

City and Other Workers.

Labor Day to be Celebrated on a Grand Scale.

Attractive Programme Being Arranged by the T. and L. Council.

Detroit Molders Divided on the Question of a Sympathetic Strike.

A well attended meeting of the Labor Day demonstration committee was held this week to further the arrangements for the celebration. Reports from the various sub-committees showed that the details were being satisfactorily proceeded with.

It was decided to call a meeting of unorganized workmen and those desirous of taking part in the parade, on Wednesday night next, in Labor Hall, Dufferin avenue. Members of the Trades and Labor Council will be in attendance to give information.

The banner to be presented to the union of any trade or calling making the base turnout is being manufactured, and will not doubt be on view a few days previous to the demonstration. Ex-Alt. W. Jones, Ald. Deane and Cooper will be asked to select the prize-winning organization. The presentation of the banner will be made at the opening of the evening programme.

It was also decided to ask Mayor Little to open the day's proceedings with a short address.

The city milkmen, who have been invited to take part in the parade, will make a grand parade. The Labor Day souvenir programme will be issued early next week, when several thousand will be distributed. A supply will then be reserved for Labor Day.

It is expected that Queen's Park will be thronged both afternoon and evening. The Trades and Labor Council have gone to a large expense in providing a first-class day's entertainment. The Musical Society and Seventh Battalion Bands have been secured.

The Robin Hood Drill Corps will give exhibitions of fancy movements at both performances. The Orient Club, comprising 35 members, will put on one of the best programmes they have ever presented, and altogether the entertainment will be one of rare interest.

The business men and merchants are to be invited through the press to take part in the parade.

GENERAL LABOR NOTES.

In Germany there are 236,000 trades unionists.

Teamsters in Cleveland have formed a union.

Union molders at Abilene, Mich., went on a strike.

Union spinners in Fall River will not work overtime.

Six unions were chartered by the Journeymen Tailors last month.

The clothing workers' unions of New York have formed a trades council.

The Duluth laundry girls have organized a union. They start out with a membership of 50.

The proposition to establish a world-embracing union of seamen is meeting with approval everywhere.

The introduction of the Linotype into the neighbourhood of Victoria, Ariz., will throw out of employment about 70 compositors.

It is stated that not less than 40,000 representatives of organized labor will participate in the Labor Day parade in Chicago.

The biennial convention of the Operative Plasterers' International Association will be held at Cleveland, commencing Monday, Sept. 14.

The consolidation of the two organizations of painters and decorators in Detroit has been completed. The union now has a membership of nearly 200.

An excursion is being arranged from Chicago to Colorado Springs in connection with the Typographical Union convention, which commences in the latter place on Oct. 12.

At Detroit during the year 220 aliens were deported and 200 have been sent back so far this month.

The Metal Trades' Council has fined Metal Workers' Union, No. 1, \$100 and suspended it pending payment, for permitting one of its members to work in the office of Arbeiter Zeitung as a Linotype machinist.

The Butchers' and Grocers' Association has notified the Egg Inspectors' Union that they have endorsed the latter organization, as well as their label, and are ready to assist them when occasion requires.

Chicago trades unionists will deliver Labor Day addresses as follows: Wm. C. Pomeroy, at Louisville, Ky.; D. Douglas Wilson, editor of the Machinery Journal, at Racine, Wis., and Charles Doll, at Dubuque, Iowa.

From all points come reports of active preparation for the celebration of Labor Day. In Detroit the merchants and other business men are giving the unions every assistance, and the same news is reported from Winnipeg.

All efforts towards harmonizing the differences existing between the two organizations of stationary engineers in Chicago have so far failed, with the result that the Hoisting Engineer's Union bids fair to supplant both the old organizations.

Six hundred employees of the Adams Express Company in New York and Jersey City went on strike last Saturday against a 15 per cent reduction in wages. The strikers are laboring with the company's employees at other points in an effort to have them join the strikers.

The International Iron Molders' Union has increased its membership 10,000 within the last year. Since the in-

roduction of the national sick benefit system, last October, over \$20,000 has been paid out, and there is a surplus of \$16,000 in the fund.

Butte, Mont., unionists forced every dealer to drop the sale of boycotted tobacco. The one dealer who refused was boycotted for a month, and then his offer to give \$125 to a charitable institution to have the boycott lifted was accepted.

Gov. D. M. Clough, of Minnesota, has issued a proclamation for the observance of Labor Day, in which he "recommends and requests that on Monday, Sept. 7, 1896, all places where labor is employed be closed, and that every possible opportunity be given all who labor to celebrate the day in a manner befitting the purpose to which it is dedicated."

P. J. Maas, acting for the American Federation of Labor, has organized a union among the riveters employed by the Chicago Shipbuilding Company. It is expected that the new union will soon include all the men employed in that branch of the shipbuilding industry. A special effort is to be made to organize the other shipbuilding trades, with the ultimate end in view of establishing a central council of shipbuilding unions in Chicago.

The printers employed on the Canton Daily Record have been locked out by the managers of the paper. The men a short time previously submitted to a reduction of 8 1-3 per cent in their wages, and an agreement for one year was entered into by both parties. The contract has been ignored by the Record, and the men have been secured to take the places of the locked-out employees at \$1 per night. The men received \$2.55.

The Detroit Free Press says: The failure of the molders in the Detroit stove works to inaugurate a sympathetic strike to assist the striking polishers and locked-out molders has resulted in a feeling of extreme bitterness. This feeling has been growing in intensity as time passed, and it became evident that nothing was to be expected from the molders. A call will soon be issued for a meeting to see, first, if the trouble at the works cannot be adjusted on a basis possible for the men to accept, and, failing in this, to make a demand upon the Molders' International Union that the molders in the shop be ordered out. On the part of the molders, it may be stated that a majority of those working in the Detroit stove works have all along been in favor of a sympathetic strike, and the last time a vote was taken the ballot stood 75 in favor to 45 against.

As the rules require a two-thirds majority to order a strike without the sanction of the international, the attempt failed. Robert Watchorn, Inspector at Ellis Island, New York, says that he made a careful tour of the British Islands last winter, and he says: "I must reluctantly confess that the conditions which surround the British miners are better by almost 100 per cent than those which surround their fellows in Pennsylvania. I found from careful inquiry that the average earnings of British miners are 6 shillings 9 pence a day—about \$1.62 of our money. Besides, they go into the pit at 5 o'clock a.m. and are always to be found at home not later than 2 p.m. Some study of the conditions and earnings of the Pennsylvania miners reveals that their average earnings throughout the year, including the anthracite and bituminous fields, do not exceed 90 cents a day, and they uniformly work 9 and 10 hours a day. The better conditions of the British workman, I think, are due to efforts to better their condition, and they increase their earnings by and through the means of the collective powers exercised by labor unions. They have been more successful because the people are largely of the same nationality, at least, have the same, or nearly the same, social and other customs, language, etc. They have also the advantage of the experience and educational effect of centuries to abate abuses and to improve their condition."

A Pastoral.

Over the meadow fresh and sweet

We wandered, Daisy and I.

And the flowers strewn pathways for our feet.

As we passed by.

Among the whispering grass that

Cheamed the frail anemone;

We trod the path that the fairies made,

Daisy and I.

Fair as the fairest flower that drew

Its glamour from snow-faded sky;

And the laughing light of the summer blue

Was in her eye.

Beneath the murmur of druid tree,

Through pastures of faint perfume,

We tracked the wake of the clover

Over the bloom.

The mermaids listened, all wonder-

ing.

The waters forgot to flow;

The wild-thrush paused when he heard her sing.

The winds bent low.

Were I the lover-like winds that sped

In frolicking fairy skips,

To kiss the curls of her golden head

With luring lips.

I then might laugh as the cuckoos too

That blow from the far-off seas,

And sing as the golden thrushes do

Among the trees.

I then might gaze like the golden sun,

With only one longed-for plan,

And lie concealed in her heart as one

Who only can.

Wonderful Aids.

Diamond Dyes Conduce to Modern

Home Comfort.

The present generation of women are blessed with privileges and aids that our grandmothers never enjoyed.

Among the many important aids in the family the Diamond Dyes hold a high and important place.

Formerly the dyeing operation was a tedious, hard and doubtful job. Today a dress, cape, jacket, coat, pants or vest can be colored, and made to look as good as new at a very small cost.

When troubles arise in home dyeing, it is because you have allowed your dyes to become stale and dangerous to use. The Diamond Dyes are used your work is accomplished in a few minutes, and you are certain of the best results.

Successful home dyeing can only result when you use Diamond Dyes; long years of severe testing have proved this fact.

The Friend of the Aged.

Mack's RHEUMATIC PILLS

OLD people find Mack's Pills their greatest benefactor. They keep the kidneys, liver and bowels acting right, and thus prevent disease, but more especially that dread disease of old age, RHEUMATISM. To those suffering from Rheumatic Affections they are a perfect boon, relieving the suffering and curing the disease. Price 50c a box. All druggists.

When troubles arise in home dyeing, it is because you have allowed your dyes to become stale and dangerous to use. The Diamond Dyes are used your work is accomplished in a few minutes, and you are certain of the best results.

Successful home dyeing can only result when you use Diamond Dyes; long years of severe testing have proved this fact.

A GOLD MINE BEING THOROUGHLY DEVELOPED

The Hill Top Gold Mining Company

Mine Situated at **ROSSLAND** British Columbia.

Capital \$1,000,000.

1,000,000 Shares, par value \$1 each.

Fully Paid-up and non-assessable

OFFICERS:

C. W. RITCHIE, President.
W. A. CAMPBELL, Vice-President.
W. H. ZEIGLER, Secretary.
OLD NATIONAL BANK, Treasurer.
E. W. LILJEGREN, Superintendent.
(Formerly Manager of the Le Roi.)

TRUSTEES:

COL. W. W. D. TURNER, President Le Roi Mine
C. W. RITCHIE, Ex-Manager Solicitors' Loan and Trust Co.
J. F. WHALEY, Financial Manager Spokesman Review
W. A. CAMPBELL, Formerly of Toronto, Mining Broker
J. C. MILLER, Capitalist.

SOUND REASONS WHY STOCK IN THIS COMPANY WILL PAY INVESTORS.

1. It is in the best mining district in the world. All the eminent mining engineers and experts have, upon careful investigation and examination, so expressed themselves.

2. The facilities for transportation are unsurpassed, the mine being able to dump the ore into a chute at the mouth of the tunnel, transmitting it into the cars below, thereby saving the cost of handling twice, consequently many dollars.

3. Cost of mining this ore will be small on account of the steepness of the hill, enabling the company to develop entirely by tunnel, which is conceded a great advantage.

4. The tunnel, which is now 35 feet long, is all in one piece, while not yet rich enough to ship, will in all probability be when completed to the shaft, the assays from such shaft running from \$16 to \$22. The tunnel will strike under shaft at a depth of about 40 feet.

5. Absolute title, fully paid for, full claim 1,600 feet square. The company has no debts, either bonded or floating.

6. The company has received its charter, according to the laws of the State of Washington, registered under the Acts, to do business in British Columbia. This State by statute allowing the full capital stock of a mining company to be "paid up" by the transfer to the company of a mineral claim, thus making the stock fully paid up and non-assessable.

7. The large amount of Treasury stock assures the stockholders of ample means to develop with, but it is estimated it will not be necessary to sell any more stock than that being now offered to put the property upon a self-sustaining but a dividend basis.

Letters from Leading Mining Men Regarding the Property.

W. Fullerton, Esq., Rossland, B. C.

Dear Sir,—Concerning the "Hill Top" mining claim adjoining the "May Flower" mine to the east, I have traced the two veins of the "May Flower" into and through the "Hill Top," where they show up strongly and well defined. The claim is well located for shipping, and I think a good property. Yours sincerely,

(Sgd.) FRANK C. LORING.

Mr. W. Fullerton, Rossland, B. C.

Dear Sir,—It is with great regret that I feel I cannot subscribe at this time for a large lot of the "Hill Top" stock. In order to protect my interests in "The Edna," I was forced to buy out at a big cash price.

The "Hill Top" has the advantage of being high up and permitting tunneling to a much greater depth.

I am feeling very sorry that I cannot at this time go in, yours truly,
(Sgd.) JOHN T. COLE,
Supt. White Bear Mining Co.,
Rossland, July 2, 1896.

Dear Willmott:

I visited the "Hill Top" with one of the original owners today. Found the ledge uncovered in three places, the principal point of operation having a 25-foot tunnel, which shows rock well mineralized and in abundant quantity. This rock is very similar to that taken out of the "May Flower" when their tunnel was first put in. We went over the waste rock below the dump on the "May Flower," and compared it with our specimens from the "Hill Top." It was almost identical.

There is no reason why the "Hill Top" should not show up just as well as when driving in the same distance, as it adjoins, on the same ledge.

It is high above the tramway, and the ore can be easily sent down by a chute. "Hill Top" is a good thing. Push it along.

(Sgd.) KINGHOORN.

To Mr. W. Fullerton:
Thinking Kinghoorn's letter to us, whose opinion on a mining proposition we always count before going into it, might be of value to you in Eastern Canada, we send it. Hoping you are meeting with the success the "Hill Top" deserves, we close as our friends.

THE LEFTCHILD-WILLMOTT CO.

W. Fullerton, Esq., Rossland, B. C.

Dear Sir,—Replying to your favor of the 8th inst., I beg to say that you can certainly consider me an original subscriber in the "Hill Top." I have every confidence in the property, and feel sure that it will become a producer in the near future. I have my remarks upon a knowledge of the property and adjacent claims, more especially the "May Flower."

(Sgd.) KINGHOORN.

(Sgd.) KINGHOORN.

The smelter returns of \$56 per ton exceeded my most sanguine expectations.

Both properties having the same veins, the surface over being identical, leads me to feel that the "Hill Top," upon the completion of its cross-cut tunnel, will be able to ship pay rock at an early date.

Hoping that you will have no trouble in closing the deal, and awaiting your further advice, I desire to remain, Yours truly,

W. W. D. TURNER,
Pres. Le Roi Mining Co.,
Rossland, B. C., Aug. 1st, 1896.

To the Directors of the Hill Top Gold Mining Co., Spokane, Wash.:

Gentlemen,—According to your directions, I have made a careful examination of your "Hill Top" property at Trail Creek, B. C. The claim is about 1 mile from Rossland. The Columbia and Western Railroad almost skirts its borders. It is a full claim, being 1,500 feet square. It adjoins the well-known "May Flower" (Olla Podrida) mine on the east and embraces the continuation of its well-known parallel ledges, which are traceable on the surface for the entire length of the "Hill Top." The formation is Diorite, being the same as that encountered throughout the entire district, and in which is found all of the great mines of the above-named district. The strike of the veins is easterly and westerly. The veins, as far as opened by tunnels, cuts and shafts, show extremely large. The two ledges on this property are known as the north and south veins. So far, the work done has mostly been on the south vein. A shaft some ten feet in depth toward the west end line shows some very fine sulphide and galena ore. A cross-cut now in 50 feet, is being driven to tap the south ledge about 400 feet from the east end line. Though considered in country rock, it has cut several fine stringers of ore which presages what can be expected when it comes in contact with the ledge proper, 80 feet from the surface. Considering the dip, the face of the tunnel is now within 80 to 40 feet of the ledge. Besides the above, there are numerous cross-cuts, open cuts and pot holes throughout the entire length of both ledges, showing that the "Hill Top" is a very rich property. An examination of the present workings and samples taken therefrom

give the following results: No. 1, from 10 foot shaft, \$9 in gold and 11 ounces of silver. No. 2, from cut in center of the claim, south ledge, \$8.40 gold and 8 ounces silver. I understand that several assays running much higher in values were obtained immediately above the tunnel. In view of the fact that these assays are from ore taken at or near the surface,
