## Attempt to Postpone Discussion in Commons—Public Funeral for Military Victims of Assassination—New York Quotes Sugar at \$8.75—Armenia Forced to Accept Soviet Rule.

### HOME RULE BILL IN LORDS.

LONDON, Nov. 23.

The opening of the debate on Irish Home Rule in the House of Lords to-day, afforded a notable contrast to the apathy displayed when the measure was under consideration in the House of Commons. The Upper House was crowded and many of the members of the Commons, including Lloyd George, Bonar Law and Sir Edward Carson listened to Lord Birkenhead's speech introducing the bill. Many Peers were in the side galleries and the stranger's gallery was crowded. Explaining the provisions of the bill Lord Birkenhead read a letter from Sir Edward Carson, in which the Unionist leader declared he and his colleagues had made up their minds to accept the bill and work under the measure loyally. Lord Birkenhead said he was convinced, however, that the only danger to the bill lay in the opinion of those thinking the bill did not go far enough and those thinking it went too far. Strange as it might seem, said Lord Birkenhead, I think this is a favourable opportunity to effect a settlement, because the Irish people are sick and tired of the terrible reign of terrorism. The Earl of Dunraven, on the ground that the bill was not supported by the majority of Irishmen and afforded no prospect of rejection, describing the bill as an honest but ignorant attempt on the part of the government to settle the Irish question.

## Five-Minute Fortune.

A Greek shipowner, Valiano by name, strolled into the Casino at Deauville one afternoon recently and began to play baccarat. At half-past eight the game broke up and M. Valiano went away with every pocket bulging with packets of notes.

He asked a friend to help him count his gains, and they were found to amount to 1,800,000 francs. At the normal rate of exchange this would equal £72,000 English money.

Gamblers may have made as much before in a short sitting, and even larger sums have changed hands on the result of a horse race lasting perhaps three minutes.

### "Get Rich Quick" Boxers.

The classes of people who make money most rapidly by the exercise of their professions are undoubtedly boxers and music-hall artists. A boxer has been known to make money at the rate of £26 per second in the course of a big fight won in a single round.

The matador, Machaquito, Spain's most famous bull-fighter, has made £100,000 in a year. He took part in about fifty performances, each, so far as his part went, lasting perhaps fifteen minutes. So his pay was over £130 a minute.

Just before the War two New York bankers made a syndicate and bought up over ten million pounds worth of New York State bonds. Two hours later they had put them on the market and in the course of the morning sold them at a profit of £120,000.

Barristers again. They make big money, and a famous man like Sir Edward Carson or Sir Rufus Isaacs must frequently have received a four-figure fee for a day or two of work. But the record is held by an American, Mr. Samuel Untermyer.

For successfully arranging an amalgamation between two great copper countries, the Utah and the Boston Consolidated, he received \$250 shares.

These shares sold for £10 12s. apiece, so that the lawyer's fee was in the neighbourhood of £35,000.—Pearson's Weekly.

## The Great Storm.

Great storms are not at all uncommon, and every year we read in the newspapers the description of one stated to be more severe than the oldest inhabitant can remember. But absolutely the worst one that ever ravaged these islands occurred a little more than 200 years ago. This was a gale of wind which, beginning on Wednesday afternoon, November 24, 1703, reached its greatest height on the following Saturday, and then gradually died away to a dead calm exactly a week after its commencement. When the storm was at its height most people took refuge in their cellars, as their houses appeared to be in imminent danger of being blown away. Few people dared venture into the streets, because bricks, tiles, coping-stones, rafters, signboards, shutters, lead and glass were being hurled in all directions, and every now and then a great chimney-stack would fall with a tremendous crash. Twenty-one persons were killed in London by the fall of chimneys alone, and thousands of houses were destroyed, or reduced to mere skeletons. The damage in London amounted to one million pounds. Following the usual law of supply and demand, which we were so familiar with in these days, the price of repairing materials immediately jumped to six times the usual rate. Rather than pay the increased cost, and the

## Truce Declared in Canadian Sugar War.

MONTREAL, Nov. 18.—A truce has been declared in the sugar war and with the denial of officials of the Dominion Sugar Company its price had

been reduced to \$11.75 and the statements that the firm was still offering sugar at the old rate, once more a uniform price is being charged by all the refineries.

The big four have followed the Dominion Sugar Company in their price-cutting and the Atlantic, Acadia, St. Lawrence and Canada Refineries are now selling to the wholesalers at \$12.00, less five per cent. per hundred-weight.

## The Biter Bit.

The well-known American humorist, Mr. Irvin S. Cobb, has been telling this story against himself.

Being desirous, towards the close of his recent visit to England, to book his passage back to New York, he applied at one of the London offices for particulars of sailing, and asked in his inimitable way:

"Have you a ship called the Neurotic sailing to America?"

"No, sir," came the reply, "we have not."

Cobb had another go: "Then perhaps it is the Rheumatic—can you book me a first-class passage on that for New York?"

"No, sir, I cannot," replied the official, and then falling in with the joke, continued: "But I think I can fix you up all right on the Lu-natic or the Idiotic!"
