A BROKEN-DOWN SYSTEM.
This is a condition (or disease) to which doctors
give many names, but which few of them really
understand. It is simply weakness—a break-down of
the vital forces that make up the system. No matter
what may be its causes (or they are almost un-
derstandable), its symptoms are much the same:
the more prominent being sleeplessness, loss of
appetite, nervousness, depression, and a general
feeling of weariness and exhaustion. It is a disease
of the system, and one that is absolutely essential
to all such cases is increased vitality—increased
vital strength and energy.
