woman, doctors are frequently criticized very severely. For instance, disease in the kidneys is one of the last ailments for which a doctor looks when treating women. This is a great mistake. Women are very prone to kidney trouble and in fact many physicians

attribute a woman's languor and ill health to a derangement of the genital organs, when it's simply plain kidney disease, and nothing else. Many so supposed female complaints are either bladder or kidney diseases. Sick kidneys, of course, make associate organs sick also. The result is back pains, bearing down sensations, utter weariness and headache. But Dr. Hamilton's Pills go right to the spot. They put life into the kidneys that makes a worn out woman feel like new.
