

J-M Product it sells. This includes the assurance of dependable Service, everywhere available, expressly designed to take care of the purchaser's every possible requirement after sale.

## Galvanized Iron now approaches in price J-M Corrugated Asbestos Roofing, but in durability and efficiency—never.

The demand for war material has "sky-rocketed" the price of zinc and galvanized corrugated iron until they now approach the price of J-M Corrugated Asbestos Roofing.

But this is their only point of likeness. For J-M Corrugated Asbestos Roofing is much more lasting and will still be good for years of roofing service, after galvanized iron has rusted out and gone.

J-M Corrugated Asbestos Roofing is made with a corrugated sheet iron reinforcement enclosed in an envelope of waterproofed Asbestos Fabrics, cemented together and sealed air-tight by a Trinidad Lake Asphalt compound. It never needs coating or painting or any other attention, it forms a roof under which you can live in hottest weather, and may be applied direct to wood or iron framing wherever corrugated iron would be ordinarily used. Its Full Service is assured by J-M Roofing Responsibility.

We invite a comparison of our quotations on J-M Corrugated Asbestos Roofing with the current market quotations on ordinary galvanized corrugated iron.

## Does your braking material satisfy these three reasons? J-M Asbesto-Metallic Brake Blocks Do.

If you are interested in a material for your brakes and clutches that will operate for months without appreciable wear, if you can use a brake block that will not even char under great frictional heat and that is unaffected by water, climate, oil or grease, then try the J-M Asbesto-Metallic Brake Blocks.—For structural reasons.

If you need accurate braking—a brake that will respond to the slightest pressure or the "hardest jam" without feeling the shock, try J-M Asbesto-Metallic Brake Blocks. - For operating reasons.

If you want your brake to be a "safety" brake, that will not slip or creep, even in the presence of oil, grease or water, try J-M Asbesto-Metallic Brake Blocks.—For safety reasons.

What more can we say of this material except to suggest that you try it on your brakes and clutches.

Made in any shape and size to suit your requirements.

Let us have a sketch along with your request for particulars.

## When you make up a J-M Permanite Packed Joint, it's Packed forever

J-M Permanite Sheet

No more looking for leaks and no more time taken in following up all along the line.

J-M Permanite is an "all over the place" packing, not alone a steam packing. It will take care of any packing requirement whether steam or water at any pressure or temperature; ammonia, acid or alkaline solutions.

J-M Permanite is resilient and strong. It won't stick to the flanges, burn or break down. When you have tried J-M Permanite you will realize that it is just another evidence of Johns-Manville Service.
