

"For stock-raising purposes the district is unequalled, as  
"the supply of hay is unlimited, and a man can raise as  
"much stock as he is able to cut fodder for.

"DAVID CHALMERS,  
"St. Anne, Point DuChene."

"The potatoes raised here are the finest I ever saw. I  
"have not been in the country but one year, but I am very  
"well pleased with it. All kinds of roots grow better and  
"larger here than in Ontario.

"WILL. STAPLE,  
"As inboine."

"I started with one cow, one horse and a plough 18 years  
"ago, and to-day my assessment was for \$1,300. I did not  
"fail one crop yet in 18 years of my farming here, and I  
"must say this year's crop is better than I have had before.  
"You can depend upon me.

"BENJAMIN BRUCE,  
"Poplar Point."

"Rye does well in this country. I have been in Scotland,  
"England and the United States and in Ontario, but this  
"country beats them all for large potatoes.

"ROBERT BROWN,  
"Farnsfield."

"I would suggest that intending settlers to the North-  
"West who come to settle down on prime land should  
"break up an acre or two around where they build, on the  
"West, North and East and plant with maple, cedar. Plant  
"in rows four feet apart, the seeds to be planted one foot  
"apart; they afterwards can be thinned out and transplant-  
"ed. I have them 12 feet high, from the seed planted four  
"years ago, and they will form a good shelter. I find,  
"after a residence of nine years, that this North-West  
"country is well calculated for raising the different kinds of  
"grain sown by farmers. Market prices are very good.  
"Wheat 85c. to \$1.15, oats 50c. to 60c., and barley 60 cents.

"JAMES STEWART,  
"High Bluff."
