ALERTS DOWNED BY GLENWOODS IN FAST GAME

In the East End Baseball League

last evening the Glenwoods defeated the Alerts by a score of 8 to 6. The match attracted a large number of fans and was a fairly good exhibition of baseball. Robertson, who was in the box for the winners, was the star of the game. He was touched up for only four safeties, and was responsible for three of his team's tallies, securing a three base hit with the bases full. The defeat of the Alerts serves to tighten the league race.

SCRIBES WIN FROM ACTORS

The Scribes defeated the Actors from the Thompson-Woods Stock Co.

yesterday afternoon on the North End grounds twelve to one, in a five inning contest. The game was the last in the series of three between these two teams. The first was won by the newspaper men, the second went to the Thompson-Woods players and the final yesterday went to the Scribes.

Ray Hanson at second for the Scribes starred and his brilliant work inspired the other members of the infield. The men in the outer gardens had little to do.

For the Actors all played well but they did not seem to have their batting edges. Sam Maharry was absent from the game.

Doc McGillicuddy and Thomas Burns of the Royal Hotel staff officiated as umpires and their decisions met with general approval.

The members of the Thompson-Woods Stock Company will leave St. John during the first of the week. They have proved popular with the general public as well as with individuals, with whom they have come in contact and they have proved themselves good fellows as well as real sports. The Scribes hope to see them return to St. John for at least another season.

ST. JOHN'S WIN FROM ROCKLANDS

One of the fastest games of the season took place last evening in the City League on the Marathon grounds

when the St. Johns defeated the Rocklands by a score of 5-3.

Kirkpatrick of the St. Johns, was in fine form only allowing the hard hitting Rocklands six scattered hits, while Aulon and Donnelly, working for the Rocklands were touched up for eight hits.

The features of the game were the hitting of Gibbons, Gorman, McGowan and Kinsman.

TRANSFER FIFTEEN FARMS TO YOUNG MEN OF NEW BRUNSWICK

At the meeting of the Farm Settlement Board held here yesterday arrangements were made for the transfer of fifteen farms to natives of the province, or former natives who have been living in the United States and are now returning home. Transfers of farms are being made in all the counties in the province, except St. John, Madawaska and Victoria.

Besides attracting new settlers to the province, the Farm Settlement Act by allowing young men resident in the province to take up farms under easy conditions, is beginning to play an important part in stopping the exodus of native born from the rural district. Most of the business before the meeting was of a routine nature. A. W. Hay of Woodstock, T. W. Butler of St. Stephen, and James Gilchrist attended the meeting.

George Dunlap.

Billy Evans the umpire, picks George Dunlap of the Cleveland Americans as the best-looking recruit he has seen this year. Billy has seen some players and should be a fair judge of them by this time.

Dunlap is an infielder and he may be able to break into the Nap line-up while Chapman is laid up with his broken leg; at any rate, he seems sure to be a substitute. Last year was George's first season in professional ball, playing short stop for London in the Canadian League. Previous to that he had played on independent teams near his home in Connecticut.

LARGE SPREAD OF CANVAS

Gosport, Eng., May 28.—The work of rigging the Shamrock IV progressed rapidly today in the finest weather. The topmast has been stepped, giving a total height of spars of about 150 feet. The indications are that sailspread will be about 10,000 square feet, or possibly 16 per cent. greater than that of the largest American boat.

There is question whether the yacht will carry her sail, even if the hull stands the strain, Sir Thomas Lipton, who returned to Southampton on the Erin this morning, is the recipient of many telegrams of congratulation on the launching of the yacht from different parts of the world. One of the warmest is from Los Angeles.

The English papers give long accounts of the launching, but devote more space to the monkey mascot and the notables present than to the challenger.

Two interesting incidents of the launching luncheon were the proposal of the health of the New York Yacht Club by Sir Joseph Lawrence and a pious statement by Marconi that if he could invent wireless waves that would send the Shamrock to victory he would do it.

Marconi has accepted an invitation to witness the cup races from the Erin.

See Speed in Shamrock.
London, May 28.—Yachtsmen and yachting experts here are rather chary in expressing opinions for publication relative to the new Shamrock.

The Marquis of Ormonde, commodore of the Royal Yacht Squadron, begged to be excused from discussing the matter.

The Marquis of Ailes replied facetiously to the correspondent's inquiry: "Please excuse me from not prophesying until I know."

The yachting experts of the leading newspapers of London, while making no rash predictions, nevertheless discuss the new challenger for the America Cup with some frankness.

Two tendencies are discernible in their comments. One tendency is to regard the Shamrock IV as a decided by yacht. The Times, for instance, admits "her peculiar appearance when looked at stem on." The Daily Telegraph refers also, in almost the same words, to "her peculiar appearance."

The Morning Post says: "The yacht's aspect is clumsy and freakish, owing to the fact that her length fore and aft has been sacrificed in order that weight may be added to her keel, which runs to a great depth, with the lead bulging out on both sides at the edge and weighing more than 60 tons."

Immediately below the waterline the sides curve under until they become almost flat, while above the waterline the sides tumble home to an extent which makes the width on deck several inches short of that of the Morning Post.

"Altogether," concludes the Morning Post, "she is not a graceful yacht, according to the accepted notions."

The second tendency is to find in her speed. The idea possibly is that so much ugliness must have some reason, and that reason probably is a determination to sacrifice everything to swiftness.

The Times says: "There is a general consensus of opinion that she may prove a powerful and speedy boat."

The Daily Mail says: "She is technically a big boat designed to carry an enormous sail spread."

"This," says the Mail's critic, "was made plain when the main stick of her mast was put into place. It cannot have been much less than 120 feet in length, of which a bare seven feet only was in the yacht—that is between the deck and the stem on which it is stepped."

This critic also remarks that her

long, heavy counter and pudding-ended bow will give her an extraordinary sailing length, so that although when upright she measures only 75 feet on the waterline, immediately the wind pressure heels her the sailing length will be enormously increased, all of which goes for stability and speed. The Daily Chronicle says the general impression is favorable and it be-

lieves she will be a fast boat in light winds and should do quite as well in heavy weather as in light seas. A point about which the most secrecy is observed is the sail area of the Shamrock. The Times remarks that with a mast of about 160 feet and a bowsprit of only 10 feet the sail scheme must be lofty and comparatively narrow.

Fairville League.
In the Fairville league last night the Royals won from the Athletics by a 10 to 3 score. The game was marked by heavy hitting. The batteries were: Noble and O'Tools for the Royals, and Humphrey and McLeod for the Athletics.

Studebaker FOUR

\$1375

THE FULL-FLOATING REAR AXLE

Equipped Throughout with Timken Bearings

Completely Equipped Electrically Started and Lighted

The Axle Carries The Car—The Shaft Only Turns the Wheels

The Studebaker FOUR is the only car in the world at \$1375 with a full floating rear axle—equipped even to the hubs with Timken bearings.

This is of vital importance because ordinary axles push downward on the shaft or journal; absolutely frictionless bearings cannot change that condition.

In our Full Floating Rear Axle the shaft turns freely in a steel housing, carrying the last ounce of power directly to the wheels.

The wheels, in turn, revolve just as freely at the ends of the housing, because they run on Timken bearings.

Be clear upon this vital fact: Upon the efficiency of your axle depends the efficiency of your motor.

It isn't so much a question of power creation as it is of power transmission.

Five Reasons Why Men Change Tires

Goodyear Users This Year Increase 55 Per Cent

Faster than ever men are changing from other tires to Goodyears. There are more tire users—that is true; perhaps 20 per cent more than last year. But Goodyear sales have increased 55 per cent. So legions of these new users have discarded other tires.

Why They Change

Some change to end rim-cutting. And No-Rim-Cut tires offer them the only feasible way to do it.

Some have suffered needless blow-outs, due to wrinkled fabric. The only way to prevent them is the "On-Air" cure, and we alone employ it. It adds greatly to our own cost.

Some fear loose treads. By a patent method we reduce this danger by 60 per cent in No-Rim-Cut tires.

And some want our All-Weather tread. A double-thick tread, as smooth as a plain tread, but with deep, sharp, tough projections. It grasps wet roads with a bulldog grip.

No other tire offers

any one of these features. Yet every tire user knows he needs them all.

Resent Extra Prices

Some resent extra prices. There are 18 U. S. and Canadian makes which this year cost you more than Goodyears—up to one-half more. And those prices are unjust.

No-Rim-Cut tires hold top place in Tire-dom. They outsell any other, after millions of mileage tests. At least in the four ways cited they excel any rival tire. Then why should men pay for other tires from \$5 to \$15 more?

There is no reason. It is easy to build tires to undersell Goodyears, but none ever built tires worth more.

Goodyear prices are due to output, to efficient methods and to modest profit. Every added penny is an utter waste. Tell your dealer you want Goodyears, and at Goodyear prices. He will give them to you.
