Brooder-Hatcher

## Incubators and Brooders

PHILO SYSTEM

If you would like to make some money and have some good sport at the same time, just get one of these "Brooder Hatchers," grow your own eggs and chickens in your own back yard—have them fresh every day. With this system you can keep 50 to 100 chickens in a very small place. The incubator holds 50 eggs, broods one batch below at the same time hatches another batch above, one lamp doing double duty. One gallon of oil runs it for the 21 days. Having secured the entire Canadian Agency, with a car load of machines just arrived, we can fill all orders promptly.

## A SMALL CROP IS A WARNING

A small crop is proof that your land is run down—it is a warning to fertilize promptly.

Manure is the ideal fertilizer because it contains the very elements that crops have extracted from the soil. To get 100 per cent value from the manure you spread, you must use a good manure spreader. The pitchfork method is wasteful, entails hard, disagreeable work, and takes too much time.

When buying a spreader, be sure you get one that will last. You can make sure of the quality, efficiency and durability, by investing in one of the

## I H C Spreaders

### Corn King Cloverleaf

These spreaders are used on thousands of farms. Their strength, simplicity, and durability are matters of record. Why not look into the matter?

When investigating, remember that the power transmitting mechanism used on I H C machines is the most durable used on any line of spreaders. This results from the fact that the beater gears are held in a single casting which prevents them from springing out of alignment and cutting the teeth. The teeth are long and chisel-pointed to insure positive pulverizing of all manure. There is no wedging of manure against the beater bars. The teeth do not rim the bars.

The beater is large enough in diameter so that it does not wind. You will find many other striking advantages which will convince you of I H C superiority.

Why not see the I H C local agent at once? I H C spreaders are made in different styles, in many sizes for every need. If you prefer, write nearest branch house for catalogues and full information.

### I H C

#### Service Bureau

The Bureau is a clearing house for agricultural data. It aims to learn the best ways of doing things on the farm, and then distribute the information. Your individual experience may help others. Send your problems to the I H C Service Bureau.

## THE STRATFORD EXTENSION LADDER

It is the safest and best on the market. Fitted with automatic hooks that lock at every rung and unlock between the rungs.

It is
