

## Why Should Not Your Span of Life Be Three Score Years and Ten?

**Dr. Macdonald's Electric Belt.**

The keystone to a long span of life is health, and with health any man or woman may reasonably expect to attain a ripe old age. Yet how many nowadays do so? How many fall e'er they are half way across Life's Bridge? Alas! only too many! But there is no need for this. Any man or woman CAN, if they will, increase the length of their span of life, if they will only see that the span is fitted with a good Keystone.

The more strenuous his life, the more electricity he needs to enable him to live to a hale and hearty old age. Perhaps in his youth he has been prodigal.

"The excesses of youth are drafts on our old age: payable with interest about thirty years after date."

(As Colton, the eminent, said). Therefore, see that YOU, who read these lines, have no drafts still unpaid. Store up your Electricity by wearing
