

ANNOUNCEMENT.

Mr. W. M. Leonard, of Boston, announces that the next volume of the Case History Series will be De Normandie's "*Case Histories in Obstetrics*," an octavo of 460 pages by R. L. De Normandie, M.D. of Harvard and the Boston Lying-In Hospital. The book presents 71 case histories, classified in definite groups under Section headings as follows: Section I, Diagnosis of Pregnancy. Section II, Miscarriage. Section III, Normal Pregnancy. Section IV, Forceps Delivery. Section V, Breech Presentation and Delivery, etc.

Each section is followed by a special chapter entitled "Summary." We would call attention to this feature of the book, unique among the Case History volumes. Each summary is a careful consideration of the subject in hand based upon the cases just considered.

The book is thus an orderly succession of clinics with deductive instruction from detailed consideration and comparison of conditions present in each group of cases.

The final chapter is devoted to *The Baby*.
