate from diarrhoea," remarked Dr. Sephton at the Lancashire County Council meeting. If mothers would only keep milk for the children in clean and covered vessels to prevent the house-fly getting at it the infantile mortality would be speed-lly reduced.

Her Dream Fulfilled.

Her Dream Fuffiled.

The landlady of a widow named saunders, living in Mile end, dreamed that her lodger was drowned in the Regent's Canal, London. She went to Mrs. Saunders' room, and, finding that she was not there, gave information to the police. The missing woman's body was found in the canal.

A Long-Postponed Voyage

A woman in Glasgow named Robert-son purchased a ticket for Canada thirty-one years ago. A few days ago she presented the ticket at the office of the Allan Line Company, where it was duly honored.

An Essex Centenarian.
It was reported at the meeting of the Tendring Hundred Board of Guardians that among those in receipt of out-relief was Widow Frosdick, of Great Bromley, who is 101 years old.
