# PANOPEPTON

The Best of "First Aid" Foods

In cases of shock or collapse from accident, operation, crisis, over-exertion, sudden illness, or any cause, Panopepton is a quick and sure restorative.

It is ready to use; is well retained, instantly absorbed, gives the cordial effect of a perfectly diffusible nutrient.

**Panopepton** does not merely "fan the flame of life" like a stimulant; it cherishes life and gives it renewed energy.

**Panopepton** is also used per enema with the minimum of trouble and the maximum of good results—see Fairchild's "Peptonised Foods as Nutritive Enemata"—copies to physicians upon request.

**FAIRCHILD BROS. & FOSTER**  
NEW YORK.
