The Russians had made elaborate prepreparations to check the Japanese movement south on the Liao Tung Peninsula toward Port Arthur. They had fortified the high ground on the south shore of Talienwan Bay, their works extending to the east and the west. The extreme Russian right was at Hushangtao, and the extreme left at Nanshan Hill. ### ASSORTED RUMORS.

## Fighting is in Progress.

St. Petersburg, May 27. - St. Petersburg is filled with all sorts of rumors regarding fighting, which the general staff has for three days been convinced is in progress on the lower part of the Liao Tung Peninsula, but nothing official has been received. For instance, a story is going the rounds that Gen. Tokio, May 27, 10 a.m. - Vice-Ad- Fock (who was in command of the miral Togo has now established a Russian advanced position at Kin complete blockade around the southern Chou), got between two of the enemies end of the Liao Tung Peninsula. A special dispatch from Liao Yang also repeats with slight variation the report cabled to the Associated Press May 23, regarding the loss of 15,000 Japanese before Kin Chou, saying that the enemy's columns got into a cross fire from Gen. Fock's artillery. This seems to have no real foundation in

# BRITAIN DRIVEN TO CONSCRIPTION

Cape Haytien, May 26. - A serious Royal Commission Says It's the Solution of Home Defense Problem.

London, May 27 .- The report of the royal commission on the volunteer and militia forces practically recommends conscription as the only means of providing a home defense army adequate for the protection of the country in the absence or partial absence of the regular troops. The commissioners are of the opinion that the principles adopted by all the other great European states must be largely adopted by Great Britain, and that it is the duty of every able-bodied citizen to be trained for national defense. point out that the necessary training would involve a period of continuous day at Esperanza, on the road between service with the colors, under an instruction body of especially educated and highly trained officers, and they consider that one year of such con tinuous training would suffice, with a few weeks attendance at the maneuvers for a year or two afterwards. The commissioners extinate that such a scheme would provide about 55,000 trained men annually at a cost probably less than that of the present
