## Pola Negri Wins in Latest Role

### STAR SCORES DECISIVE HIT IN "MEN AT NICKEL."

Magnificently mounted and beautifully photographed, it affords Pola Negri manifold chances to display her emotional ability in tempestuous scenes of passion, of which that noted star takes full advantage. Also the physical charms of the Polish actress are enhanced by a variety of stunning gowns which cannot fail to arouse the envious admiration of feminine patrons.

The film begins in drab surroundings, a cheap Marcelline cafe, where the heroine plies her humble trade as waitress, which offers a sharply accented contrast to the luxurious atmosphere of wealth and festivity depicted when the action shifts to Paris. The star is well supported. Robert Frazer winning favor as the passion-stricken Georges Kiebler, Robert Edison scoring a hit as Duval, and Edgar Norton giving a particularly sinister impersonation of the villainous Baron. The Nickel announces "The Man on the Box," Syd Chaplin's latest super feature. Greater in every respect than his previous triumph "Charley's Aunt." Watch this paper for definite showing date for "The Man on the Box."

## A Revolution in Cold Storage

### NEW METHOD TRIED IN HALIFAX, NOVA SCOTIA, FOR THE PRESERVATION OF FISH.

Halifax, N.S., Nov. 14.—Improvements in refrigeration methods which may result in widespread changes in systems of storing and shipping perishable foods are being put into effect by a group of shipping experts, fish distributors and officials of the Atlantic Experimental Station for Fisheries of the Canadian Government.

The central idea of the new method is that foods preserved by freezing should be chilled rapidly instead of slowly, as has been the practice in the past. Fillets of large fish are wrapped in waxed paper and packed tightly in narrow cans, sunk in a rapidly circulating bath of very cold brine, kept constantly at a temperature near zero Fahrenheit. Small fish are wrapped and packed in whole.

Good at Six Months. This process freezes the fish rapidly, preventing the formation of large ice crystals which occur when the chilling proceeds at a slower rate, and which is very deleterious to the fish when kept for more than a few days. Fish preserved by the new rapid freezing method have been kept for six months, and when thawed and cooked could only be distinguished from freshly caught fish.

Still more rapid methods of freezing are being sought by the experimenters. Pieces of haddock were hung on wires and submerged in liquid air, kept in big thermos bottles, which furnished a temperature of some 300 degrees below zero Fahrenheit. At once the liquid boiled and hissed like water when a white hot iron is plunged into it, and in a fraction of a minute the fish was taken out, frozen white like one's ear in a blizzard, and as fluffy. There was no moisture on the flesh, no saline, no crystals of ice in the tissue.

### Liquid Air Too Expensive.

Liquid air freezing is still too expensive for commercial use, but the price of the cooling agent could be reduced to a few cents a quart, refrigerating engineers claim, if the fish industry were to adopt the technique widely, since the manufacture of liquid air on a large scale for this purpose would bring a lower price. The use is being considered also of solid carbon dioxide, the soda-water gas which is more easily handled than liquid air but not so cold. Seventy degrees below zero Fahrenheit is the melting point of carbon dioxide, and like liquid air it gives a dry, pure cold.

### Transferred to St. John's.

Mr. L. W. Ripley, who has been transferred from the Royal Bank here to the St. John's, Nfld., branch, leaves this morning for the scene of his new duties. Mr. Ripley has been a year in Charlottetown and has made many friends in business and social circles all of whom, while regretting his departure, will wish him well in his new situation. — Charlottetown Guardian, Nov. 20.

## Lord Mersey Turned Down

LONDON, Eng., Nov. 15.—(Canadian Press Despatch)—In his reminiscences just published, Viscount Ullswater, formerly Mr. J. W. Lowther, Speaker of the House of Commons for sixteen years, tells the following story of Lord Mersey, the famous jurist who, incidentally, conducted the inquiry into the loss of the Empress of Ireland. The story is concerned with the funeral at Windsor, in March, 1917, of the Duchess of Connaught. Lord Mersey was late and vainly tried to find a taxicab to take him on route to Windsor. Seeing the automobile of the French Ambassador outside the Embassy he evinced that Mons. Paul Cambon was bound on the same journey as himself. At that moment the Ambassador came out of the Embassy. Lord Mersey advanced with the intention of asking him for a lift. Not recognizing Lord Mersey, but imagining him to be a beggar, Mons. Cambon waved him away, exclaiming, "No, no, Go away. I give you nothing."
