The highest peak of Kaimakcalon, (called by the Serbians Crown Prince Boris), is still in Serbian hands. Exhausted by their attacks, the Bulgarians did not resume them yesterday. ### RELIEF FROM INDIGESTION

#### The Most Common Cause of This Trouble is Poor Blood.

All conditions of depressed vitality tend to disturb the process of digestion. There is not a disturbed condition of life that may not affect digestion. But few causes of the trouble are so common as thin, weak blood. It affects directly and at once the process of nutrition. Not only is the action of the gastric and intestinal glands diminished, but the muscular action of the stomach is weakened. Nothing will more promptly restore digestive efficiency than good, red blood. Without it the normal activity of the stomach is impossible.

This pale people who complain of indigestion must improve the condition of their blood to find relief. The most active blood builder in such cases is Dr. Williams' Pink Pills. They make the rich, red blood which quickly restores the digestive organs to their proper activity, and the dyspeptic who has hated the sight and smell of food now looks forward to meal time with pleasure. As proving the value of Dr. Williams' Pink Pills in curing indigestion Miss Edith M. Smith, R. R. No. 4, Perth, Ont., says: "I can honestly say I owe my present good health to Dr. Williams' Pink Pills. My stomach was terribly weak and I suffered from indigestion and sick headache, and was always very nervous. I was troubled this way for nearly three years, and in that time took a great deal of doctors' medicine, which, however, did not help me. I could not eat anything without experiencing the most agonizing pain. My sick headaches were most violent and I could not rest night or day. I was asked one day by a friend to try Dr. Williams' Pink Pills, and consented to do so. After taking them for some time I found they were helping me, and I continued to take them steadily for several months, until I found that I was completely cured. While taking the pills I gained both in strength and weight, and I feel it impossible to praise Dr. Williams' Pink Pills too highly."

You can procure these pills through any dealer in medicine of by mail, post paid, at 50 cents a box, or six boxes for \$2.50, from The Dr. Williams' Medicine Co., Brockville, Ont.

## FISHING FLEET VICTIM OF HUN SUBMARINES

### Eleven British Fishing Vessels Sunk in the North Sea on Monday, Berlin Report Claims.

Four Belgian lighters were sunk in one day at the entrance to the English Channel by another submarine. ## SEARCHING PEOPLE WHO LEAVE GERMANY

Germany is so fearful that communications might be made from her soil to the Allies that neutral travellers there are subjected to examinations that might have been devised by Sherlock Holmes before they are permitted to leave. The most minute account of the proceedings that every person leaving Germany has to unwillingly participate in is given by a correspondent of the New York Times, Mr. Franz Hugo Krebs, an American whose name ought to have been some shield. When about to leave the country, and warned in advance of the difficulties he took his books, manuscripts and photographs to the Foreign Office. They were sealed after having been examined, and thus were free to pass the frontier. He asked for a note, which used to be commonly issued to the effect that the bearer and his possessions be sent through as speedily as possible, but this was refused, and he was informed that these certificates were no longer given out.

### The First Bar.

A friend of his who had come in to Germany, a few days before to him that on reaching Warnemunde his tickets were given out and that passengers were examined in the order of the number on their ticket; so he arranged matters with the conductor of the train from Berlin. He told him where to stand just before they reached Warnemunde, pointed out to him, when he arrived, the man who gave out the tickets—and he received No. 1.

### He had with him a large trunk, two grips, and a hatbox, and his experience coming into Germany led him to believe that unless he was well up in the line he might possibly be held over for a day. As the steamer he planned to take for the United States sailed from Copenhagen the next day, it was essential that he should not be detained.

Entering a building right by the train, he was told to go through a long room, and was halted at the door of a passport office. After it had been carefully scrutinized he was passed into another room. There he found a porter with his grips and hatbox, and he was asked to identify his trunk. All his luggage was then placed on a wooden bench, and an officer and sub-officer came over to take charge of the examination. Fortunately for him, the sub-officer had lived in New York for eight years and not only spoke English very well, but was also inclined to be friendly. He was informed that everything would be examined and that all his things must be taken out of his grips and his trunk as well; moreover, he was told that he must take out and also put back the things himself.

### Lots of Time Left in Germany.

He had never packed his trunk; it had been packed by the chambermaid at the Hotel Bristol, on Unter den Eichen, and when he left Warnemunde its appearance beggared description. All his handkerchiefs, collars, shirts, drawers, and socks were examined, one by one, to see whether any concealed papers could be located or whether anything was written on or sewed into them. Handkerchiefs were entirely unfolded, shirts, drawers, and socks were turned inside out, and always there was a careful and persistent search. Every crease was examined. His soap was cut in pieces and a stick of camphor ice that had been cut in two places when he came into Germany was cut in another place. First the grips were examined, and then the hatbox; then, tray by tray, everything in the trunk was gone over. His boots and slippers were examined with great care, and, fortunately, he had no boots that had been recently resoled or rebeeled, otherwise they might have been ripped apart. This, he was told, is frequently done.

### Coming Into Germany the examining officer had torn out the stand in his hatbox, on which the hat rested; he had this fixed in Berlin, but he

## THE CHIEF CHARM OF LOVELY WOMAN

Soft, Clear, Smooth Skin Comes With The Use of "FRUITA-TIVES."

NORAH WATTON  
86 Drayton Ave., Toronto.  
Nov. 10th, 1915.

A beautiful complexion is a handsome woman's chief glory and the envy of her less fortunate rivals. Yet a soft, clear skin—glowing with health—is only the natural result of pure blood.

"I was troubled for a considerable time with a very unpleasant, disagreeing rash, which covered my face and for which I used applications and remedies without relief. After using 'Fruita-tives' for one week, the rash is completely gone. I am deeply thankful for the relief and in the future, I will not be without 'Fruita-tives.'"

NORAH WATTON.

might better have waited until he returned to New York, because, as it was impossible for the officer to get his hands between the stand on which the hat rested and the side of the box, the examiner simply tore the stand out. The band of his silk hat was pushed up, to see whether anything was concealed underneath, and the cushion for brushing the hat was ripped open.

His evening hat was opened. Although it was bought in the United States it seems that it had been made in Paris, and, as that fact was stamped inside, he had a feeling, he says, that it did not lessen the care with which it was examined. In the bottom of his trunk there were about a dozen summer shirts, not worn since the previous summer, and each had a piece of cardboard placed in it when laundered in order to hold the shirt in shape. The cardboard was taken out of each shirt and laid aside.

This completed the examination of his luggage, and he was then told to go with another sub-officer and submit to a personal examination. He was directed to go into a compartment and was told to take off all his clothing except his undershirt.

## SAYS HOT WATER EACH DAY KEEPS THE DOCTOR AWAY

### Drink glass of hot water before breakfast to wash out the poisons.

Life is not merely to live, but to live well, eat well, digest well, work well, sleep well, look well. What a glorious condition to attain, and yet how very easy it is if one will only adopt the morning inside bath.

Folks who are accustomed to feel dull and heavy when they arise, splitting headache, stuffy from a cold, foul tongue, nasty breath, acid stomach, can, instead, feel as fresh as a daisy by opening the sluices of the system each morning and flushing out the whole of the internal poisonous stagnant matter.

Everyone, whether ailing, sick or well, should, each morning, before breakfast drink a glass of real hot water with a teaspoonful of limestone phosphate in it to wash from the stomach, liver, kidneys and bowels the previous day's indigestible waste, sour bile and poisonous toxins; thus cleansing, sweetening and purifying the entire alimentary canal before putting more food into the stomach. The action of hot water and limestone phosphate on an empty stomach is wonderfully invigorating. It cleans out all the sour fermentations, gases, waste and acidity and gives one a splendid appetite for breakfast. While you are enjoying your breakfast the water and phosphate is quietly extracting a large volume of water from the blood and getting ready for a thorough flushing of all the inside organs.

The millions of people who are bothered with constipation, bilious spells, stomach trouble, rheumatism; others who have sallow skins, blood disorders and sickly complexions are urged to get a quarter pound of limestone phosphate from the drug store which will cost very little, but is sufficient to make anyone a pronounced crank on the subject of internal sanitation.

The steamer D. J. Purdy will on and after Monday, Oct. 2nd, leave Indian town, at 8 a. m., instead of 8.30.
