

Are Your Eyes Weak?

How you may know when Glasses should first be used and those in use abandoned:

- 1st—If you are obliged to move small objects further from the eye in order to see distinctly.
- 2nd—If you find it necessary to place the light between the eyes and the object.
- 3rd—If, when considering a near object, it appears to have a kind of mist before it.
- 4th—If the letters of a book run together, or seem blurred or double.
- 5th—If the eyes are fatigued by close exercise, and you are obliged to relieve them by rubbing or closing them.
- 6th—If black spots appear before the eyes or seem floating around them.

If you observe any of the above signs of distress, it indicates that the "accommodating muscles" of the eyes are no longer able to alter the shape of the lens so as to focus rays of light coming from different distances. A contest with failing sight is hopeless and properly fitted glasses will relieve you.

We make no Charge for Examining the Eyes and we Guarantee Satisfaction.

Clean-Up Day.

It must be highly gratifying to the City Council, and particularly to Councilor Coaker who suggested a Clean-up Day, that citizens have so warmly endorsed the idea of a spring cleaning for the city, and that so many have signified their intention of taking a part in it either personally or by deputy. Much can be done by giving the city streets and drains a good scraping on Monday and by removing the refuse to a place where it can be destroyed. If that is done the city will have made a good start before the warm weather sets in, and then if householders, shopkeepers and business men generally cooperate heartily in future with the Council and the Health Authorities, we may keep the city clean. Yesterday we indicated one way in which this could be done daily with little trouble to individuals, but much benefit to the community. It will be remembered we suggested that all combustible refuse be burnt instead of being dumped on the streets or into receptacles on the streets. This would relieve the Sanitary Staff considerably and assist materially in keeping the city clean and tidy.

We again remind our readers that Monday is Clean-Up Day, and that the City Council is inviting the cooperation of citizens generally in the good work.

Miss M. J. Mallowney left here this morning by train on a visit to friends at Briggs.

Magistrate's Mistake.

MAKES OFF WITH MINISTER'S VALISE.

When the Prospero was returning southward this week a clergyman and a magistrate embarked on her at a port in Notre Dame Bay. The former booked passage to St. John's and the latter to Fortune Harbor only. They were both given berths in the same stateroom, and being intimate friends kept closely together on board. When Fortune Harbor was reached that night, the magistrate's trip ended, and he at once went on shore, taking, as he believed, his own valise. Now the valises of both distinguished passengers bore a striking similarity not evidently previously noticed by their owners, and hence when the magistrate grabbed the valise in the hurry of getting ashore at Fortune Harbor, there was no close scrutiny on the part of either himself or the clergyman as to whether he had the right valise or not. When, however, the Prospero berthed at Bowring's wharf in the city yesterday morning, and the cleric commenced to gather together his travelling paraphernalia, it struck him very forcibly that the valise he was handling and which he thought was his own was very much lighter in weight than when he brought it on board. Opening it he discovered to his amazement that instead of the valuable contents he had placed in his own there was nothing in the one he opened but a towel, a shaving mug and a few other things. The cleric received a shock at first, but on thinking over the affair and remembering who his fellow passenger was at the beginning of the voyage, he realized it was simply the Magistrate's mistake and consequently decided to make the best of the awkward plight. The magistrate's mistake, however, places the clergyman in a fix and will delay him a few weeks longer in St. John's, as it will take another week or so to effect the exchange of valises.

Schooner Total Wreck.

The schr. Victoria, from Bonavista Bay with a load of lumber for Mr. Tilley, is now a total wreck at Kelligrews. The bottom is out of her. Her two anchors and a kedge were out when the force of the wind burst her chains and she drove in at Tilley's stage. Besides the crew of five men there were two women on board. They all landed safely. The schooner was insured but the lumber was not. A gang of men is engaged to-day taking out the lumber which was sent there by Monro & Co.

Here and There.
