Lever's Y-Z (Wine Head) Disinfectant Soap Powder is a boon to any home. It disinfects and cleans at the same time.

## SKIN OF EGGS FOR BURNS.

An egg is alive. The skin of an egg, that is the covering next the shell, is alive as much perhaps as the skin of our hand. Formerly when a person was burned, or had lost a portion of the skin of the body the skin of another individual was taken from the arm or leg and grafted upon the burned surface. But now it has been discovered in case of burns or other similar injuries, if the wound is disinfected and cleaned and quickly covered with the skin of an egg, taken from a fresh egg, it will cause the wound to heal and cause new skin to appear the same as though skin had been taken from the arm of an individual. The skin of an egg actually grows over the wound, and new skin is formed over it and through it.

## TAKE MY CURE, WHEN CURED YOU PAY ME

The fear that you could not be cured may have deterred you from taking honest treatment or you may have been one of the unfortunate who have been treated vainly by inexperienced physicians. Free treatments, free trial samples, patient medicines, electric belts and other similar devices. Such treatments cannot and will never cure you, nor will these malades cure themselves. When I offer you a cure, and am willing to risk my professional reputation in curing you, and have such faith and confidence in my continued success in treating these diseases that not a penny is paid until you are cured, a fair proposition cannot be offered to the sick and afflicted. This should convince the skeptical that I mean what I say, and do exactly as I advertise, as I am positive of curing you in the shortest possible time, without injurious effects. My charges will be as low as possible, for conscientious, skillful and successful services, and my guarantee is simple and true. Not a dollar need be paid until cured. I have 14 diplomas and certificates from the various colleges and state boards of medical examiners, which should be sufficient guarantee of my standing and abilities. It makes no difference who has failed to cure you, it will be to your advantage to write to me for my opinion of your case, which I give you free of charge. I want to hear from patients who have been unable to get cured, as I guarantee a positive cure for all chronic, nervous, blood and skin diseases which I accept for treatment. I not only cure the condition itself, but likewise all the complications, such as rheumatism, kidney and bladder troubles, blood poison, physical and nervous debility, lack of vitality, stomach troubles, etc. All medicines for patients are prepared in my own laboratory. I will send a booklet on the subject which contains the 14 diplomas and certificates, entirely free. Address simply, Dr. S. Goldberg, 208 Woodward Ave., Suite 311 Detroit, Mich.

Smallest Bird. The golden crested wren is the smallest not only of British, but of all European birds. Its average weight is only about eighty grains, so that it would take seventy-two of the birds to weigh a pound. The length of the feathers is about three and a half inches and the stretch of the wings about five inches, but when the feathers are taken off the length of the body does not exceed one inch.

## A Great Idea.

"Did you ever notice that most of the sudden and disastrous fires are due to spontaneous combustion?" "No, but I've often thought spontaneous combustion would be a splendid thing to keep on tap for lighting the kitchen fire."

Ninety-nine people go out to join the wild hunt for happiness, and the hundredth man stays comfortably at home and is it.

## CHINESE MONEY.

Some Is Good and Some Is Counterfeit, but It All Goes.

Emile Bard, a Frenchman, has an interesting chapter on the money of China in his book, "Chinese Life in Town and Country." He explains that the unit of Chinese money is the tael, which is not a coin, but a weight of silver—the ounce, of which there are sixteen to the catty and 1,000 to the picul. The commercial tael is that of Canton, which should weigh 37.738 grains, but usually weighs 37.58. Then there is the tael of Shanghai, which weighs 36.6, and the revenue tael, used in valuing imports and exports, and each large city has its own, that of Tientsin worth from 4 to 6 per cent. more than that of Shanghai. Business estimated in taels is carried on by the use of Spanish dollars or silver ingots. The former are weighed and stamped by every south China merchant and have to be remitted continually. The ingots of silver are cut from bars into pieces that the operator estimates will weigh 50 taels. Naturally each one who handles them weighs them.

"Banks store their money in cellars, in boxes carried back and forth by coolies," says M. Bard. "This explains the item of transportation which is deducted from the face of a Chinese check when it is cashed at a bank. One can judge of the complications consequent upon this system of coinage, version of taels of different values into ingots of different weight and purity, especially as assayers of different localities refuse to honor the stamps of other cities." In places where the dollar is not used small payments are made by cutting up an ingot. "The scale used in weighing these fragments has two sets of markings; one for receipts and one for payments."

China's national coin is the cash, a round copper coin with a square hole through it. The cash or spade dates from at least 2300 B.C. Eight pounds' weight of cash makes a dollar. Years ago an emperor decided to double his funds by giving copper cash double its value. In certain parts of the country this performance is still in effect. In other parts 77 or 85 cash are counted as 100.

In Honan the Chinese go to market with two kinds of money, one real, the other counterfeit. Some articles are bought with one, some with the other. Certain articles have two prices, one in good money, one in bad.

## AMERICAN LANDSCAPE.

How It Differs From That of England and the Continent.

The American landscape, even in the older parts of the country, is generally unimproved and does not lend itself as readily to formal treatment as does the typical English or continental landscape. The owners of big estates rarely appreciate the scale on which the landscape architecture should be laid out and the patience which is necessary to obtain a complete and consummate effect. They want ready made estates. Finally, the leading American house architects have, with a few exceptions, a good deal to learn about the technique of landscape design. So far as the large house itself is concerned, a convention has been established which is in the main a good convention, but the designing of gardens is still in an early experimental stage. The stage properties are collected in abundance. There is no lack of pergolas, fountains, well heads, gazebos, statuary and pottery, but as like as not they are indiscriminately placed. The architectural features are, however, generally somewhat better managed than the planting, which frequently looks as if an Irish gardener had been given some vague general directions, or as if the lady of the house had considered that it was a woman's business to make the garden green. As a matter of fact, however, the lady of the house, in case she has her own way, generally paints the garden yellow and red rather than green. Her idea usually is merely to get as much bloom as possible, and this she does at a sacrifice of those masses of foliage which are absolutely necessary to give mass, body and depth to a large garden.—Architectural Record Magazine.

## The River Kongo.

Tropical rivers vary greatly in volume in the rainy season sweeping to the sea in vast torrential floods and near the end of the dry season flowing slowly and only in the central and deeper portions of their beds. The Kongo, however, the largest river in Africa, flows and falls very slightly, and Comander Cameron accounts for this peculiarity, which was at one time considered inexplicable, by the observation that the basin of this great river extends on both sides of the equator, and therefore one moiety of its tributaries are in flood while the other are at their minimum volume.

## Smallest Bird.

The golden crested wren is the smallest not only of British, but of all European birds. Its average weight is only about eighty grains, so that it would take seventy-two of the birds to weigh a pound. The length of the feathers is about three and a half inches and the stretch of the wings about five inches, but when the feathers are taken off the length of the body does not exceed one inch.

## A Great Idea.

"Did you ever notice that most of the sudden and disastrous fires are due to spontaneous combustion?" "No, but I've often thought spontaneous combustion would be a splendid thing to keep on tap for lighting the kitchen fire."

Ninety-nine people go out to join the wild hunt for happiness, and the hundredth man stays comfortably at home and is it.

## VICHY — CELESTINS

The only genuine Vichy Water: property of the French Republic.

Boivin, Wilson &amp; Co. Montreal.

## Had One Too Many Himself.

"Serves him right!" murmured Mrs. Henpeck, looking up from the paper in which she had been reading of the arrest of a bigamist. "Oh, a man who took one wife too many."

"My! Maybe they'll be after me next."

## HOW'S THIS?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure. F. J. Cheney & Co., Toledo, O. We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by his firm. Walding, Kinnear & Marvin, Wholesale Druggists, Toledo, O.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75c. per bottle. Sold by all Druggists. Take Hall's Family Pills for constipation.

## A Chance For Inventors.

The Government of the Netherlands has instituted a competition with the object of discovering a process of cutting diamonds which will dispense with the use of an alloy dangerous to health. For a complete solution of this problem a prize of \$2,275 is offered. The answers must be written in English, French, German or Dutch and submitted to Professor L. Arosen, chemical laboratory of the Polytechnic School, Delft, Holland, on or before Jan. 1, 1906.

## TERRIBLE BACK PAINS.

They fairly agonize your life. Something powerful and penetrating is needed. Doctors knew nothing so swift to relieve as Nerviline, a strong penetrating liniment made to cure just such pains as yours. Nerviline is very concentrated, about four times more powerful than ordinary liniments. In the worst cases Polson's Nerviline is extraordinarily good. All muscular pain flees before it. Nearly fifty years in use—a good recommendation, surely.

## Of Course.

Mrs. John Jacob Astor tells of a visit she once paid to a Parisian tailor in company with a friend who had taken on numerous superfluous pounds. The stout woman was having a gown fitted and complained it was so tight she could not sit down. The tailor, who understood American slang, blandly inquired, "Does madam prefer a gown in which she can stand up and look smart or one in which she can sit down and look sloppy?" Madam ordered the tight fitting costume, of course.

## THE HAPPINESS OF HOME.

Very largely depends on the mother's disposition. If she is animated and bright, everyone is happy; but if she is nervous, irritable and cross—everything goes wrong. Bright, cheerful women usually use Ferrozone, the greatest health-maker known. By acting through the blood Ferrozone is able to reach all the organs that need assistance; it establishes regular and healthy action of all functions, builds up the general health, fortifies the system with a reserve of energy that defies disease. Don't put off—Ferrozone costs only 50c, at any drug store; get it to-day.

An old dress, like a kind friend, sometimes does a woman a good turn.

## NINETY-EIGHT PER CENT.

There is a fascination about big profits to a business man. But the conservative and cautious trader prefers to have the lesser per cent. of interest and the larger per cent. of safety in his investments. There is no business man who would not consider it a sound proposition to invest in an enterprise in which absolute loss was impossible and which offered ninety-eight chances in a hundred of a rich profit. The statistics of cure effected by Dr. Pierce's Golden Medical Discovery show that ninety-eight per cent. of cases of "weak lungs" can be absolutely cured. Almost, if not all, forms of physical weakness may be traced to starvation. Starvation saps the strength. The body is just as much starved when the stomach cannot extract nutrition from the food it receives as when there is no food. "Weak lungs," bronchial affections, obstinate coughs, call for nourishment. "Golden Medical Discovery" supplies that nourishment in its most condensed and assimilable form. It makes "weak lungs" strong, by strengthening the stomach and organs of digestion which digest and distribute the food, and by increasing the supply of pure blood.

There are many able preachers in the world, but few listeners who grasp the full meaning of the argument produced.

## Rough Necks.

If you bathe the neck every night in water into which a little pure benzoin has been dropped, then dry thoroughly and use a good cream, you will find any roughness will be relieved. Here is a good cream for this purpose: Lanolin, two and one-half ounces; spermaceti, three-quarters of an ounce; white vaseline, two and one-half ounces; coconut oil, two ounces; sweet almond oil, two ounces; tincture of benzoin, half dram. Melt the first five ingredients together and beat until the mass concretes, adding the benzoin, drop by drop, during this process. Extract of violet or any perfume may be added if agreeable.

Henry Elliott, Esq., of Sherbrooke, N. S., Inspector and Supt. of Bridge Construction for Nova Scotia says: A bottle of MINARD'S LINIMENT cured me of a very severe sprain of my leg, caused by a fall while building a bridge at Doherty Creek, Cumberland County, Nov. 17, 1893.

## Influence of Red Hair.

"There never has been an important revolutionary movement without a red haired person intimately concerned, if not the leader," says a writer. "Nearly all the great reformers or founders of religions had red hair. History mentions that Mohammed was a red haired man. King David was ruddy. Louis XIV. was a sandy haired man, with many of the characteristic peculiarities of the type. Cleopatra is called 'the red haired Greek.' Mary, queen of Scots, had red hair, and Prince Charles resembled her in coloring. Lucresia Borgia looks in her portraits somewhat auburn. Queen Elizabeth was of decidedly red coloring, which will suit both her admirers and her detractors."

Minard's Liniment Cures Garget in Cows.
