

The Art of Selecting

We do not carry an indiscriminate stock of millinery. All our lines are selected for some special merit of quality.

For instance, in Ostrich Feather Boas we are the exclusive agents for a French exporter.

Ostrich Feather Boas, in short, medium long, extra long lengths, colors grey, light and dark grey, tulle, all cream color, white or black. \$14 to \$50

Your "Fagged" Feeling Is Spring Sickness

This Unhealthy Weather Will Intensify Your Exhaustion Unless You Have Good Medicine.

Time won't help; matters grow worse instead of better, if your system isn't rid of its poisonous burden. Your blood is not only thin, but is contaminated with a whole winter's accumulation of wastes. A stimulating blood tonic is required. What's it going to be? Not bitter or alcoholic dope, but concentrated cure in the form of "Ferrozone," which is known as the best of all spring rejuvenators.

Husband was married only last Christmas to Miss Theresa Rutherford, who for a number of years was school teacher at Newtonbrook.

Next Sunday Rev. J. C. Robertson, secretary of the Sunday School bureau of the Presbyterian Church, will conduct the evening services at Davenport-road Presbyterian Church. The Trusts and Guarantee Company are applying for administration of the estate of Wm. Burton, farmer. It is valued at \$6800, including a 130-acre farm, worth \$5000; cash, \$275; book debts \$600; horses and cattle \$275; household effects, \$150. His daughter, Edith Margaret, receives the entire estate.

St. John's, York Mills. At St. John's Church, York Mills, Rev. R. Ashcroft, occupied the chair. The annual statement was adopted. The meeting was of the most harmonious character, and votes of thanks were tendered the rector, the retiring wardens, Miss Wilsdale, Mr. Short and the people's warden, and the rector named John Mackenzie. The election of sidesmen resulted Messrs. MacKenzie, Brown, Wilsdale, Smith, MacKenzie and Heslop. The lay representatives are Messrs. Jarvis, Short and Chadwick.

St. Clement's, Eglinton. The rector, Rev. W. J. Powell, reported a substantial increase in membership at the annual vestry meeting, the number being over 30. The attendance was 2300. Twenty-two were confirmed. The rector preached 25 sermons outside his parish, and made 137 personal visits. The rector was pleased with the increased activity and missionary enterprise shown by the ladies' auxiliary and young girls' auxiliary, as well as by the Brotherhood of St. Andrew. In reference to the literary last term was better than in any previous year. There being five teachers. The rector's warden, Bernard Howson; people's warden, H. Waddington; sidesmen, Messrs. Grundy, Waltho, Molycaux, West, D. Waugh, Williams.

St. Barnabas, Chester. At St. Barnabas' Church the rector, Rev. Mr. Vipond, presided over a well-attended vestry meeting. The increase in communicants was 38 per cent. over last year; increase in evening services, 13 per cent., and in Lenten services, 73 per cent. During the year 44 confirmation meetings were held, while 12 services were conducted in railway camps. Of baptisms there were 22, marriages 11, and deaths, six. The recent addition to the church building furnished accommodation for 50 sittings, and even with this the seating capacity is taxed.

At the Theatre to-night "Murad" (plain tips) Turkish Cigars are the latest and best achievement of Allan Ramsay, for sixteen years government expert of Turkey. During this period Mr. Ramsay's cigars—his alone—were the accepted brands of the dignitaries of the Turkish court, 15 cents per box.

Carter, Manton and Turner, delegates to synod, Messrs. Sturdy, Howson and Waugh. The clergy, wardens and sidesmen are a committee to formulate a plan to enlarge the church. H. Waddington reported contributions during the year of \$2208.65, and expenditures of \$1975.40, with a balance on hand of \$233.25. The Sunday school building fund showed receipts of \$111.78. The financial report for the Sunday school showed contributions of \$472.16, and other donations of \$51.75. Mr. Waddington stated that although there is a surplus of \$386.28, yet when the interest is paid on the mortgage of the rectory there would be but \$167.53 remaining in the treasury. It was decided that the rector receive \$140 out of this, and the organist, Robert Bouden, \$25; also that the organist in future receive \$50 a year.

St. John's, Norway. Rev. W. L. Baynes-Read, rector, presided over the largest vestry meeting in the history of St. John's Church. The financial and other reports presented were of a most satisfactory nature. The receipts were \$2117, and the expenditure, \$2121.47, leaving a balance of \$55. The amount received was \$200 in excess of last year. The rector's warden is R. F. Wagner, and the people's warden, J. H. Curran; delegates to synod, S. B. Philpott, W. H. Paget and Dr. W. F. Clarke; rector's sidesmen, J. M. Miller, A. G. Allan, R. H. Stewart, A. Hogarth, J. A. Curzon, Chas. Lennox, Dr. W. F. Clarke, Wm. Loriman, J. H. Hird, A. F. Clesley; people's sidesmen, J. A. Regal, J. E. W. Millin, Thos. Weaglin, H. W. Waters, A. W. A. Hatoron, W. J. James, R. McNair, W. J. Elliott, N. Strepton; cemetery board, J. V. Philpott, G. A. H. J. W. Millin. The rector was voted \$450 toward the payment of an assistant. The question of a vestry choir was discussed very warmly. The matter was held in abeyance, pending a public meeting, which will be called in the near future. During the past year the sum of \$200 has been written off the church debt. The Fogk building has been purchased for a rectory.

Home-Made Fertilizers. Home-made fertilizers are often of more value than the commercial products. Where there is a supply of bone to be had a very efficient product can be made right on the farm at little expense. The directions for the preparation of the material is given in an exchange: Spread the bones in a layer from four to six inches deep and cover with freshly burnt quicklime to an equal depth. Then should follow a layer of about the same thickness of much peat or good loam. This order is then repeated until the heap is, say, three feet high, the final layer of muck being somewhat thicker, say, five inches or more. By means of a stout pointed stick or iron rod make a number of holes thru the mass and pour in water sufficient to make the heap damp. The water should be of dimensions to retain the heat caused by the slaking of the lime and the fermentation of the muck for six or eight weeks, when, if all has worked satisfactorily, the bones will be quite brittle and the heap can then be shoveled over to mix the various constituents.

Radical Measures Needed. Farming World: The prevalence of glanders in several parts of Ontario at the present time would seem to be of a character of considerable menace to our horse breeding interests. For some time this insidious malady has been manifesting its presence in different places, and the efforts which have been made for its eradication, while undoubtedly of incalculable value in checking its ravages, have not, so far, availed to the extent of stamping it out. On the contrary, there seems to be a steady increase in the number of cases developed in the country, and more radical measures will have to be adopted if the malady is to be completely stamped out. It has been the custom in the past, whenever an animal was reported to be affected with glanders, to isolate and, if possible, to slaughter it. Many cases, however, were placed in an improvised quarantine for a length of time to give the malady a chance to develop. It would seem as if these measures were inefficient, as in many localities where this was done last year, more numerous cases have been reported this year. It is probable that a little energy into the ante-septics of infected cases, investigating stables where horses suspected or pronounced affected have previously been lodged, testing horses on a large scale together with the disinfecting of public-stables, etc., may have to be resorted to before the malady can be effectually stamped out. Glanders, like other diseases, is not so actively contagious as many of the milder ailments, yet the persistent progress, even in districts where it is being watched, would seem to impart a seriousness to the outlook.

Sheep Notes. The sheep is a close grazer, and when it eats off weeds or sprouts they are not apt to come up again. As a rule, if a sheep does not yield eight pounds of wool, it is not the sheep you want of stock.

Unless you feed enough to visibly increase wool and flesh, your money is wasted, as far as profit is concerned. Exercise is absolutely necessary on the part of the dam for the proper development of the young she carries; this applies to the ewe as well as other classes of stock. When a ewe from any cause loses her lamb, she may be put in a separate pen and used as a wet nurse to help out lambs that are short.

Tag the ewes before the lambs come. This should be done when grass starts to grow, and the better plan is to do it before the lambs begin to come.

While the natural feeding ground for sheep is upon the hills where the grass is found, the long wool breeds will be quite at home in rich level pasture, provided only that the soil is dry.

Especially if the ewes are on dry feed.

after they drop their lambs, increase the ration, and if possible, give them a little wheat bran with ground corn and oats. At this time they need a ration that will enable them to produce plenty of milk.

Oats, bran and good clover hay are the ideal food for the breeding ewe. In the keeping of milk a strong point is to cool the milk as soon as possible after milking.
