happening in the province. It appears that while the murdered mother was doing the kitchen work the fiend seized her and attempted outrage. A fierce struggle ensued as the appearance of the room and the marks upon the woman's body indicate. Then some sort of a keen weapon was used, presumably an axe, and one cut on the back of the neck through the collar of the dress caused death. There had been done. were four other gashes beside. Whether the woman became insensible and the blows were then delivered, or whether being beaten off in his first attempt he renewed the attack and coming behind her unawares inflicted the fatal blow, is not known but the latter theory is generally accepted. Shortly after four o'clock, the husband, Hedley, returned and was met at the gate by his little four year old child who screamed, "mamma is dead, Eddie chopped her with an axe." Horror stricken he his own apartment he saw his wife lying on her back on the floor in a pool of blood, which had saturated her clothing and had run along the floor in many small streams.

Her legs were spread apart and bruizes showed that a fiendish attempt at outrage had been made. Her head was canted to one side, the eyes staring and the clothing pedragged and torn. He looked for the baby and found it in his father's apartment in the cradle, the deaf mute sitting beside and rocking it. The murderer shortly after left the house and it is supposed that he took the fatal weapon with him and secreted it in the woods. Hedley went for the neighbors and returned with John Howard and William Kinghorn, who attest to the truth of Hedley's statement. The murderer, Edward, is a strong wellformed negro, light in color and about eighteen years of age. Dr. Coburn, coroner, was notified and an nquest was held, the verdict being "that deceased Bertha Wheary, had been killed with an axe or other sharp weapon by someone whom they could not name."
