# Mountain Barriers Handicap Italy's Red Cross Workers

MONTREAL

A STATE OF THE PARTY OF THE PAR

Over Italy's far-flung 450-mile ing the Italian wounded down the battle line where Austria, aided by mountain trails. Intense suffering and often death is caused before the nature in the fee-bound ramparts of the Alps, has striven to keep free Italy shut out from enslaved Italy, the Italian Red Cross Society is heroically waging its fight for the relief of suffering humanity against odds far greater than those surmounted by the Red Cross banner-bearers on other Allied battle fronts.

On the western front the automatic and often death is caused before the hospitals, miles away, are reached. Treacherous snow, it cannot be and often death is caused before the hospitals, miles away, are reached. Treacherous snow, it cannot be available and often death is caused before the hospitals, miles away, are reached. Treacherous snow, itee and rocks, and the extreme cold, cause many calculate among the Italian soldiers. Thousands of amputations have resulted in the two years of warfare among perpetual snows. The Italian Red Cross Society and the Royal Italian Government countries of the control of the countries of the control of the countries o

the though supplies are scarce.

But the task of caring for the Italian wounded among the unstable snows and mountains of the Alps is almost inconceivable. Often the sufferers must be transported in box-like cars sliding on overland by the sufference of the suffer head cables or even lowered by trenches, be he Canadian, British, ropes down the mountain sides. On Italian, or other ally, makes more sense stedges or by burrow back are efficient fighting forces—thus hastening the war's end.

On the western front the automobile ambulances quickly speed soldiers ask of their Canadian ally back the wounded from the front lines. Likewise medical attention and hospitals are near at hand for Ontario have fixed a goal of \$100,-000 to be raised by popular substantial and the second state of the second se

war against Germany and its hor-rors. Every fit fighting man in the trenches, be he Canadian, British,

## Daughter of the Captain of the

Steel Industry.

CARNEGIE HEIRESS

INTEREST IS PHILANTHROPY.

In Case Mr. Carnegie's Health Fails, as Is Reported, This Young Lady May Find Herself One of the Richest Daughters of America.

Miss Margaret Carnegie is the only child of Andrew Carnegie, whose indisposition has attracted much notice. She is twenty years old and was graduated in May, 1916, from a New York private school, in which she took the

English course,
She was a leader in the school and achieved a high standard of scholarship. Her special interest is civic and philanthropical movements, and for two

### MISS MARGARET CARNEGIE.

years, despite her age, she has been vice president of the Armstrong league. which concerns itself especially with the dissemination of information regarding the Indian and the negro. It has been the policy of Mr. and Mrs. Carnegie to shield their daughter

as much as possible from publicity. "She is the only one of my treasures I want for myself," is what Andrew

Carnegie says of his daughter, who devotes so much of her time and affection, along with her mother, to the care and pleasure of the aged finan-

The world awaits with interest the special use this heiress of the Carnegia millions will make of her opportunity.

### DISH WASHING.

How to Do This Drudgery Fairly Easily. Save up your soiled dishes and wash

them only once a day. By so doing you can save something like an hour and a quarter a week. Eleven min-utes per day was the actual time saved

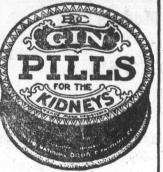

in a recent experiment.

Piles of dishes waiting to be washed three times a day year in and year out throw a damper over the finest of housekeepers. If only the drudgery of dish washing could be disposed of once a day instead of morning, noon and night kitchen work would be in greater

demand than it is. The careful housekeeper will always resent the suggestion that once a day is often enough to wash dishes. She cannot train herself to allow soiled plates and silverware to stack up from one meal to the next, for she has been taught that such actions are the evidence of shiftless, slovenly housekeeping. As a matter of fact, along with many other notions which are fixed in the operation of the home both time and energy are saved by cutting out two of the three daily dish washing

The experience of one housekeeper bears out this statement as true. "One week I washed dishes twenty-one times," she says. "The next week I washed dishes seven times. During the two weeks I planned the meals so that the same number of dishes could be used on each day. I found that while it took fifty-two minutes each day to wash my dishes three times it took only forty-one minutes a day when I washed them all at once."

## For Pain in the Back

Also for Swollen Joints and Ankles, Constant Headaches, Urinary and Bladder Troubles and all Irregularities of the Kidneys.

the interruption of other duties. It does not estimate the amount of gas or fuel saved by heating water to boil-ing but once instead of three times a day and nothing of the soap saved.

### Cucumber Pickles.

Twenty-four large cucumbers. Cover with boiling water (be sure water is boiling) and a piece of alum size of top of the thumb. After five minutes lift the cucumbers out, wipe dry carefully. Put into stone jar, cover with cold cider vinegar and small piece of alum. Put cover on. If in a few days a scum arises give new vinegar and alum. then cover and put away.

### The Eskimos at Home.

The Eskimos at Home.

Some interesting and amusing information concerning the aboriginal inhabitants of the Arctic regions is contained in an article, "Wireless with the Eskimos," by Douglas R. P. Coats in The Wireless World. The author kept a diary of his experience while on a voyage to Bafin Land and Hudson Bay on board the Nascopie, a sealer and ice-breaker engaged in carrying supplies to various Hudson Bay stations in the Far North— "The Eskimo at home was rather

"The Eskimo at home was rather a surprise. I was taken to a wooden hut, which belched forth the Eskimo stench as we opened the door. There were four or five inhabiting the hut, and they lived in a state of semicleanliness, perhaps superfor to many of our brethren in civilized slumland. They all assumed the happy Eskimo smile as we entered their dwelling and arose politely to their feet. Snowshoes and various sealfeet. Snowshoes and various sealskin garments hung upon the walls, while from the shadow in one corner protruded the horn of a phonograph! protruded the horn of a phonograph! It seemed so utterly incongruous, this possession of an up-to-date marvel by a family who ate raw seal and whose children Leilghted, most likely, in nothing better than chewing a piece of walrus hide, that I wanted to laugh. I had not heard then of the passionate love which the Eskino has for music. In some regions, where missionary influence is strong, he has his own brass band, and prouces horrible noises in t of mastering the trombone or eu-phonium—just like ourselves.
"The smile of the Eskimo is a con-

me smile of the Eskimo is a continuous one. When he is hurt he smiles; when his kyack upsets and precipitates him into icy water he smiles; when he is friendly he smiles again, and when he is not friendly I am willing to wager that he smiles to. It palls upon one who is not accustomed to it, and I was not sorry when we bade the family good-bye and went out into the fresh

### Imperial Titles Urged.

Apropos of the recent change in the Royal titles a correspondent of The Morning Post suggests that the The Morning Post suggests that the younger sons of the King should take some Imperial designation for life. Ontario, Quebec, Nova Scotia, etc., might very euphoniously and advantageously emphasize the common heritage of the Empire.

### A Copper Country.

British Columbia is becoming one British Columbia is becoming one of the world's leading copper producters. Production is showing rapid strides. In 1915 the increase in amount was 11,908,706 pounds over the previous year. For 1916 there was a still further increase over 1915 of about 17,000,000 pounds. The estimate for 1917 is 73,000,000 pounds.

### Use of Concrete.

Many large structures are now their foundations are composed of this useful material, necessitating the mixing and placing of very large amounts of other material.

### Iron in British Columbia.

It is estimated that there are 40,-225,000,000 tons of the best iron ore in British Columbia: these re have scarcely been touched yet.

## Apples for England.

During recent years the exports of Canadian apples to the United King-dom have totalled about 1,500,000 barrels per annum.

Hard and soft corns both yield to Holloway's Corn Cure, which is entirely safe to use, and certain and satisfactory in its
