The costumes, all designed under the instruction of Miss Emery, the art teacher, are very effective and will add greatly to the effect of the pointed out that the earliest forms of music probably took on more of a operetta. The speaker stated it is generally accepted that music was first used for religious purposes. And he gave a number of quotations from scrip-ture and early historians to show how closely music entered into the religious life of the people.

Most of the organists present took part in the debate which followed the reading of the paper, and the general opinion seemed to be that the question of major or minor did not concern the people in earliest times. They simply gave expression to their feelings in a few simple notes of the scale, and in some cases these took on a major and in other cases a ninor strain.

The report of the choir festival

held at Dundas Center Church on April 7 showed a better result than he previous year, and the organists feel justified in making a greater effort for the future success of the estival. Some discussion took place with regard to a proposed picnic to be arranged for in the near future. During the evening refreshments were served by the hostess, and a ery pleasant social hour was spent.
