

EXTENSIVE WORKS

OF THE

Massey Manufacturing Co., Toronto

The wood engraving on this page does not now fairly represent the works of the Massey Manufacturing Company as they exist—several very large additions having recently been made and more being in progress. The buildings as they stand measure in length 1,270 ft., the main factory being 540 x 50 ft., 4 stories in height, including basement. The knife and bar works 100 x 36 ft., two stories, and the blacksmith shop and foundry 270 x 60 ft. The whole would be equal to a one story building 40 feet wide, 3,540 ft., or nearly three-quarters of a mile

long, and in addition to this, large warehouses in the city are rented for storage until the Works can be still further enlarged.

Four powerful steam elevators manufactured in Cincinnati, Ohio, are placed throughout the Main Factory to convey materials or finished machines from one flat to another. The entire premises are heated by steam, and lighted by gas, until arrangements can be made to put in the electric light.

Two engines of 125 H. P., and three boilers supply the power used. One more large engine and two more steel boilers of 60 H. P. each are to be added to the power at the earliest possible date, owing to the large increase in the number of new and special machines and tools being placed in the Factory, requiring great power to run them.

A more extended report of the Works will be given in a subsequent issue.

We have entered upon our fourth year in Toronto.

Yarmouth, Ont., Dec. 27th, 1882.

To the Massey Manufacturing Co.:

I purchased one of your Massey Harvesters last season from your Agent, James Byrnes. The majority of Canadian manufacturers are represented in this section and I assure you I would not exchange with any of them. I cut without a break over 80 acres of rough land, which is the best record this neighborhood can show.

DAVID VARTY.

Now is a good time to send in your order for a Massey Mower.

Massey and Toronto Mowers, Massey Harvester and Toronto Reaper, Toronto Cord Binder, Massey Low Down Binder, Sharp's Horse Rake.

BUSINESS ESTABLISHED 1847. INCORPORATED 1870.

REMOVED TO TORONTO 1879.

The best located, best appointed, and largest establishment of the kind in the Dominion.

6,200 Reapers, Mowers and Binders, and 4,200 Horse Rakes being manufactured for the Season of 1883.

Asphodel, Jan 1st, 1883.

The Massey Manufacturing Co.:

Gentlemen,—

I purchased of your Agents, T. H. Clark and Morton, two years ago, one of your Massey Harvesters and cut 80 acres each year without any breaks. It has cost nothing to run it except oil, though my land is very rough and stumpy. It gives me good satisfaction, it being strong, of light draught and durable.

JOHN PEAT.

Every Machine turned out by the Massey Manufacturing Company is run by power before it leaves the Factory.

The Massey Manufacturing Co.,

T. J. McBride, Mgr.,
WINNIPEG, MAN.

Eastern Branch—

A. P. Tippet & Co.,
ST. JOHN, N.B.

Percy, Northumberland Co.,
January, 1883.

The Massey Manufacturing Co.:

Sirs,—I have used the Sharp's Rake manufactured by you for some two years with much satisfaction and believe it to be unequalled by any other for good work and is also very durable, having broken but one tooth during the time.

CHARLES HUYCKE.

TWENTY-FOUR Steel Rake Teeth are used in Sharp's Rake. Count the number used by other Makers of Horse Rakes. Note carefully all the valuable features desirable in a Horse Rake, and you are sure to buy a Sharp's.
