

Concrete Tanks and Troughs Never Rot or Leak

THE most practical tanks, whether for water or sewage, are built of concrete. They never rust, rot, dry out or leak. They never need new hoops or paint. They last a lifetime and seldom require repairing, which makes them the cheapest tanks that can be built.

Clean, Sanitary Watering Troughs

are just as necessary as the animals that drink from them. The farmer's best interests are being served when his stock is insured a plentiful supply of clear, clean water from a trough that is permanent and sanitary.

"What the Farmer can do with Concrete" is the name of a handsome free book that tells all about concrete tanks, watering troughs and other uses of concrete that will save every farmer many dollars. Write for it to-day.
