The Outside meat market is getting smaller nd now carcases are being limited to alves principally and a few beeves. Beef is rm, at \$6.50 to \$7 per cwt. Veal sells Il the way from 3c to 6c a pound. Owing to the igh price and increased demand for mileh cows great many calves are being killed young in der to obtain the milk, and hence veal is getng to be a g ut, and will be for a short time.

Pork was scarce, at \$7.25 to \$7.50 per cwt. Butter was easy, at 16c to 18c per pound. Eggs carce, at 13c a dozen.

Potatoes were easy, at from \$1.25 to \$1.50 per

Without Λ Doubt.—There is no doubt that Hagyard's Yellow Oil is the best remedy for Sprains, Bruises, Sore Throat, Colds, Rheumatism, Croup and all Aches, Pains, Lameness and Soreness. It is used externally and internally, and should always be kept in the house.

The peripatetic prowlers around ash heaps may be said to live in the garb-age H. A. McLaughlin, Norland, writes: "I am sold out of Northrop & Lyman's Vegetable Dis-covery and Dyspepic Cure. It sells well, and I find in every instance it has proven satisfactory. I have reason to believe it the best preparation of the kind in the market." It cures Dyspepsia, Billiousness and torpidity of the Liver, Constipa-tion, and all diseases arising from Impure dlood, Female Complaints, etc.

Popular Science Monthly. Mr. A. A. Common believes that se tronomical objects can be studied to bet ter advantage in photographs than in t em-selves. The brain cannot always take in selves. The brain cannot always take in the perceptions of the eye fast enough, and the eye is not sensitive to images whose brightness falls below a certain limit. In photography a protonged exposore may be made to compensate for deficiency in luminous power, and the sensitive plate being competent to respond to quicker vibrations than the eye, it is possible to obtain photographs of celestial objects radiating light which the ye is not adapted to receive. Waile the moon has received much attention, the photographs of it taken by Rutherford photographs of it taken by Rutherford wenty years ago have not been superseded. The power of photography to portray the nebulæ has been thoroughly demonstrated, the art has been applied to the observation of comets, and may yet be brought into play for the paths of meteors, the discovered covery of new planets and other purposes hardly thought of. After remaining near-vistationary for years, "at a bound it has gone far beyond anything that was expected of it, and bids fair to overturn a good deal of the practice that has hitherto existed among astronomers."

A St. Louis hotel clerk claims to have made the discovery that tall men sleep later in the morning than short men, and that persons of a dark complexion invar iably require more rest than blondes.
