

RESURRECTION ROCK

by Edwin Palmer
Little, Brown and Company

CHAPTER I.
ABOUT the clear, deep waters of Lake Superior, and bounding the northern shore of Michigan, lies a realm of forest and of heights, rugged, wild, stirring—rich in copper and iron as are few other regions of the world. Kingdoms which won wide influence have owned far meaner materials of power: empire has warred with empire for stakes half as great.

In fact, France and her Indian allies long ago garrisoned forest stockades in war with England over this territory. England defended the region against the colonists.

But later the strength of the United States confined the struggle for possession to personal and individual combat of man against man—by right, by strength, by wit, by trick or by violence, open and secret—for the winning of power and wealth.

Here and there, where something had happened—good or for evil—which a man might never forget, the ghosts drew back to living.

At least, men thus explained the return of Lucas Cullen to St. Florentin, the younger of the two Cullen brothers, in 1896 suddenly appeared, and, upon the site of the cabin where he and his wife lived when they founded St. Florentin and located the men building the first sawmill, he caused a new, enormous dwelling to be erected.

Lucas called this a summer cottage; and made it famous by waging there for the summer the French nobleman, the Marquis de Chenal, "a friend of my daughter Cecilia." The Marquis so well liked Cecilia and liked the place—so to mention Lucas Cullen's millions—that he remained at St. Florentin all summer.

He married Cecilia that winter and took her—along with a million or so of Michigan forest money—to his chateau in Touraine; and neither of them ever returned to the peninsula. But Lucas and his wife and their younger daughter and their two sons came the next year; then Deborah married a westerner and moved to Wyoming. "Junior" Lucas and his brother John also married, and their wives preferred the more fashionable resorts of the East for the next summers.

So, at the turn of the century, old Lucas and his wife were coming alone to the enormous frame house on the edge of the ruined old mill town above the shores of Lake Huron.

The real reason for Lucas's retreat from Chicago was his break with his brother John. They had always quarreled; but now they ceased to speak, and the same streets could not hold both.

The purpose of the builder of the other great house near St. Florentin was far more puzzling. The site was upon a tiny island in Lake Huron, half a mile from shore, a rocky, precipitous islet locally known as Resurrection Rock.

In the summer of 1912 barges appeared and anchored in the smooth water between Resurrection Rock and the shore, artisans of a dozen trades lived upon the barges while they erected a large, handsome house, chimneied, wide of roof, graceful and pleasing.

But no master of the mansion appeared. Instead, the newly completed house was closed; doors locked and barred, windows soundly shuttered. A white farmer who lived a mile or so away upon the opposite mainland, was entrusted with the keys, and was paid to inspect the premises periodically. Yes; it was an ordinary enough house, he reported.

But, after a few inspections alone, he always took someone with him. Speculation and wonder in the neighborhood soon took weird and fantastic forms. Poor, foolish people ceased to approach. At first old Lucas Cullen laughed at the story; but at last time went on they began to affect him.

The thing obsessed him. He was an old man now, over seventy, but hardy and strong, clear of eye, steady of hand, vivacious and meddlesome yet to all who opposed him. In all his long, violent life no one—and nothing—was known to have shaken him until someone, without reason, raised that house on the islet locally known as Resurrection Rock.

CHAPTER II.
THE express from Chicago for Lake Superior and Sault Sainte Marie—made it famous by waging there for the summer the French nobleman, the Marquis de Chenal, "a friend of my daughter Cecilia." The Marquis so well liked Cecilia and liked the place—so to mention Lucas Cullen's millions—that he remained at St. Florentin all summer.

He married Cecilia that winter and took her—along with a million or so of Michigan forest money—to his chateau in Touraine; and neither of them ever returned to the peninsula. But Lucas and his wife and their younger daughter and their two sons came the next year; then Deborah married a westerner and moved to Wyoming. "Junior" Lucas and his brother John also married, and their wives preferred the more fashionable resorts of the East for the next summers.

JACK DAW'S ADVENTURES

"GIVE ME THAT HORSE, AND I'LL BE QUIET THERE," SHRIEKED THE CHIEF. "DO YOU WANT THEM TO FIND US? THEN JACK PEEKED OUTSIDE AND SAW HORSEMEN ALL ABOUT THE DUGOUT."

"I LOOKED AS IF THE STRANGE RIDERS WOULD TRAMPLE RIGHT INTO THE HIDING PLACE. SUDDENLY, HOWEVER, THE LEADER ORDERED HIS MEN TO RETURN TO THEIR OWN CAMP AND GIVE UP THE SEARCH."

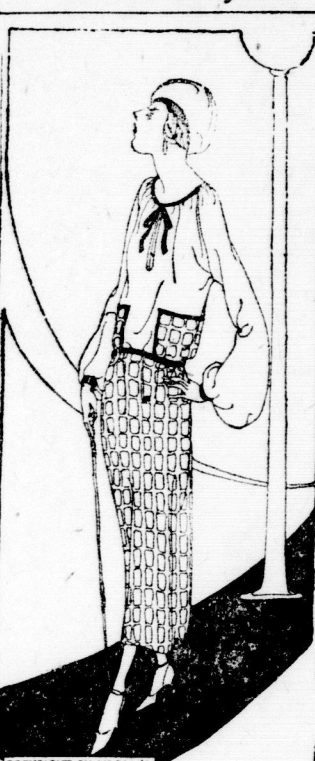

"WE WERE LUCKY THAT TIME," SAID THE CHIEF. "THEY DIDN'T SEE US AT ALL! THEN THINGS REMAINED QUIET UNTIL THE STRANGE HORSEMEN HAD TRAVELED FAR AWAY."

"SHORTLY JACK WHO ORDERED BACK TO THE LOOKOUT POST FOR THE NIGHT WATCH, FLIP FOLLOWED JACK UP THE HILLSIDE AND JACK WAS GLAD BECAUSE THE DOG WAS GOOD COMPANY. CONTINUED IN NEXT CHAPTER."

Plain Gown For Work Days

WHEN the first fall frocks appear there is always a demand for simple dresses of the sort designed for school girls or the young woman.

This special type of dress is usually trim and simple in its lines and inexpensive, but by no means ungraceful of fashion and attractiveness.

Wool jersey has been the favorite material for these dresses during the past few seasons and seems likely to be this fall as well.

They are seen in the most expensive of specialty shops as well as in lower priced stores and the distinguishing charm is usually a bit of different looking trimming or a pleasing combination of colors.

This season there are new woolen fabrics as well. One is wool crepe, lighter than jersey and shown in either plain or striped weaves.

One wool jersey shows a silk pattern. Other woolen styles have block patterns of various kinds.

Smooth finished materials seem to be preferred. There need be no lack of variety, at any rate, no matter how simple the style of the dress may be.

Corns Go
Just say **Blue-jay** to your druggist

The simplest way to end a corn is Blue-jay. A touch stops the pain instantly. Then the corn loosens and comes out. Made in a colorless clear liquid (one drop does it) and in extra thin plasters. The action is the same.

Pain Stops Instantly

REMARKABLE LETTER

Canadian Woman Recommends Lydia E. Pinkham's Vegetable Compound

Winnipeg, Manitoba—"I can not speak too highly of what Lydia E. Pinkham's Vegetable Compound has done for me. I was a nervous wreck and I just had to force myself to do my work. Life was a misery and work was a burden. Even the sound of my own children playing made me feel as if I must scream if they did not get away from me. I could not even speak right to my husband. The doctor said that he could do nothing for me owing to my condition, but told me to expect another miscarriage. My husband's grandmother advised me to take Lydia E. Pinkham's Vegetable Compound. I started it right away and everything noticed what a different woman I was in a short time. I went and engaged my doctor and he did not know me, I was so well. I was able to do my work once more and it was a pleasure, not a burden. Now I have a 'fine bouncing baby' to use the doctor's own words. I am able to nurse her and enjoy doing my work. I can not help recommending such a medicine, and anyone seeing me before I took it and seeing me now, can see what it has done for me. It can do the same for anyone in my condition. I am too pleased for you to use my testimonial."—Mrs. EMILY DAVIS, 721 McGee St., Winnipeg, Manitoba.

A GREAT LAKES CRUISE.
Travelers to Sault Ste. Marie, Port Arthur, Port William, Duluth, Winnipeg and points west, will find the Great Lakes tour a delightful break in a comparatively long journey. The freedom, the clean, cool comfort, the fun on shipboard, the concerts, promenades and dances, the excellent meals, appeal to all who travel on the palatial steamers "Noronic," "Huron" and "Huronic," that sail from Sarnia, Ont., Tuesdays, Thursdays and Saturdays. You will enjoy the sail up beautiful St. Marys River, the thrill of passing through the "Soo" Locks, and the visit to Canada's twin cities, Port Arthur and Fort William. For illustrated descriptive matter and all information apply to any Canadian National Grand Trunk ticket agent, or to C. E. Horning, D.P.A., Toronto, Ont.

Radio Radiations

THE perpetual motion puzzle may yet be solved.

Through the use of radio! This is the ray of hope that may light inventors to realization of their fondest dream—a machine that, once started, would continue to operate forever on its own energy.

Mechanical engineers have discouraged the invention of such machines. None that has ever been produced has proved successful. Either friction would intervene or there would be some other cause for a waste of energy which would mean a gradual decline in the instrument's motion.

Still, there are some who are secretly striving to complete an instrument which would prove to the world that perpetual motion is possible.

For these, radio comes forth to assist them. The idea is free to all who care to take advantage of it. It is this:

Static has been bothering radio fans ever since they put up an antenna to receive signals. It is a grating, grinding noise that spoils many a radio concert and makes life miserable for the amateur. From a scientific viewpoint, static is nothing but an atmospheric disturbance.

Ah, there's something in the air that causes this noise! And a radio antenna is what collects it!

Do you get the idea? Noise—or sound—is a product of energy. Energy out of the air!

There's the solution to the perpetual motion puzzle.

There may be friction. There may be other waste while the perpetual motion machine is running, but so long as it derives its energy out of the air, it might be made to keep going forever, in spite of this waste.

So long as the earth revolves, this supply of energy will be at hand. Why not use it?

26 Years Developing.

The progress of radio has not been so fast, as its last year's development would lead people to believe. In fact, it has been even slower in gaining popularity than the automobile.

Special train will leave Exhibition Grounds 10 p.m., August 31, September 2, 4, 6 and 8 for London, stopping at Sunnyside, Port Credit, Oakville, Burlington, Hamilton, Brantford, Paris, Woodstock and Ingersoll. For particulars of reduced fares apply to ticket agents.

Refreshes Weary Eyes
When your eyes feel dull and heavy, use Murine. It instantly relieves that tired feeling—makes them clear, bright and sparkling. Harmless. Sold and recommended by all druggists.

MURINE
for your EYES

SMALL FROSTED CAKES

1/4 cup butter, 1/4 cup milk, 1 cup sugar, 1 1/2 cups flour, 2 eggs, 2 teaspoons baking powder, 1/2 teaspoon vanilla.

WORK butter and sugar together until creamy. Add the eggs well beaten. Sift flour and baking powder and add to the butter and egg mixture alternately with milk. Add vanilla and beat well. Bake in small buttered patty pans or muffin tins 20 minutes in a moderately hot oven.

This recipe will make 18 patty pan size cakes or 24 of the 2-inch muffin tin. All small cakes must be baked in an oven having it hotter at first than for larger cakes. Decrease the heat after the cakes have risen to the top of the pans and become slightly brown.

It was 26 years ago that Marconi succeeded in signaling without wires for a distance of 100 yards. For years before 1896 he had been experimenting on his father's farm in Italy.

One year later he signaled nine miles and in two months increased the distance to 12 miles. In July 1898, he signaled 20 miles and in 1901 his wireless message crossed the Atlantic Ocean.

Rich Cream for the millionaire's table and for all who enjoy real thick cream

AMONG the first to use Keepsweet Cream were some of the richest people in Toronto—people who could afford to buy the finest, richest cream, regardless of price.

For years they've wanted a cream like Keepsweet—a Cream so thick and rich and full-flavored that it is comparable only to the famous Devonshire Cream of Old England.

And so they bought Keepsweet Table Cream and found it wonderful—

It was a real coffee cream—
Delicious on cereals and puddings—
A treat with deep apple pie—
Glorious on sliced peaches—
And surprisingly cheap.

A Great Success

Soon the news of Keepsweet Cream spread all over Toronto. Then to other cities and towns. In record-breaking time, there was a demand for Keepsweet Cream from the Atlantic to the Pacific. Keepsweet is the cream everybody has wanted for years.

Keepsweet is real cream, skimmed from fresh, sweet milk from selected dairy farms. Nothing is added. Nothing is taken away. It is sterilized by the Keepsweet process and will keep sweet, pure and fresh in the tins for months. Of course, after a tin is opened Keepsweet must be cared for just the same as ordinary fresh cream.

Not Condensed

Keepsweet Cream is not evaporated nor condensed. It is not chemically treated. It hasn't any strong taste. It's simply delicious! Its Devonshire-like flavor will make you a Keepsweet enthusiast.

Think how handy it is to have several cans of pure, sweet, thick Keepsweet Cream on the pantry shelf always ready for use. And never any chance of it spoiling!

Order a supply from your grocer. Two sizes: 6-ounce and 11-ounce cans. The price is moderate, considering the superfine quality, richness and thickness of the cream.

Dominion Milk Corporation, Limited
Head Office: TORONTO
Branches: Halifax, St. John, Montreal, North Bay, Port Arthur, Winnipeg, Vancouver.

Keepsweet Milk
The Safe Milk

Keepsweet Milk is sweet, fresh cows' milk, sterilized by the same process as Keepsweet Cream. It is whole milk. Not skimmed. Not diluted. Not evaporated, condensed for powdered. No water needs to be added. No preparation required. Just pour Keepsweet Milk from the can into a jug and use. Delicious flavor. Absolutely pure. The safe milk for children, for everybody.
